LAHORE, THURSDAY, JANUARY 4, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 2nd JANUARY 1894.

No.	Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
1	Hissar ...	1·49 at Hissar. 0·86 in Hansi. 0·65 in Bhiwáni. 0·80 in Fatehabad. 0·78 in Sirsa.	1. Sufficient. 2. Good.	Stationary.	...	Prospects good.
2	Delhi ...	...	1. Sufficient. 2. Fair.	Slightly falling.	...	Prospects good.
3	Umballa ...	...	1. Sufficient. 2. Good.	Stationary.	...	Field rats are doing damages in some villages.
4	Jullundur ...	1·91	1. Sufficient. 2. Good.	Slightly falling.	...	Prospects average.
5	Ferozepore ...	...	1. Sufficient.	Stationary.	...	Condition of crops good.
6	Amritsar ...	...	1. Sufficient. 2. Good.	Falling.	...	Ditto.
7	Siálkot ...	Slight rainfall.	1. Sufficient. 2. Good.	Ditto.	...	Prospects of crops good.
8	Lahore ...	0·41 at Lahore.	1. Sufficient.	Stationary.	...	Irrigation continues. Cháhi and nahri crops are good. Baráni average. Crops in Tahsíl Kasúr reported to have been injured by field rats. Poppy crop has germinated well.
9	Mooltan ...	...	1. Sufficient. 2. Good.	Ditto.	Crops being harvested.	Sowings finished.
10	Ráwalpindi ...	...	1. Sufficient. 2. Good.	Falling.	...	Prospects average.
11	Shahpur ...	Slight rainfall in Bhera Tahsíl.	1. Scarce in parts.	Ditto.	...	...
12	D. I. Khan ...	...	1. Sufficient.	Stationary.	...	Condition of standing crops good, but rain badly wanted.
13	Peshâwar ...	...	1. Plentiful. 2. Good.	Ditto.	...	Prospects of crops good.

GENERAL REMARKS.

Rain has fallen in Hissar, Jullundur, Siálkot, Lahore and Shahpur Districts. Prices falling in Delhi, Jullundur, Amritsar, Siálkot, Ráwalpindi and Shahpur; stationary elsewhere. Harvesting of autumn crops nearly over. Irrigation of spring crops going on. Condition of standing crops is generally good and the prospect is said to be good to average. Rain badly wanted in Dera Ismail Khan. Field rats are doing damage to crops in parts of Umballa and Lahore. Cattle are generally reported to be in good condition. Fodder sufficient in all districts except in parts of Shahpur, where it is scarce. Poppy crop has germinated well.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

BLANK RETURNS.

Week ending 16th December 1893. Hissar, Simla and Ráwalpindi Districts.

WEEKLY RAIN REPORT FOR THE WEEK ENDING 23RD DECEMBER 1893.

MEMO.—Every return received is blank.

Returns not received from Hoshiárpur, Gurdáspur and Ráwalpindi Districts.

REPORTS.

Gujrát.—Picking of cotton and pressing of surgarcane in progress. Outturn average. Rabi crops good. Fodder sufficient.

Peshâwar.—Clouds off and on. It drizzled at Peshâwar on the morning of the 25th instant.

PESTONJI, *Supdt.*,
Office of Director of Land Records and Agriculture, Punjab.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 2nd January 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-CO
Sanitary Commissioner, P

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 2ND DECEMBER 1893.

General Results.—The total deaths registered from all causes in the Province were 15,307 against 250 in the previous week and 24,432 in the corresponding week of the past year, giving respectively annual death-rate of 38·8, 38·7 and 62·2 per 1,000 of population. The registered death-rate was 0·1 1,000 greater than that registered last week, but was 6·2 per 1,000 less than the average rate of the responding week of the five years 1888—1892.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 70 deaths were registered against 60 in the previous week and 114 he corresponding week of the past year.

Fevers.—From fevers there were 10,737 deaths against 10,525 in the previous week and 19,545 in corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 331 deaths against 350 in the previous k and 730 in the corresponding week of the past year.

Chest Disease.—One thousand one hundred and forty-four against 1,256 and 841.

Snake-bite.—Three against 8 and 2.

Hydrophobia.—Five against 3 and 3.

All other causes.—Three thousand and seventeen against 3,048 in the previous week and 3,197 in corresponding week of the past year.

Infantile Mortality.—Three thousand nine hundred and seventy-three deaths were registered the Province amongst infants under one year of age, of which number 2,092 were males and 1,881 ales.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,499 births were istered (766 males and 733 females), giving a birth-rate of 55 per *mille* of population; 1,343 deaths e registered (700 males and 643 females), giving a death-rate of 50 per *mille* of population. The orded death-rates of Tanda-*cum*-Urmur, Kasúr, Sonepat and Rohtak 76, 75, 74 and 71 per 1,000 pectively were very high. The registered death-rate of the principal municipal towns, 49·6 per 1,000, 11·6 per 1,000 greater than 38·0 per 1,000, the rate recorded in the rest of the Province.

NITARY COMMISSIONER'S OFFICE,
LAHORE:
The 2nd January 1894.

13	Pesháwar ...	1·70	1. Sufficient. 2. Good.	Slightly falling.	...	Prospects good.

GENERAL REMARKS.

Rain has fallen all over the Province. Prices falling in Jullundur, Amritsar, Ráwalpindi and Pesháwar; stationary elsewhere. Hárvesting of autumn crops over. Sowings of spring crops have been finished. Standing crops are in excellent condition. Recent rain has improved them greatly. Prospects are also reported good. Crops are said to have been injured by field rats in parts of Lahore. Condition of cattle is generally reported good. Fodder sufficient throughout the Province.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 9th January 1894.

A. STEPHEN, Brigade-Surgeon-Lieut.-Colonel,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 9TH DECEMBER 1893.

General Results.—The total deaths registered from all causes in the Province were 14,913 against 15,307 in the previous week and 22,319 in the corresponding week of the past year, giving respectively an annual death-rate of 37·9, 38·8 and 56·8 per 1,000 of population. The death-rate was 0·9 per 1,000 less than that registered last week, and was 4·4 per 1,000 less than the average rate of the corresponding week of the five years 1888—1892.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 79 deaths were registered against 70 in the previous week and 140 in the corresponding week of the past year.

Fevers.—From fevers there were 10,229 deaths against 10,737 in the previous week and 17,618 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 312 deaths against 331 in the previous week and 697 in the corresponding week of the past year.

Chest Disease.—One thousand two hundred and seventy-six against 1,144 and 969.

Snake-bite.—Three against 3 and 3.

Hydrophobia.—Five against 5 and *Nil.*

All other causes.—Three thousand and thirty-nine against 3,017 in the previous week and 2,892 in the corresponding week of the past year.

Infantile Mortality.—Four thousand one hundred and twenty-three deaths were registered in the Province amongst infants under one year of age, of which number 2,160 were males and 1,963 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,456 births were registered (749 males and 707 females), giving a birth-rate of 54 per *mille* of population; 1,276 deaths were registered (662 males and 614 females), giving a death-rate of 47 per *mille* of population. The registered death-rate of the principal Municipal towns, 47·1 per 1,000, was 9·9 per 1,000 greater than 37·2 per 1,000, the rate recorded in the rest of the Province. The recorded death-rates of Kaithal and Kasúr, 112 and 72 per 1,000, respectively, were very high.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 9th January 1894.*

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,

Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Eighty-two thousand six hundred and fifty-nine births were registered in the Province during the month of November 1893, giving a birth-rate of 49 per *mille* of population. Of the total number of births 43,761 were boys and 38,898 were girls.

The total number of deaths registered from all causes in the Province during the month of November 1893 was 65,092 against 57,668 in the previous month and 136,423 in the corresponding month of the past year, giving an annual death-rate of 39, 33 and 81 per *mille* of population per annum respectively.

There was not a single death registered under the head of cholera.

From small-pox 204 deaths were registered against 144 in the previous month and 343 in the corresponding month of the past year; fevers 45,373 against 39,128 and 112,645; dysentery and diarrhœa 1,655 against 1,809 and 4,081.

During the month there were 17 deaths registered from suicide against 24 in the past month; wounding 34 against 46; accidents 255 against 314; snake-bite and killed by wild beasts 54 against 113; and from all other causes 17,500 against 16,090 and 18,964 in the corresponding month of the past year.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 8th January 1894.

GENERAL REMARKS.

Rain has fallen in Ráwalpindi and in parts of Ferozepore, Amritsar, Lahore, Shahpur and Pesháwar. Prices falling in Hissar, Ráwalpindi and Pesháwar rising in Jullundur and stationary elsewhere. Harvesting of autumn crops and sowings of spring crops over. Standing crops are generally in good condition; also the poppy crop in Lahore. Crops are reported to have been injured by field rats in parts of Lahore. Condition of cattle good. Fodder sufficient all over the Province. The prospects of the harvest for the Province at present are good.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*H*=Hail.
R=Slight rain not measured.

PESTONJI, *Supdt.,*

Office of Director of Land Records and Agriculture, Punjab.

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF DECEMBER 1893.

Explanation :—(*c*) Canal Rain-gauge Stations.

1	2	3	4	5	6	7	8	9	10
		RAINFALL.							
		Average Rainfall of past years.			*Rainfall of present year.*				
DISTRICT.	Rain-gauge Stations.	1st October to 31st December.	1st April to 30th September.	For month under report.	Month under report.	1st October to 31st December 1893.	1st April to 30th Septr. 1894.	Total.	Condition of crops and health of people.
HISSAR.	Sirsa ...	0·79	...	0·44	0·13	0·13	...	0·13	Rainfall of the month was beneficial to the rabi sowings. Prospects good. Fodder sufficient.
	Fatahabad ...	0·50	...	0·20	0·29	0·29	...	0·29	
	Hissar ...	**0·82**	...	**0·55**	**0·90**	**0·90**	...	**0·90**	
	Hánsi ...	0·46	...	0·20	...	...	...	...	
	Bhiwáni ...	0·46	...	0·18	...	...	...	...	
	Budhláda ...	...	...	...	...	0·25	...	0·25	
	Tohána ...	...	...	...	...	...	...	...	
JIND STATE.	Dhaneta (*c*) ...	...	...	...	0·10	0·10	...	0·10	
	Safidan (*c*) ...	...	...	...	...	...	...	...	
	Jind (*c*) ...	...	...	...	...	**0·20**	...	**0·20**	
BIKANER STATE.	Chhani (*c*) ...	...	...	...	0·84	0·84	...	0·84	
ROHTAK.	**Rohtak** ...	**0·86**	...	**0·47**	...	...	...	...	The rabi crops throughout the district are coming up well, though those in the west of the Rohtak Tahsíl and in Jhajjar Tahsíl will shortly require rain. Sugarcane pressing still going on. The outturn is on the whole good. General health excellent.
	Gohána ...	0·77	...	0·44	...	...	...	...	
	Sámpla ...	0·58	...	0·27	...	...	...	...	
	Jhajjar ...	0·53	...	0·29	...	0·08	...	0·08	
GURGAON.	Farukhnagar ...	...	...	...	...	...	...	...	Kharíf harvest completed, except cane cutting and a little cotton picking. Rabi sowings completed except on inundated lands in a few places. Early cereals and gram well advanced and in good condition generally, but rain now wanted generally. Showers commenced on the last day of the month, but rather light. Health excellent; canal working pretty fully, but complaints of late and scanty supply came from the Firozpur Bangar. Fodder and food stocks ample.
	Játúsana ...	...	...	...	...	0·28	...	0·28	
	Rewári ...	0·59	...	0·20	...	0·45	...	0·45

Umballa.	Pipli ...	0·73	...	0·31	...	0·79	...	0·79	There was no rain in December, and crops were beginning to feel the want of it. Rain, however, fell with the new year. Prospects are now as good as ever. In four of the six tahsíls zamíndárs are engaged in pressing out the cane crops. Health of people good. Field rats have done damage in some villages.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 13th January 1894.

A. STEPHEN, Brigade-Surgeon-Lieut.-Colonel,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 16TH DECEMBER 1893.

General Results.—The return is incomplete, the registers for the district of Amritsar not having been received. Comparing the results of the districts from which returns have been received the total deaths registered from all causes were 13,979 against 13,941 in the previous week and 18,968 in the corresponding week of the past year, giving respectively an annual death-rate of 37·3, 37·2 and 50·7 per 1,000 of population. The death-rate was 0·1 per 1,000 greater than that registered last week, but was 1·8 per 1,000 less than the average rate of the corresponding week of the five years 1888—1892.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 74 deaths were registered against 67 in the previous week and 141 in the corresponding week of the past year.

Fevers.—From fevers there were 9,680 deaths against 9,629 in the previous week and 14,557 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 255 deaths against 269 in the previous week and 565 in the corresponding week of the past year.

Chest Disease.—One thousand and ninety-four against 993 and 993

Snake-bite.—Four against 3 and 2.

Hydrophobia.—Two against 3 and 1.

All other causes.—Two thousand eight hundred and seventy against 2,977 in the previous week and 2,709 in the corresponding week of the past year.

Infantile Mortality.—Three thousand seven hundred and fifty-nine deaths were registered in the districts from which returns have been received amongst infants under one year of age, of which number 1,946 were males and 1,813 females.

Births and Deaths in Municipal Towns.—In the 44 large Municipal towns 1,230 births were registered (623 males and 607 females), giving a birth-rate of 50 per *mille* of population; 1,194 deaths were registered (628 males and 566 females), giving a death-rate of 49 per *mille* of population. The death-rate registered in large Municipal towns, 48·7 per 1,000, was much greater than 36·5 per 1,000, the rate recorded in the rest of the Province. The recorded death-rates of Kaithal, Ludhiána, Pesháwar and Kartárpur, 149, 82, 75 and 70 per 1,000 respectively, were very high. The excessive mortality in Kaithal and Pesháwar was due to severe outbreaks of small-pox in these towns.

12	D. I. Khan ...	0·01 in Leiah.	1. Sufficient.	Ditto.	...	Condition of standing crops good.
13	Peshâwar ...	0·02	1. Sufficient.	Slightly falling.	...	Prospects good.

GENERAL REMARKS.

Rain has fallen all over the Province. Prices rising in Siálkot; falling in Peshâwar; stationary elsewhere. Harvesting of autumn crops over. Standing crops are much benefited by rain and are flourishing. Prospects are said to be excellent. Crops are reported to have been injured by field rats in parts of Lahore. Cattle are generally reported in good condition. Fodder is said to be sufficient throughout the Province. Poppy crop is in good condition.

* Mean of 26 days.

During nearly the whole of the month of December pressure relatively to other parts of India was steadily high over the Punjab. Anticyclonic conditions continued uninterruptedly from the 1st until the 30th of the month, and during the whole of that period the weather was fine and the wind light. The temperature was about normal during the first half of the month and generally high during the second half. On the 28th the sky commenced to cloud over heavily, and on the 29th a brisk barometric fall took place in Balúchistán, and the weather became overcast over a large part of the Punjab. On the 30th a shallow depression entered Sind from the westward and the wind shifted to the eastward at several stations. On the 31st the barometer was falling fast over the Punjab and the depression had deepened considerably, while rain had fallen at the majority of stations. The main features of the month were thus fine dry weather during the greater part of the month and unsettled weather and rain quite at the close.

Pressure and Winds.—The mean pressure of the month was in excess of the normal at all stations, the excess being generally as much marked on the hills as on the plains. The winds were light and very variable.

Temperature.—The mean temperature of the month was above the normal average at all stations. The variation from the normal was + 3·1° at Mooltan, + 2·5° at Sirsa, Lahore and Murree, and small at the other stations. The warmest place was Delhi with a mean temperature of 61·6°, but at Sirsa and Lahore the mean was almost as high. The highest mean maximum was 77·9° at Sirsa. The following table shows (1) the variation of the mean temperature of the whole Province from the normal mean temperature of the whole Province on each day of the month, and (2) the highest temperature recorded on each day with the place of observation :—

Date.	Temperature variation.	Maximum temperature.	Station.	Date.	Temperature variation.	Maximum temperature.	Station.
Decr. 1st ...	− 0·3°	79·5°	Sirsa.	Decr. 17th ...	+ 1·2°	77·0°	Sirsa.
" 2nd ...	− 1·3°	79·5°	Ditto.	" 18th ...	+ 1·5°	77·5°	Ditto.
" 3rd ...	− 1·6°	78·3°	Mooltan.	" 19th ...	+ 3·6°	77·9°	Khusháb.
" 4th ...	− 1·6°	77·0°	Umballa.	" 20th ...	+ 3·4°	79·5°	Sirsa.
" 5th ...	− 0·5°	78·0°	Sirsa.	" 21st ...	+ 4·2°	80·5°	Ditto.
" 6th ...	+ 1·0°	79·0°	Ditto.	" 22nd ...	+ 4·7°	80·5°	Ditto.
" 7th ...	+ 1·0°	76·5°	Ditto.	" 23rd ...	+ 3·1°	80·0°	Ditto.
" 8th ...	+ 0·4°	80·0°	Ditto,	" 24th ...	+ 3·2°	79·5°	Ditto.
" 9th ...	− 0·4°	77·5°	Ditto.	" 25th ...	+ 4·6°	81·0°	Ditto.
" 10th ...	− 1·4°	76·8°	Mooltan.	" 26th ...	+ 3·4°	81·0°	Ditto.
" 11th ...	− 0·8°	76·5°	Sirsa.	" 27th ...	+ 4·1°	78·0°	Ditto.
" 12th ...	− 0·9°	77·0°	Ditto.	" 28th ...	+ 3·3°	74·5°	Ditto.
" 13th ...	+ 0·2°	77·5°	Ditto.	" 29th ...	+ 2·0°	76·0°	Ditto.
" 14th ...	+ 0·2°	78·0°	Ditto.	" 30th ...	+ 4·2°	75·5°	Ditto.
" 15th ...	− 0·9°	76·8°	{ Montgomery. { Mooltan.	" 31st ...	+ 4·7°	79·5°	Ditto.
" 16th ...	0	76·8°	Montgomery.				

From the above it will be seen that during the first half of the month the variations from the normal, though irregular, were generally in defect, but that from the 17th to the close of the month the mean temperature was steadily in considerable excess. The maxima varied generally between 75° and 80°, but between the 21st and 26th they were on the whole above 80°.

Humidity and Cloud.—The cloud proportion and humidity were about normal.

Rain.—During the month rain fell at all stations except Siálkot, Umballa, Ludhiána and Delhi. All the rainfall occurred during the disturbed period at the close of the month. Cherát had a total for the month of 1·56 in., Peshάwar of 0·94 in., and Dera Ismail Khan of 0·69 in.; but at all the other stations the total amount was less than ½ inch. Most of the stations which received rain had an amount in excess of the normal.

SIMLA: } W. L. DALLAS, F. R. M. S.,
The 10th January 1894. } *Meteorological Reporter to Government, Punjab.*

SUMMARY OF REMARKS ON THE KHARIF CROP OF THE PUNJAB FOR 1893.

THE area under crop in the autumn harvest of 1893 was 10,100,782 acres. This is less than the area of last year's kharíf crop by 2,012,446 acres. It only falls below the normal area, which in this case is the average of the past eight years, by 121,533 acres, or 1·2 per cent. Last year's area was the largest on record. There is a decrease both in irrigated and unirrigated area, amounting to 5·3 per cent. in the case of the former and 19·6 per cent. in the case of the latter.

The rainfall in April was much greater than in 1892. In May also most districts had more than in that year. The monsoon rains began early, and the rainfall of June was much heavier, especially in the south-east of the Province. In July it was generally copious, but much less fell in Mooltan and Jhang, Montgomery, Shahpur, Muzaffargarh and Dera Gházi Khan than in the previous year. In August there was an almost total absence of rain in Hissar, and throughout the Province it was very much less than in 1892. In September, however, except in the Delhi Division, the rainfall was in general very much heavier than in the preceding year. This caused heavy floods, especially in the Jhelum River. Altogether it may be said that the rainy season was a favourable one. The diminution in the area of this year's kharíf crop was not due to anything unfavourable in the season, but probably mainly to the very large area which had been sown with rabi crops, and which ripened very late owing to the heavy winter rain. The preceding kharíf crop was also the largest on record. But for the very larger area taken up by the spring harvest and the lateness of that season, there would probably have been a much larger area to record. The area of crops harvested this year exceeded that of last year in three districts only—Karnál, Gujrát and Hazára.

Crops.

The cotton crop of the Province was the best that has been secured for many years past. Rice also did exceptionally well. The maize crop was generally good Sugarcane was injured by too much rain, but there was a slight increase in the area under that crop.

Delhi Division.

In the Delhi Division the crop is generally reported to have been an average one. In Gurgaon it is said to have been below average. In Karnál the area exceeded that of last year. The early rains were very favorable for sowing in that division.

Jullundur Division.

In Jullundur the crops were injured by rain, and the sugarcane crop by insect pests. In Ludhiána there was a very good rice crop. The other crops were average. In Ferozepore the yield was generally excellent, but the area fell off by 23 per cent.

Lahore Division.

In Montgomery and the greater part of Jhang the outturn was decidedly good. In Lahore the rice and maize crops were much better than last year, cotton rather worse. In Amritsar and Gurdáspur the rice crop was very good. Other crops were injured by rain.

Ráwalpindi Division.

In Siálkot, except in the case of cotton, the outturn of all crops was very good ; in the case of rice abnormally so. In Gujrát the outturn of cotton was excellent ; of other crops average. There was an increase in the area here also. In Gujránwála the harvest was a successful and abundant one. In Shahpur the crop was 6 per cent. below average in area, and as regards outturn, was classed as four-fifths of an ordinary crop. Much damage was done by floods. In Jhelum the cotton crop was better than last year, but other crops below average. In Ráwalpindi there was an unusually good cotton crop, classed as an 18-anna one. Other crops are put at 12 annas.

Pesháwar Division.

In Hazára there was an increase in area, but the crop was not remarkably good. In Peshávar there was an excellent maize crop. This is the most important kharíf food crop in this district. In Kohát there was an increase in area, the produce on irrigated land was fair and on unirrigated land good.

Deraját Division.

In Dera Gházi Khan there was a very large decrease, but the crop of 1892 was a very remarkably good one. This year, however, it was below average. In Muzaffargarh the falling-off is due to heavy floods.

General results.

Notwithstanding the decrease in area, it is probable that in most of the central districts of the Province the total outturn of this year's harvest was quite as good and as valuable as that of last year. In the south-eastern districts the harvest was average, in the south-west below average.

LAHORE :
The 24th January 1894.

F. A. ROBERTSON,
Director of Land Records and Agriculture, Punjab

REPORT ON THE KHARIF HARVEST, 1893.

HISSAR DISTRICT.

THE monsoon set in early this year, and rainfall in July, though not as exceptionally plentiful as it was last year, was still sufficient to admit of extensive sowings. In the month of August there was very little or no rain, when it was essentially necessary to invigorate the young crop, and it was greatly damaged in consequence.

The area of unirrigated crop compares as follows with that of last year :—

	Acres.
Kharif, 1892	1,761,151
" 1893	1,255,144
Decrease ...	506,007

The decrease is entirely due to the non-rainfall in August, as stated above.

The principal unirrigated crops are—

	1892.	1893.
Jowár	449,595	302,226
Bájra	703,386	497,676
Moth	253,822	213,230
Múng	132,284	97,390
Cotton	716	6,286
Fodder	199,158	98,541

With the exception of cotton every crop shows a considerable decrease as compared wfth last year.

Last year cotton crop was seriously damaged by the excessive rainfall in July and August, while this year this was not the case.

The area of irrigated crop compares as follows :—

Kharíf, 1892	30,766
" 1893	25,646
Decrease	5,120

The early monsoon, which ultimately proved so disappointing owing to the cessation of rains in August, induced the people to use baráni land extensively as compared with canal area, and this caused decrease in the irrigated area.

The principal irrigated crops are—

	1892.	1893.
Jowár	12,618	2,391
Cotton	11,606	16,081
Fodder	914	343

The increase in cotton is due to the same fact as noted in case of irrigated crops.

General remarks.—The outturn of the crops was on the whole average.

ROHTAK DISTRICT.

The kharíf crop of this year was good throughout the district.

The unirrigated area under crop was 52,859 acres less than that of last year owing to the heavy rains in July, which interfered with the sowings of bájra and jowár, and to the want of rain in August, which prevented the seed germinating properly. Consequently the area under jowár was 49,444 less than last year and that under bájra 42,274 acres. The outturn of the above crop was only a 12-anna one owing to the stalks having been attacked by insects. The outturn of indigo and cotton was an 18-anna one, due to the good rains at the time of sowing.

The outturn on irrigated lands in all four tahsíls was a 16-anna one, and the total area under crop exceeded that of last year by 4,225 acres and the area under cotton by 1,763 acres, and that under indigo by 2,435.

GURGAON DISTRICT.

The rains set in pretty early, but were rather light at first, and then in July too heavy, so that millet sowings were not only restricted, but when made were out in most circles to a serious extent, necessitating repeated sowings again. A break ensued in August which dried up the chief staples a good deal, but favoured cotton on the whole. In parts of Nuh and Firozpur this unseasonable weather fostered a borer caterpillar which did a great deal of damage to bush millet (jowár) on the heavier soils particularly.

The Landoha Valley (Firozpur Jhir Tahsíl) was twice flooded, and crops destroyed to a considerable extent on two occasions, once in July and again later. The flood extended to the inundated basin of the Nuh Tahsíl. The Sabi came down also in very heavy flood in July, leaving its bed in the Rewári Tahsíl, and breached the Railway, causing temporary loss in a few estates.

On the whole the harvest was rather below average, except for cotton and certain minor staples, particularly indigo. Cotton is assumed to have been average crop, but above recent averages. Fodder remains sufficient, but mostly rather below standard in quality. Grass was abundant. Health and condition of cattle appeared very good.

The estimated results by principal crop are given allowing together for area aud yield in the adjoined statement.

KHARIF 1893.

1							2	3	4	5
FOOD STAPLES.							OIL-SEEDS.	SPICES.		FIBRES.
Cereals.			*Pulses.*				Til.	Chillies, &c.	SUGAR-CANE.	Cotton.
Jowár.	Bájra.	Others.	Múng.	Másh.	Moth.	Others.				
Average and below average.	Average.	Below average.	Below average.	Below average.	Average and below average.	Below average.	Above average.	Average.	Above average.	Average and above average.

(1). The bush millet (jowár) crop was a failure locally in certain circles.

(2). The yield of pulses as regards grain was generally poor, but all, and particularly moth, gave a good outturn of straw in upland circles especially.

(3). The new crop returns do not treat gwár separately. It is an important crop in this district. The outturn was this harvest above average in most circles.

DELHI DISTRICT.

The rains were generally favourable, but the long break in August was most injurious to all crops except cotton.

There was an increase in Kharába, the fodder was in most places short, and the grain, both in the case of cereals and of pulses, was below the average.

In jowár and bájra there was a decrease in every tahsíl. Maize was much the same as last year. There was a decrease in moth, múng and másh all over. The figures in column 14 and column 29 have got mixed up in regard to gwár, which apparently in Delhi and Sonepat is put into column 14, and I know that in Ballabgarh it is shown in column 29.

There is a decrease in sugarcane in Delhi; in Sonepat it is much as last year; in Ballabgarh it is insignificant.

The most remarkable feature in the statement is the great increase in cotton, which, I understand, has not been a good crop in this direction for some time. Last year the total area was only 10,553 acres, and this year it is 25,023 acres. The increase is mostly on the unirrigated land, which last year was only 7,250 acres, and this year is 19,737 acres; but even on irrigated land there is a substantial increase of over 50 per cent. The crop was specially good, and the area would have been still larger but for the unfortunate use in at least one tahsíl (Ballabgarh) of *Purbia* seed. The cotton crop was last year very poor: people had not their own seed, and had recourse to the Baniah and to bankers who came round the villages. The *Purbia* seed looks plumper and bigger apparently than the ordinary seed, and took the fancy of many people, who did not know it was not acclimatized. They sowed it and found that it grew taller and thicker

than the ordinary, and did not flower, nor bear pods at the same time. Much of it was taken up and rabi crops put down. Some fields still remain, as the people think that in spring they may get cotton. The plants I saw had no flowers even on them in the beginning of December.

Taking the harvest as a whole I would say it was average with good cotton.

KARNAL DISTRICT.

The seasonal rainfall was abundant this year and very extensive sowings were therefore made both on irrigated and unirrigated lands. But in the month of August there was a slight break in the rains and this caused a recourse to canal water in many places. The result was an increase of 31,279 acres in "unirrigated" and 6,745 acres in "irrigated," or a total increase of 38,024 acres as compared with the kharíf of 1892.

The *Kharába* was only 360 acres in excess of the loss in the corresponding harvest of the preceding year, the figures for the present kharíf being as follows :—

		Irrigated.	*Unirrigated.*	*Total.*
Tahsíl Karnál	...	351	11,187	11,538
" Pánipat	...	460	3,129	3,589
" Kaithal	...	217	11,910	12,127
Sub-Tahsíl Guhla	...	40	861	901
Total	...	1,068	27,087	28,155

The outturn was average, the estimated produce per acre being as follows :—

Rice	...	...	...	...	... 19 Maunds per acre.
Maize	...	...	...	...	... 9 " " "
Cane	...	...	...	...	... 14 " " "
Cotton	...	...	...	...	... 5 " " "

There were no locusts, nor was there any noticeable disease among men or cattle.

UMBALLA DISTRICT.

For sowings rain was well timed, and rain fell seasonably also for maturing the crops.

Compared with last year a larger area was put under crop.

The heavy rains, however, caused some loss in the Khádir and Bet Chaks.

The outturn was above the average.

SIMLA DISTRICT.

The outturn was below average owing to untimely and excessive rain. The outturn of rice was small from this cause.

KANGRA DISTRICT.

The crops have been generally fair ; but owing to the excessive rain during the year the maize, másh, cotton, sesamum and sugarcane crops suffered. Owing to the seasonable rain a larger area was brought under cultivation than in the previous year.

HOSHIARPUR DISTRICT.

The rains of 1893 were very opportune for kharíf sowings. As early as March an average of 1·5 inches of rain had fallen all over the district. On 4th April there was another fall of 1 inch and over in all the tahsíls of the district, except Una. After a few showers on the 8th, which were general, there was a break up to the 6th May. There was again a fall of about 2 inches throughout the district up to the 27th May, and then there was again a break up to the middle of June. On 24th June the regular rains commenced and continued up to 21st July, when there was again a break of about a fortnight. A few showers fell between 6th and 13th, but then again a complete break up to 24th August. Heavy showers fell during the first week of September, and after an interval of a week there was again a downpour continuing to 20th September, when the rains ceased abruptly. The rainfall for June, July, August and September was again abnormally high, as the following statement shows :—

		1893.	*Average.*	*Difference.*
Hoshiárpur and Sadr	...	41·48	23·54	17·94
Una	...	41·46	24·98	16·48
Dasúya	...	43·18	22·53	20·65
Garhshankar	...	36·08	20·64	15·44

The general character of the rains of 1893 may be summed up as follows. The rains commenced early. They were heavy, but there were breaks. Rice, sugarcane, cotton, which are sown in April, had a good crop all over the district, except in the Chhamb lands, where some injury was done owing to excessive rainfall. A very large area has been sown with indigo this year.

A large area was sown with Indian corn in June, and it did very well, except in the Kandi tract, where a fortnight's break in the rains towards the end of July proved fatal to a portion of the crops.

A comparatively lesser area was sown this year with jowár, china, másh, múng and moth. At least a much lesser area under these crops came to maturity, evidently due to the rains being far too heavy for them. The decrease most noticeable is in jowár. This is due to the fact that the rainy weather gave the zamíndárs no chance of sowing it. The result is that the district has had a very poor crop of fodder this year. The decrease of 25,372 acres in the total area under crop is mainly attributable to the same cause.

The comparative statement below gives the areas of the principal crops for the present and the past years:—

	Kharíf 1892.	*Kharíf* 1893.	*Increase or Decrease.*	*Percentage.*
	Acres.	Acres.	Acres.	
Rice	28,127	35,699	+ 7,572	27
Maize	140,673	143,466	+ 2,793	2
Jowár	62,736	36,229	− 26,507	42
Chína	8,110	6,606	− 1,504	19
Másh	20,954	16,156	− 4,798	23
Múng	2,901	2,510	− 391	13
Moth	34,243	29,807	− 4,436	19
Others	22,631	17,178	− 5,453	24
Sugarcane	25,786	26,998	+ 1,212	5
Cotton	20,758	25,144	+ 4,386	21
Indigo	464	3,308	+ 2,844	613
Others	18,395	17,305	− 1,090	5
District Total ...	385,778	360,406	− 44,179 + 18,807	− 11 + 5
Net ...	...	...	− 25,372	...

The yield on the whole is about average. The "Toka" pest has to some extent affected the amount of yield of rice crops in the Chhamb area. Generally it may be said that the kharíf harvest has been an average one.

JULLUNDUR.

The Revenue Assistant reports that damage to the extent of about one-fourth of the crops has been caused to jowár, moth, maize and másh in low-lying and marshy lands owing to heavy rains, and also to sugarcane owing to the crop having been worm eaten during the rainy season. He also states that floods from the East Beyne have caused some damage to crops along its banks.

LUDHIANA.

Ludhiána.—Outturn generally good. Másh, mungi and makki slightly damaged by rain.

Samrála.—The same as in Ludhiána Tahsíl.

Jagraon.—Outturn of rice was good. Other crops fair. Some crops were destroyed by rain in some of the Bet Circle villages.

General remarks.—The fall in cultivated area, 11,556 acres, as compared with the area sown in the previous year is attributed to the fact of a larger area being sown in the previous season on account of timely rainfall, and consequently less area was available for the kharíf cultivation.

FEROZEPORE DISTRICT.

There was a general falling-off in area cropped on both irrigated and unirrigated lands as compared with the area cropped in 1892. The cause assigned for this is the destruction of the crop by floods and rats. The area cropped gave an excellent yield. The Sirhind Canal was closed for repairs during the summer, and this in great measure accounts for the falling-off in area cropped on irrigated land. The total area cropped was more than 23 per cent. below the area cropped in 1892.

MOOLTAN DISTRICT.

1892	53,441	7,181	22,211	369	37,041	609	55,740	11,507	45,022	7,294	213,455	26,960	There is a total decrease of 29,444 acres both in irrigated and unirrigated areas of the district, which is due chiefly to river inundation in the Shujabad Tahsil and to paucity of rain in the Mailsi and Lodhrán Tahsils, owing to which Bárbárani lands could not be cultivated. In Kabírwala the head of the Abdul Hakim Canal was silted, and so there was an insufficient supply of water.
1893	58,732	5,300	18,821	74	30,440	68	46,579	1,010	43,234	6,713	197,806	13,165

Crops in which the largest increases or decreases in area are found.	*Increase.* Rice, maize, cotton and indigo.	*Decrease.* Jowár, bájra, chína, másh and til.	*Decrease.* Jowár, bájra, chína, sugarcane and cotton.	*Decrease.* Chiefly in bájra.	*Decrease.* Jowár, china, til and indigo.	*Decrease.* Bájra, til, indigo.	*Increase.* Rice, cotton, indigo.	*Decrease.* Jowár, bájra, china and til.	*Decrease.* Jowár, bájra, chína, kangni, oil-seeds.	*Decrease.* Jowár, másh and til.	*Decrease.* Jowár, bájra, kangni, chína, múng, másh, moth, oil-seeds and sugarcane.	*Decrease.* Jowár, bájra, múng, másh and oil-seeds.	

JHANG DISTRICT.

Tahsíl Jhang.—In this tahsíl the irrigated area under the kharíf of 1893 was 29,061 acres as against 34,621 acres of the last year's crop. The unirrigated area amounted to 14,634 acres as compared with 18,939 acres in 1892. The chief decrease has been under rice, mandwa, kangni, múng, másh and cotton owing to the river inundation, by which the land was made unfit for cultivation for many days and the standing crops of cotton were drowned. The cultivated area rose under jowár, bájra and maize in consequence of the Chenab Canal operations.

Tahsíl Chiniot.—Under the irri gated area there has been an increase of cultivation, chiefly in rice, bájra, maize, chína, til and cotton owin g to the Chenab Canal operations. There was, however, decrease in the area of jowár and fodder crops, w hich could not be sown extensively in consequence of the floods, and also in their place other crops mentioned above were substituted. The unirrigated crops show a falling-off as compared with the previous year's sow i ngs under rice, jowár, bájra, múng and moth, which suffered from the floods, while the til and cotton crops pre sent an increase in the up-land villages, which has been owing to the timely rains. The irrigated area this sea son was 64,310 acres and the unirrigated 19,428 acres. Last kharíf it was 41,802 and 22,871 acres respectively.

Tahsíl Shorkot.—In this tahsíl the irrigated and unirrigated area under kharíf crops was 13,328 and 25,528 acres as compared with 18,936 and 25,315 acres respectively in kharíf 1892. The decrease has been under both the irrigated and unirrigated crops, particularly in jowár, másh, mandwa and cotton. These suffered much from the floods in July 1893. The til area shows increase, which were sown more an account of seasonable rains.

For thewhole district the irrigated area gives a larger cultivation and the unirrigated smaller in comparison with the previous year's harvest.

The out turn has been good in Tahsíls Chiniot and Shorkot and average at Jhang. The Jhelum flood proved disastrous to the cotton.

MONTGOMERY DISTRICT.

The rains began well, but there was an almost total cessation of rain in August. There was a good fall in September. There has been a decrease in both the irrigated and unirrigated areas cropped owing to the break in the rains. The total decrease is 24 per cent. on the figures of last year. The out turn of the crops, except that of pulses, has been good; the rice crop has been specially good. Pulses sown in low lands have suffered a good deal from river floods.

LAHORE DISTRICT.

The total area under crop in kharíf 1893 shows a decrease of 98,654 acres as compared with the area cropped in kharíf 1892. Of this decrease a large portion appears under jowár (including chari) both on irrigated and unirrigated land, and this is due to the want of rains in the end of August and the beginning of September. The rain that fell in the middle of the latter month proved to be very advantageous to the rice crops, the area under which has increased by 6,000 acres as compared with the figures given in last year's return. The rice and maize crops did afford a very good yield. The másh crops sown on the sailába lands were mostly spoilt by the river inundations. The area sown with cotton is larger than that sown in kharíf 1892, but the outturn was not satisfactory. On the whole, the kharíf crop of 1893, as compared with that of kharíf 1892, included a much better rice and maize crop and somewhat worse cotton crop, though there has been a complaint of the damage done by rats in the Mánjah tract of the district.

AMRITSAR DISTRICT.

The average rainfall during the kharíf harvest 1893 was as follows :—

May ...	1·77
June ...	3·38
July ...	10·41
August ...	3·07
September ...	6·49
	25·12

Rainfall during September was rather heavy, and the fall for the season was equal to that of last year, and it was fairly distributed all over the district, and, except that it was rather heavy during June and September as compared with last year's fall, it was favourable in respect to time also. June rains did some harm to the harvested rabi crops, and September rains were unfavourable for jowár and cotton crops. The cropped area on principal crops stands thus as compared with last year.

	1892.	1893.
Rice	28,360	35,274
Maize	52,298	55,097
Jowár	118,340	81,551
Sugarcane	20,330	21,617
Cotton	24,661	26,376
Múng	9,172	9,845

This shows that jowár crops have fallen off as compared with last year, but the cropped area under jowár is not much below what it used to be during former years. Jowár area was exceptionally large last year. The jowár crop area for the last four years is as given below :—

1889	89,319
1890	84,254
1891	82,675
1892	118,360
1893	81,551

Rice crop was a good one, as usual; while maize and cotton were slightly damaged by rain. There was an increase under all other principal crops. Sugarcane crop this year does not promise to yield so much as in former years, though the area sown is a little over last year.

GURDASPUR DISTRICT.

The rainfall as compared with that of 1892 was copious and early. There was a considerable break in August, which did harm in parts, and there were heavy floods in September, which also were prejudicial. But on the whole the season cannot be considered abnormal. Rice everywhere may be taken as good, especially in Pathánkot. Sugarcane was good in Batála, but in low-lying lands every where, and perhaps most in Shakargarh, the floods did very great harm. Cotton got too much rain in most places, but in Bharrari Chak Shakargarh it has done well. Maize, jowár, til and indeed most other crops suffered somewhat from too much moisture. The area shrunk again from the large area of 1892 to rather less than that of 1891, and the kharába entries were 7·5 per cent. The heavy rains, however, at the close of the season will undoubtedly start the next rabi well, and any shortcomings of the kharíf will probably be made up within the agricultural year.

SIALKOT DISTRICT.

1. The climatic conditions of this harvest were very different from those of the kharíf of 1892. In that year no rain fell till near the end of July. This year heavy rain fell before the spring harvest was fully gathered, and the monsoon reached the district during the third week in June. Towards the end of August the rain failed entirely, but after the middle of September heavy rain again fell. The total rainfall for September was heavier this year than it has been for many years past.

2. The early rains were peculiarly favourable for all classes of kharíf crops, but the constant heavy rain from the end of June to the end of August had bad effects on the maize and cotton. It also prevented the area under cane from being hoed and weeded. The break in the rains was generally unfavourable. The returns show the abnormal area under rice this year. Many fields were put under this crop which

were better suited for other cereals. The drought withered the rice on these lands, and on the inferior *rohi* soils in the Zafarwál and Siálkot Tahsíls. I made a short tour in September and found whole tracts of rice had failed in these tahsíls. When the rain came on 16th September these tracts were ploughed up again and sown with gram, barley or massar. But the cotton crop suffered most from the break and the subsequent rain. Plucking began early in September, and the plants were blighted by the floods in the end of the month.

3. The heavy September rain was of immense service to the rice crop over the greater part of the district. In my six years' experience of this district I have never seen such a magnificent outturn of rice—both grain and straw. At the present time the zamíndárs of the Kalar tracts in Pasrúr and Raya find it hard to get purchasers for their surplus stock at Rs. 7 per máni (34 seers per rupee). The floods, however, did harm to the maize and other sensitive crops in the three Dokandi Circles, in the Raya Khádir in Bajwat and to a less extent in the Bet Chenab of Siálkot.

4. The total area under crops amounted to 345,632 acres. This is a decrease of 55,853 acres or 13.9 per cent. as compared with last year. The decrease has been confined wholly to the unirrigated area irrigated lands showing a small increase of 5 per cent. The totals for the preceding years of this settlement are as follows :—

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
1888.	1889.			1890.			1891.			1892.			1893.		
		Increase.			Increase.			Decrease.			Increase.			Decrease.	
Total.	Total.	Actual.	Per cent.	Total.	Actual.	Per cent.	Total.	Actual.	Per cent.	Total.	Actual.	Per cent.	Total.	Actual.	Per cent.
353,760	378,651	24,891	7	393,846	15,195	4	320,021	73,825	19	401,485	81,464	25	345,632	55,953	14

Thus the area under kharíf is the smallest of any since 1888, except that of 1891, but the decrease in the actual area sown is not so great as these figures make out for the reason given above. Even when this is taken into consideration, there is a large decrease, the reason for which is the abnormally large area under spring crops reaped in 1893. Had the previous rabi harvest been reaped from an unusually small area, the figures for this kharíf would have exceeded even the unusually large total of last year.

5. The variations in the cropped area of the different tahsíls is returned as follows :—

Zaffarwál.	Raya.	Pasrúr.	Siálkot.	Daska.
−23	−9	−8	−19	−10

The large percentages in Zaffarwál and Siálkot are mainly due to the complete failure of the rice crop over so large a part of these two tahsíls.

6. The following table shows the fluctuations in the various crops of this and the previous kharíf harvest.

1		2	3	4	5	6	7	8	9	10	11	12
Year.		Rice.	Maize.	Jowár.	Kangni.	Moth.	Múng.	Másh.	Sugar-can e.	Cotton.	Other miscel-laneous. orops.	Total crops.
1892		83,693	61,459	73,856	13,070	9,778	1,785	18,371	38,624	28,494	72,355	401,485
1893		104,211	62,559	35,437	4,120	5,834	995	9,608	40,711	36,1 7	45,950	345,632
Difference.	Actual ...	+20,618	+1,100	−38,419	−8,950	−3,944	−790	−8,763	+2,087	+7,613	−26,405	−55,853
	Per cent....	25	2	52	68	40	44	48	5	27	36	14

There has been a marked increase in cotton and rice and a smaller increase in sugarcane and maize. All the other crops, and particularly the pulses, show a decrease.

7. The yield of rice is far above the average, and that of cotton is decidedly below the average. The outturn of cane, maize and other crops, the bumper crops on dry rain lands being considered, is a little above the average.

8. The yield of fodder has been everywhere good, and the cattle have had a very favourable year.

9. On the whole the past kharíf harvest may be said to be decidedly above the average.

GUJRAT DISTRICT.

There was some increase in the kharíf crops ripened this year as compared with kharíf 1892, notwithstanding that the crops in the Bet Jhelum, Chenab and the Hethar circles of the Gujrát Tahsíl were to a certain extent returned as kharába, which is left out of cultivation. This kharába was due to the extraordinary inundation of the Chenab and Jhelum rivers, but it is hoped that this deficiency will be made in rabi next. The increase in the Phália Tahsíl is accounted for by the timely rains, which failed last year. It is hardly worth while to comment on any other crops than cotton, of which the cultivation was very less in the previous two years, owing to want of rains during February and March last. The abundant rains in February and March this year, coupled with the want of cotton felt in this district, brought about a large increase in the cultivation of this crop. The decrease of 16 per cent. in this crop on cháhi lands is due to the fact that wells are worked unusually in years of drought and relaxed when rains are plentiful, as was the case this year. The outturn of cotton crop was a first rate one, that of others being average. On the whole the outturn, with the exception of the Bet Circle, was good.

Sesamum (til) is so tender a crop that it suffers either way : if it rains more, it rots; and if less, it withers away. There was want of suitable moisture owing to abundant rains for the cultivation of this crop, hence decrease.

GUJRANWALA DISTRICT.

The results of the kharíf harvest of 1893 are compared with those of previous years in the table below :—

	Sown.	Failed.	Harvested.	Per cent. of failed to sown.
Kharíf 1888	265,031	32,179	232,852	12
" 1889	305,488	23,513	281,975	8
" 1890	314,436	30,522	283,914	10
" 1891	221,239	35,019	186,220	16
" 1892	381,959	20,086	361,873	5
Average of 5 years	297,630	28,264	269,366	10
Kharíf 1893	316,442	19,597	296,845	6

The area sown and the area reaped therefore show a falling-off of 65,000 acres as compared with the figures of kharíf 1892, which was, however, the biggest kharíf on record. A more instructive comparison can be made with the mean of the previous five years, which was an average cycle, embracing two good, one fair, one bad and one very bad harvest, and judged by this test the present harvest is as regards the area sown 7 per cent. and as regards the area reaped 9 per cent. above the average.

2. The spring rains were very favourable for cane and cotton sowings. The monsoon rains began early and were exceptionally heavy during July, but failed almost entirely in August. The crops especially on baráni lands were in a critical condition till the timely and copious downpour in September rescued them from the risk of failure, and the proportion returned as failed was only 6 per cent. October and November were fine bright months, and harvest operations were completed without any difficulty, as there was no epidemic of fever such as had prostrated the people during the autumn months in the previous years.

3. Compared with kharíf 1892, the chief increases and decreases under the most important crops were:—

Increase.	*Acres.*	*Decrease.*	*Acres.*
Rice...	5,000	Jowár	56,000
Maize	5,000	Bájra	2,000
Cane	2,000	Múng	14,000
Cotton	26,000	Moth	15,000

From these figures it will be seen that there was a considerable increase in the area under the more valuable and irrigated crops, and a very large decrease in the unirrigated crops—jowár, moth and múng. The causes of this are:—

(1) The spring rains were favourable for cane and cotton sowings, and the extension of canal irrigation also enabled a larger area to be put under the irrigated crops.

(2) In 1892, owing to the great scarcity of fodder, an exceptionally large area was sown with unirrigated crops, which over most of the districts are grown more for fodder than for grain, but this year's fodder and pasture being abundant owing to continuous rains and an abundant rábi, much of the land that last year was sown with kharíf crops was reserved for rabi baráni crops, gram, wheat and gram, &c., which are more certain and profitable.

(3) The excessive rainfall from 18th to 20th July made the ground so moist that unirrigated crops could not be sown in time, and the land was therefore ploughed for spring crops.

4. As regards the outturn, the harvest has, I think, been more successful than last year's. Cane and cotton are both splendid crops; maize suffered from the excessive rains, but was on the whole a good crop. Rice did not turn out so well as last year on canal lands, but on other soils was a good average crop. The unirrigated crops suffered from the drought in August, and, though the timely rains in September revived them, the yield of grain was only average, though better than last year.

5. On the whole the harvest has been a successful and abundant one. Prices are falling steadily. Wheat and gram, which on 15th June were selling respectively at 18 and 25 seers per rupee, have now fallen to 22 and 35 seers. All food stocks are abundant; there is no export, and no scarcity of seed grain. If there are good winter rains to mature the enormous area that has been sown with rabi crops, prices will by next spring fall below any thing that has been experienced within the last 18 years.

"Remarks by Colonization Officer as regards Chenab Canal colonization villages in the Jhang and Gujránwála Districts"

The failed crops have been very much under-estimated. The actual value of the crops shown as having been brought to maturity is perhaps two-thirds of the value of a crop of equal acreage under ordinary and fairly favourable circumstances. Baráni crops have almost invariably failed. Canal crops have suffered occasionally from want of water, but the main cause of crop failures has been hasty and experimental cultivation. In parts, however, most excellent crops have been raised, and there is every reason to hope that this will be the rule in future. There was very fair rain in July and August as far as Khurriánwála. Beyond that but little, and in the villages round about Dijkot practically none. The areas given are those recorded by Revenue Patwárís and were ascertained by step measurement. They will probably differ considerably from the figures shown by the Canal Department.

SHAHPUR DISTRICT.

The early monsoon rains were on the whole favourable, and an unusually large area was sown for the kharíf, but the unprecedented flood in the Jhelum of 20th July destroyed some 40,000 acres of crop in the Jhelum valley; and, although part of this area was resown after the flood, the area actually harvested for the whole district is 6 per cent. below the average of the last five years. The falling-off is entirely in irrigated crops, which area 35 per cent. less than the average, while unirrigated crops are 10 per cent. above the average. In the Jhelum circle the harvest was a very poor one owing to the damage done by the flood, and in the Mohar it was below average owing to failure of rain. Elsewhere the outturn was fair. Altogether 47,155 acres, or about a fifth of the area sown, is returned as producing no crop.

The cotton crop in the Jhelum valley suffered very severely, and only 11,629 acres are returned as under irrigated cotton against 27,453. On the other hand, unirrigated cotton areas 15,774 acres against 4,413 acres, the average of the past five years. The outturn has been comparatively poor, and altogether cotton is a very poor crop this year.

Taking the district as a whole, the kharíf crop is 6 per cent. below average in area, and in gross outturn perhaps about four-fifths of an average crop.

Except in the Jhelum valley, fodder is fairly plentiful, and the cattle are in good condition.

The area under oil-seeds is 5 per cent. below the average and the outturn somewhat poor.

JHELUM DISTRICT.

Cotton crop was better than last year, the rest of the crops being below average. The decrease in the area sown is due to heavy rains preventing the cultivators from preparing their lands for sowings. From May to July, when the lands are sown, swarms of locusts visited Tahsíl Tallagang and settled down and deposited eggs; the young locusts when hatched did a considerable amount of damage to the young crops springing up. Later on an insect locally called Tuka damaged the young crops in Chakwál and Tallagang. The July inundations swept away many ricks of wheat lying on banks in Tahsíls Jhelum and Pind.

RAWALPINDI DISTRICT.

A sufficiently large area was sown with cotton owing to favorable rainfall at the sowing season. But there was excessive rain at the time of the other kharíf sowings (bájra, múng, moth,[1] &c.) Hence the area sown this time was less than that of the last year. The bájra and jowár crops were considerably damaged by an insect called Toka which appeared this time in large numbers. This insect which is somewhat like a grass-hopper, injured the young plants by cutting the young shoots. The bájra or jowár plants thus injured withered in most places, and the people were therefore obliged to sow these crops twice or even thrice. The cotton crop this year was an 18-anna crop, the yield thereof being unusually good. The bájra, jowár and makki crops were only 12-anna crops while múng, moth and mash were 16-anna crops this time.

HAZARA DISTRICT.

The area under crops has risen from 256,867 acres last year to 268,518 acres this year, an increase of 11,651 acres, chiefly under rice, kangni, other cereals, other pulses, múng, moth, másh and cotton.

The decreases are under maize, jowár and bájra.

Increase was in unirrigated high-lying lands, where the rainfall was timely.

Low lands were injured by excessive rain at seed time, were water-logged later on, and unfit for other crops than rice, which was extensively sown, and doubttess would have been put down even more widely had the nature of the season and rainfall been foreseen.

PESHAWAR DISTRICT.

Owing to the abundant rabi harvest and the fact that this was late in coming to maturity, the people were not able to prepare as large an area for sowing during the kharíf. The summer rains began well in June, but there was a long break in July and August, and the consequence was that the total area under crop fell off by 48,000 acres as compared with 1892. Nearly 30,000 of this decrease occurred under the head of jowár, which is entirely due to the fact that the rabi harvest of 1892 was very short in straw and a large area had to be put under jowár for fodder in the kharíf of that year, while in 1893 the people had practically more straw than they could dispose of in rabi 1893.

The decrease under the head of *til* of 12,169 acres is due to the fact that rain held off when required for the sowings of this crop, which was throughout the district a very poor one.

The decrease of 869 acres under cane resulted from the destruction of a good deal of the cane kept for seed by the severe frosts and heavy rains in the spring. The crop is average, and to prevent the risk of wet weather interfering with the crushing out of the juice, as happened last year, the presses were set to work unusually early.

Cotton did well on irrigated soils, but was rather a failure on unirrigated.

Rice shows an increase of 1,331 acres, which occurred mainly in the Pesháwar Tahsíl owing to the opening of the Michni-Naushehra Canal.

Maize increased by 17,200 acres mainly in Pesháwar and Charsadda, and was a bumper crop everywhere except in parts of the Razar Tappa in Swabi, where the cobs were rather parched by hot winds coming on when the soil was hypersaturated with moisture, resulting in a disease known locally as *jal*. The outturn elsewhere was excellent both in quality and quantity, and as this is the main winter food of the people, the conspicuous success of the maize harvest quite makes up for the falling-off in cane and *til*.

The kharába entries this year amounted to 3 per cent. only on the area of irrigated and to 33 per cent. on unirrigated, or 14 per cent. on total crop area as against 13 per cent., 17 per cent. and 15 per cent. respectively in 1892.

The stocks of grain and fodder are plentiful, and the district was unusually free from fever during the autumn, and there was no cattle disease to speak of. An abstract showing increase and decrease under the main staples for the district is given below :—

Irrigated or unirrigated.	Rice.				Maize.				Sugarcane.				Cotton.				Til.			
	Year.		*Difference.*		*Year.*		*Difference.*		*Year.*		*Difference.*		*Year.*		*Difference.*		*Year.*		*Difference.*	
	1892.	1893.	Increase.	Decrease.	1892.	1893.	Increase.	Decrease.	1892.	1893.	Increase.	Decrease.	1892.	1893.	Increase.	Decrease.	1892.	1893.	Increase.	Decrease.
Irrigated ...	11,931	13,262	1,331	...	101,487	118,001	16,514	...	11,529	10,660	...	869	16,247	15,935	...	312	472	460	...	12

Total ...	11,935	13,264	1,331	2	114,189	131,389	17,200	...	11,529	10,668	8	869	16,604	18,573	2,281	312	17,490	5,321	...	12,169

KOHAT DISTRICT.

Owing to opportune and good rainfall, the kharíf sowings on the unirrigated lands were timely.

There was also sufficient flow of water in the Kohát Toi.

The area sown this year as compared with the same harvests in the preceding two years as given below was larger :—

			Acres.
Kharíf 1891	...	...	63,599
Ditto 1892	...	...	76,347
Ditto 1893	...	...	81,128

The crops on the unirrigated lands promised well till the end of September 1893, but for want of rain in October 1893 they suffered to a small extent. Damage is also reported to have been caused to the crops to a certain extent as they emerged from the ground by an insect, called "toka" (a species of grass-hopper).

The produce on the whole on the irrigated lands has been fair and that on the unirrigated lands about the average.

BANNU DISTRICT.

The decrease of 55,438 acres in the cultivation of unirrigated area of all the four tahsíls of the district as compared with last year is due to want of rains.

The decrease of 9,664 acres in the cultivation of irrigated area is attributed to the canals flowing very feebly this year.

DERA ISMAIL KHAN DISTRICT.

Kharíf crop in Tahsíls Derah, Kulāchi and Bhakkar was of an average description; that of the Leiah Tahsíl was good, and that of Tahsíl Tánk was below the average outturn.

DERA GHAZI KHAN DISTRICT.

The total area of crops harvested in the kharíf was 220,537 acres as compared with 434,464 acres. The decrease is not confined to any single tahsíl, but is distributed over the whole district, though the percentage of decrease is very large in the Sanghar and Rájanpur Tahsíls. The fact is that the kharíf of 1892 was an unusually good crop in the unirrigated area, such as is not seen even once in ten years. Taking the crops separately, the decrease would be found to have been distributed over all of them, with the exception of cotton, that shows an increase of about 3,000 acres as compared with the past year. This is due to the fact that in 1892 there was a considerable amount of Kharába in this crop owing to excessive rainfall. The harvest may, in general terms, be described to have been below the average. In the Sind tract several of the Inundation Canals failed to work during the critical days of June, and in the Pachad the hill streams did not bring in a sufficient supply of water, and where they did so, as was the case with the Sanghar Tahsíl, came in too great force to allow of their waters being utilized for the irrigation of crops. Some flights of locusts were seen during the hot weather, and some little damage was done.

MUZAFFARGARH DISTRICT.

Tahsíl Muzaffargarh.—The total area brought under cultivation during kharíf 1893 is 39,513 against 55,154 last year. The decrease of 15,641 is due to the heavy flood which visited this tahsíl just at the time kharíf crops were sown.

The remarkable decrease is under the following crops: jowár, bájra, chína, sawánk, til, sugarcane, cotton and indigo. There is, however, increase in the cultivation of rice and sutree. The former requires flood water, and the latter was sown after the flood.

Tahsíl Alipur.—The total area brought under cultivation during the kharíf of 1893 is 35,053 against 35,607 in last year. The decrease is only of 446 acres and calls for no remarks.

Tahsíl Sináwán.—The total area brought under cultivation during kharíf 1893 is 37,707 against 35,227 last year. The increase of 2,480 is due to sufficient rain.

Note.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 20th January 1894.

A. STEPHEN, Brigade-Surgeon-Lieut.-Colonel,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 23RD DECEMBER 1893.

General Results.—The total deaths registered from all causes in the Province were 15,640 against 15,040 in the previous week and 19,065 in the corresponding week of the past year, giving respectively an annual death-rate of 39·7, 38·2 and 48·5 per 1,000 of population. The death-rate was 1·5 per 1,000 greater than that registered last week and was 0·8 per 1,000 greater than the average rate of the corresponding week of the five years 1888—1892.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 101 deaths were registered against 83 in the previous week and 121 in the corresponding week of the past year.

Fevers.—From fevers there were 10,870 deaths against 10,319 in the previous week and 14,460 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 248 deaths against 282 in the previous week and 572 in the corresponding week of the past year.

Chest Disease.—One thousand four hundred and five against 1,427 and 1,086.

Snake-bite.—Three against 4 and 3.

Hydrophobia.—One against 2 and *nil.*

All other causes.—Three thousand and twelve against 2,923 in the previous week and 2,822 in the corresponding week of the past year.

Infantile Mortality.—Four thousand and sixty-seven deaths were registered in the Province amongst infants under one year of age, of which number 2,131 were males and 1,936 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,333 births were registered (719 males and 614 females), giving a birth-rate of 49 per *mille* of population; 1,411 deaths were registered (761 males and 650 females), giving a death-rate of 52 per *mille* of population. The registered death-rate of the principal Municipal towns, 52·1 per 1,000, was 13·3 per 1,000 greater than 38·8 per 1,000, the ratio recorded in the rest of the Province. The registered death-rates of the towns of Kaithal, Kohát, Kasúr and Ludhiána, 129, 105, 93 and 86 per 1,000, were very high.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 20th January 1894.

A. STEPHEN, Brigade-Surgeon-Lieut.-Colonel,
Sanitary Commissioner, Punjab.

LAHORE, THURSDAY, FEBRUARY 1, 1894.

PART I.

STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 30th JANUARY 1894.

No.	Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle	Prices.	Prospects of Kharif.	Prospects of Rabi.
1	Hissar ...	0·62 at Hissar. 0·16 in Hánsi. 0·41 in Bhiwani. 0·35 in Fatehabad. 0·19 in Sirsa.	1. Sufficient.	Falling.	...	Crops flourishing.
2	Delhi ...	2·30 at Sadr. 2·02 in Ballabgarh. 2·69 in Sonepat.	1. Sufficient. 2. Fair.	Stationary.	...	Present rain very seasonable and sufficient for crops.
3	Umballa ...	1·68	1. Sufficient. 2. Good.	Ditto.	...	Standing crops much benefited and are flourishing.
4	Jullundur ...	Slight rainfall.	1. Sufficient. 2. Good.	Ditto.	...	Crops flourishing.
5	Ferozepore ...	1·67 at Sadr. 1·51 in City. 1·39 in Moga. 0·57 in Zira. 1·21 in Muktsar. 0·83 in Fázilka. 0·08 in Nathána. 1·12 in Jalálabad.	1. Sufficient.	Ditto.	...	Prospects of crops good.
6	Amritsar ...	1·82 average.	1. Sufficient.	Ditto.	...	Condition of crops good.
7	Siálkot ...	Rainfall throughout.	1. Sufficient. 2. Good	Falling.	...	Prospects excellent.
8	Lahore ..	2·41 at Sadr. 1·09 in Chunián. 1·29 in Kasúr. 1·67 in Sharakpur.	1. Sufficient. 2. Good.	Stationary.	...	Irrigation of crops in progress. Crop is reported to have been injured by field rats in Tahsil Kasúr. The poppy crop is in good condition.
9	Mooltan ...	0·38 at Mooltan. 0·37 in Mailsi. 0·45 in Lodhrán. 0·36 in Shujabad. 0·32 in Kabirwala.	1. Sufficient.	Ditto.	...	Crops in good condition.
10	Ráwalpindi ..	2·18 at Ráwalpindi. 1·47 in Pindigheb. 2·02 in Fatahjang. 1·74 in Attock. 1·40 in Gujar Khan. 2·36 in Kahuta. 3·70 in Murree.	1. Sufficient.	Ditto.	...	Prospects good.
11	Shahpur ...	Rainfall throughout.	1. Sufficient.	Ditto.	...	Crops in good condition.
12	D. I. Khan ...	0·38 at Sadr. 0·62 in Tánk. 0·75 in Kuláchi. 0·34 in Bhakkar. 0·18 in Leiah. 0·90 in Sheikh Budin.	1. Tending to scarcity.	Falling.	...	Recent rain has greatly improved the condition of standing crops.
13	Peshάwar ...	0·41	1. Sufficient. 2. Good.	Slightly falling.	...	Prospects good.

GENERAL REMARKS.

Good rain has fallen all over the Province. Prices falling in Hissar, Siálkot, Dera Ismail Khan and Pesháwar; stationary elsewhere. Harvesting of autumn crops almost over. Irrigation of spring crops in progress. Standing spring crops are much benefited by the recent rain and are flourishing. Prospects said to be excellent. The crops are reported to have been injured by field rats in parts of Lahore. Cattle are generally in good condition. Fodder sufficient in all districts except Dera Ismail Khan, where it is tending to scarcity. Poppy crops are reported to be in good condition.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*T*=Thunder.
H=Hail.
R=Slight rain not measured.

Note.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 25th January 1894.

A. STEPHEN, Brigade-Surgeon-Lieut.-Col.,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 30TH DECEMBER 1893.

General Results.—The total deaths registered from all causes in the Province were against 15,640 in the previous week and 16,799 in the corresponding week of the past year, respectively an annual death-rate of 40·0, 39·7 and 42·7 per 1,000 of population. The death was 0·3 per 1,000 greater than that registered last week and 2·6 per 1,000 greater than the average of the corresponding week of the five years 1888—1892. The death-rate was very high in the districts Lahore, Mooltan, Gujránwála and Amritsar.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 116 deaths were registered against 101 in the previous week and in the corresponding week of the past year.

Fevers.—From fevers there were 10,847 deaths against 10,870 in the previous week and 11,… the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 217 deaths against 248 in the previous week and 491 in the corresponding week of the past year.

Chest Disease.—One thousand four hundred and sixty against 1,405 and 992.

Snake-bite.—One against 3 and 2.

Hydrophobia.—Two against 1 and 2.

All other causes.—Three thousand one hundred and fifteen against 3,012 in the previous week 2,675 in the corresponding week of the past year.

Infantile Mortality.—Four thousand two hundred and sixteen deaths were registered in the Province amongst infants under one year of age, of which number 2,260 were males and 1,956 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,333 births were registered (682 males and 651 females), giving a birth-rate of 49 per *mille* of population; 1,335 deaths were registered (733 males and 602 females), giving a death-rate of 49 per *mille* of population. The recorded death-rate of large Municipal towns was 10·0 per 1,000 greater than that registered in the … of the Province. The death-rates of Kaithal, Kasúr and Jhajjar, 103, 87 and 83 per 1,000, respectively, were very high.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 29th January 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

* The increase is partly due to running of Troop extra and special trains, and partly to bookings from Delhi and Umballa.

EAST INDIAN RAILWAY,
AUDIT OFFICE:
The 24th January 1894.

J. DOUGLAS,
Chief Auditor.

No. 6 of 1894.

SUPPLEMENT TO THE

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, FEBRUARY 8, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 6th FEBRUARY 1894.

No.	Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
1	Hissar ...	...	1. Sufficient.	Stationary.	...	Good.
2	Delhi ...	0·07 at Sadr. 0·05 in Sonepat. 0·02 in Ballabgarh.	1. Sufficient. 2. Fair.	Ditto.	...	Do.
3	Umballa ...	...	1. Sufficient. 2. Good.	Falling.	...	Much benefited by recent rains. Standing crops are flourishing.
4	Jullundur ...	...	1. Sufficient. 2. Good.	Slightly falling.	...	Prospects average.
5	Ferozepore ...	0·09 in Moga. 0·20 in Zira. 0·09 in Fázilka. 0·07 in Jalálabad.	1. Sufficient. 2. Good.	Stationary.	...	...
6	Amritsar ...	0·07 average.	2. Good.	Falling.	...	Good.
7	Siálkot ...	...	1. Sufficient. 2. Good.	Stationary.	...	Excellent.
8	Lahore ...	0·25 in Kasúr.	1. Sufficient.	Ditto.	Sugarcane is being pressed.	Land is being prepared for kharif. Irrigation commenced. Poppy crop in good condition. Prospects of rabi crops good.
9	Mooltan ...	0·13 at Sadr. 0·15 in Kabirwála.	1. Sufficient.	Ditto.	...	Crops in good condition. Sidhnai canal flowing.
10	Ráwalpindi ...	0·63 at Sadr. 0·09 in Pindigheb. 0·55 in Gujar Khan. 0·68 in Fatahjang. 1·40 in Kahúta. 2·20 in Murree. 0·23 in Attock.	1. Sufficient. 2. Fair.	Ditto.	...	Good.
11	Shahpur ...	...	1. Sufficient.	Falling.	...	Promising.
12	D. I. Khan ...	...	1. Tending to scarcity.	Ditto.	...	Good.
13	Peshāwar ...	0·27	1. Sufficient.	Ditto.	...	Do.

GENERAL REMARKS.

... Amritsar, Jullundur, Shahpur,

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*R*—Slight rain not measured.
S—Snowfall.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 3rd February 1894.

A. STEPHEN, Brigade-Surgeon-Lieut.-Colonel,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 6TH JANUARY 1894.

General Results.—The total deaths registered from all causes in the Province were 14,885 against 15,758 in the previous week and 16,206 in the corresponding week of the past year, giving respectively an annual death-rate of 37·8, 40·0 and 41·1 per 1,000 of population. The death-rate was 2·2 per 1,000 less than that registered last week, but was 1·2 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 116 deaths were registered against 116 in the previous week and 187 in the corresponding week of the past year.

Fevers.—From fevers there were 10,155 deaths against 10,847 in the previous week and 12,010 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 192 deaths against 217 in the previous week and 425 in the corresponding week of the past year.

Chest Disease.—One thousand four hundred and eighty-two against 1,460 and 1,081.

Snake-bite.—Two against 1 and 1.

Hydrophobia.—One against 2 and 1.

All other causes.—Two thousand nine hundred and thirty-seven against 3,115 in the previous week and 2,501 in the corresponding week of the past year.

Infantile Mortality.—Four thousand and seventy deaths were registered in the Province amongst infants under one year of age, of which number 2,186 were males and 1,884 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,318 births were registered (694 males and 624 females), giving a birth-rate of 49 per *mille* of population; 1,392 deaths were registered (771 males and 621 females), giving a death-rate of 51 per *mille* of population. The recorded death-rate of the principal towns was 14·6 per 1,000 greater than the rate recorded in the rest of the Province. The registered death-rates of Kaithal, Kasúr and Pind Dádan Khán, 93, 90 and 80 per 1,000, respectively, were very high.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 3rd February 1894.

A. STEPHEN, Brigade-Surgeon-Lieut.-Colonel,
Sanitary Commissioner, Punjab.

WEATHER AND CROP REPORT FOR WEEK ENDING 13th FEBRUARY 1894.

No.	Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Rabi.	Prospects of Kharif.
1	Hissar ...	...	1. Sufficient.	Stationary.	Crops flourishing.	...
2	Delhi ...	0·03 in Sonepat.	1. Sufficient. 2. Fair.	Ditto.	Prospects good. Flood came down the Jumna and completely destroyed melon fields and other cultivation in bed of river.	...
3	Umballa ...	...	1. Sufficient. 2. Good.	Slightly rising.	Crops have now had all the rain they require at present and are flourishing.	...
4	Jullundur ...	1·40	1. Sufficient. 2. Good.	Slightly falling.	Standing crops average.	...
5	Ferozepore ...	0·15 in Moga. 0·05 in Zira.	1. Plentiful.	Stationary.	Condition of crops good.	...
6	Amritsar ...	0·01 average.	1. Sufficient. 2. Good.	Ditto.	Condition of crops good.	...
7	Siálkot ...	...	1. Sufficient. 2. Good.	Ditto.	Prospects good.	...
8	Lahore ...	0·02 in Chúnian.	1. Sufficient. 2. Good.	Ditto.	Irrigation in progress. Prospects good. The poppy crop is in good condition.	...
9	Mooltan ...	...	1. Sufficient.	Ditto.	Condition of crops good.	...
10	Ráwalpindi ...	0·87 at Ráwalpindi. 0·47 in Pindigheb. 1·09 in Fatahjang. 0·52 in Attock. 0·51 in Gujar Khan. 0·97 in Kahúta. 4·60 in Murree.	1. Sufficient.	Ditto.	Prospects good.	...
11	Shahpur ...	Slight rainfall throughout.	1. Sufficient.	Ditto.	Crops promising.	...
12	D. I. Khan ...	0·14 at Sadr. 0·17 in Tánk. 0·29 in Kuláchi. 0·14 in Bhakkar. 0·28 in Shekh Budín.	1. Sufficient. 2. Good.	Ditto.	Condition of standing crops is good.	...
13	Peshâwar ...	0·42	1. Sufficient. 2. Good.	Ditto.	Prospects good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Hissar, Umballa, Siálkot and Mooltan. Prices rising in Umballa, falling in Jullundur, and stationary elsewhere. Irrigation of spring crops in progress. The standing crops have now had all the rain they require and are flourishing. Prospects are said to be good. The flood in the Jumna completely destroyed the melon fields and other cultivation in the bed of the river in Delhi. Condition of cattle is generally reported good. Fodder sufficient throughout the Province. Poppy crop in good condition.

PESTONJI, *Supdt.,*

... Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

13	Peshávar ...	0·35	1. Plentiful. 2. Good.	Stationary.	Prospects good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Umballa. Prices rising in Umballa; falling in Hissar, Delhi, Amritsar and Dera Ismail Khan; stationary elsewhere. Irrigation of spring crops in progress. Land is being prepared for autumn crop. Conditions of standing crops and prospects are generally reported good. Rape seed crop is in flower. A spell of sunny weather is now required at Umballa. More rain is still wanted in the Dáman tract of Dera Ismail Khan. Crops have been injured by field rats in parts of Lahore. Cattle are generally in good condition. Fodder is said to be sufficient throughout the Province. Poppy crops are in good condition.

RAIN RETURNS, PUNJAB.

Explanations.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 16th February 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 13TH JANUARY 1894.

General Results.—The total deaths registered from all causes in the Province were 15,525 against 14,885 in the previous week and 15,109 in the corresponding week of the past year, giving respectively an annual death-rate of 39·4, 37·8 and 38·3 per 1,000 of population. The death-rate was 1·6 per 1,000 greater than that registered last week, and 5·0 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 120 deaths were registered against 116 in the previous week and 162 in the corresponding week of the past year.

Fevers.—From fevers there were 10,681 deaths against 10,155 in the previous week and 10,791 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 230 deaths against 192 in the previous week and 437 in the corresponding week of the past year.

Chest Disease.—One thousand five hundred and twelve against 1,482 and 1,112.

Snake-bite.—*Nil* against 2 and *nil.*

Hydrophobia.—Two against 1 and *nil.*

All other causes.—Two thousand nine hundred and eighty against 2,937 in the previous week and 2,607 in the corresponding week of the past year.

Infantile Mortality.—Four thousand two hundred and seventy-four deaths were registered in the Province amongst infants under one year of age, of which number 2,221 were males and 2,053 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,227 births were registered (651 males and 576 females), giving a birth-rate of 45 per *mille* of population; 1,316 deaths were registered (730 males and 586 females), giving a death-rate of 49 per *mille* of population. Owing to the continued outbreak of small-pox, the death-rate of Kaithal, 146 per 1,000, was very high. The registered rate of mortality of the large municipal towns was 9·9 per 1,000 greater than the rate recorded in the rest of the Province.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 16th February 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 9th February 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Eighty-three thousand nine hundred and forty-nine births were registered in the Province d[illegible] the month of December 1893, giving a birth-rate of 48 per *mille* of population. Of the total num[illegible] births 44,470 were boys and 39,479 were girls.

The total number of deaths registered from all causes in the Province during the mon[illegible] December 1893 was 66,825 against 65,092 in the previous month and 87,561 in the corresponding [illegible] of the past year, giving an annual death-rate of 38, 39 and 50 per *mille* of population per annum re[illegible]tively.

There was not a single death registered under the head of cholera.

From small-pox 399 deaths were registered against 204 in the previous month and 601 in the [illegible]sponding month of the past year; fevers 45,989 against 45,373 and 67,396; dysentery and di[illegible] 1,166 against 1,655 and 2,674.

During the month there were 13 deaths registered from suicide against 17 in the past m[illegible] wounding 52 against 34; accidents 253 against 255; snake-bite and killed by wild beasts 24 [illegible] 54; and from all other causes 18,929 against 17,500 and 16,556 in the corresponding month of th[illegible] year.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 9th February 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punj[illegible]

NOTE.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 17th February 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 20TH JANUARY 1894.

General Results.—The total deaths registered from all causes in the Province were 13,790 ag 15,525 in the previous week and 13,115 in the corresponding week of the past year, giving respecti an annual death-rate of 35·0, 39·4 and 33·3 per 1,000 of population. The death-rate was 4·4 per 1,000 than that registered last week, but was 4·3 per 1,000 greater than the average rate of the correspon week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 119 deaths were registered against 120 in the previous week 165 in the corresponding week of the past year.

Fevers.—From fevers there were 9,295 deaths against 10,681 in the previous week and 9,19 the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 165 deaths against 230 in the previ week and 316 in the corresponding week of the past year.

Chest Disease.—One thousand three hundred and thirty-seven against 1,512 and 1,007.

Snake bite.—*Nil* against *nil* and 2.

Hydrophobia.—Three against 2 and 3.

All other Causes.—Two thousand eight hundred and seventy-one against 2,980 in the previous w and 2,428 in the corresponding week of the past year.

Infantile Mortality.—Three thousand nine hundred and eighty-six deaths were registered in Province amongst infants under one year of age, of which number 2,128 were males and 1,858 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,107 births w registered (575 males and 532 females), giving a birth-rate of 41 per *mille* of population; 1,078 de were registered (556 males and 522 females), giving a death-rate of 40 per *mille* of population. registered death-rate of the principal Municipal towns, 39·8 per 1,000, was 5·2 per 1,000 greater th 34·6 per 1,000, the rate recorded in the rest of the Province.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 17th February 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COL.,
Sanitary Commissioner, Punj

11	Shahpur ...	...	1. Sufficient. 2. Good.	Ditto.	Crops in good condition.	...
12	D. I. Khan ...	0·11 in Leiah.	1. Sufficient. 2. Good.	Ditto.	Condition of standing crops good. Cultivation of extra rabi crops in hand.	...
13	Peshâwar ...	...	1. Plentiful. 2. Good.	Falling.	Prospects good.	...

GENERAL REMARKS.

The rain has fallen in Umballa, Jullundur, Ferozepore, Mooltan, Ráwalpindi and Dera Ismail Khan Districts. Prices falling in Delhi, Jullundur and Peshâwar; stationary elsewhere. Irrigation of spring crops in progress. Cultivation of extra spring crops going on. Land is being prepared for autumn crops in some districts. Conditions and prospects of standing spring crops are generally reported good, but fine weather is now required. Spring crop is said to have been damaged by field rats in parts of Lahore. Condition of cattle is generally reported good. Fodder sufficient throughout the Province. Poppy crop is said to be in good condition.

* Mean of 28 days.
† " 29 "

During January 1894 the weather was more than usually unsettled over the Punjab. On ie 1st a shallow depression existed over the western desert and south-easterly to north-easterly inds prevailed throughout this Province. Rain was falling at all stations except Mooltan and era Ismail Khan, the amounts ranging from 0·27″ at Montgomery to 2·72″ at Siálkot. On the lls a snowstorm was reported. On the 2nd the weather was still showery in nearly all places cept the Indus Valley, and snow continued to fall on the hills, but the amounts were smaller. n the 3rd these conditions continued unaltered, but on the 4th the rain on the plains and the ow on the hills practically ceased, and fine weather with fairly high temperatures was perienced until the 11th. On that date the weather became unsettled again, and rain fell over e central parts of the country and hail on the hills. The weather was feebly disturbed and owery during the next three days, but on the 14th the weather cleared and no rain of portance fell until the 19th, when snow commenced on the hills and rain on the plains. The riod which followed was one of great and general disturbance, both the snow on the hills d the rain on the plains being heavy. The disturbed weather lasted until the 23rd, when the y suddenly cleared, and fair though cloudy weather continued until the 27th, when rain and w recommenced and a disturbed period which lasted till the 29th. The two last days of e month were fine.

Pressure and Winds.—The variations of the mean pressure of the month from the rmal were small. There was a slight excess, as compared with the average, at Siálkot, eshávar and Ráwalpindi and a deficiency elsewhere. This deficiency was larger on the hills an on the plains, but was nowhere considerable. The winds were generally north-westerly cept at Pesháwar and on the hills.

Temperature.—The mean temperature of the month was below the normal average ery where by amounts ranging from 0·9° at Ludhiána to 6·2° at Murree. The warmest ace was Delhi with a mean of 57° and the coolest Ráwalpindi with a mean of 47·6°. The llowing table shows (1) the variation of the mean temperature of the whole Province from the rmal mean temperature of the whole Province on each day of the month, and (2) the highest mperature recorded on each day with the place of observation :—

Date.	Temperature variation	Maximum temperature.	Station.	Date.	Temperature variation.	Maximum temperature.	Station.
y. 1st ...	+ 0·7°	63·9°	Sirsa.	Jany. 17th ...	− 1·3°	68·8°	Mooltan.
2nd ...	+ 1·6°	67·2°	Ludhiána.	" 18th ...	− 1·8°	72·5°	Umballa.
3rd ...	+ 0·9°	68·6°	Delhi.	" 19th ...	− 2·6°	72·1°	Delhi.
4th ...	− 3·1°	64·8°	Mooltan.	" 20th ...	− 0·6°	71·0°	Umballa.
5th ...	− 3·0°	67·0°	Umballa.	" 21st ...	− 2·4°	66·1°	Delhi.
6th ...	− 3·0°	67·3°	Mooltan.	" 22nd ...	− 3·1°	61·3°	Montgomery.
7th ...	− 2·7°	70·3°	Ditto.	" 23rd ...	− 6·1°	63·3°	Mooltan.
8th ...	− 1·0°	73·3°	Ditto.	" 24th ...	− 7·0°	63·3°	Ditto.
9th ...	− 0·8°	74·3°	Ditto.	" 25th ...	− 6·1°	62·3°	Ditto.
10th ...	+ 1·2°	76·2°	Ditto.	" 26th ...	− 3·4°	64·3°	{ Mooltan. Dera Ismail Khan.
11th ...	+ 0·6°	72·5°	Sirsa.	" 27th ...	− 4·7°	62·1°	Delhi.
12th ...	+ 0·6°	73·0°	Umballa.	" 28th ...	− 1·9°	70·1°	Ditto.
13th ...	− 0·4°	74·0°	Ditto.	" 29th ...	− 2·4°	64·3°	{ Montgomery. Mooltan.
14th ...	− 1·6°	73·1°	Delhi.	" 30th ...	− 3·2°	66·8°	Montgomery.
15th ...	− 1·7°	71·6°	Ditto.	" 31st ...	− 4·1°	65·3°	{ Dera Ismail Khan. Mooltan.
16th ...	− 4·1°	70·0°	Umballa.				

e table shows that there was a cool period from the 4th to the 9th and again from the 13th the end of the month. The coolest time was between the 22nd and 26th. Frost was

reported on the hills more or less throughout the month, and the mean minimum for the [illegible] at Murree was 31'2. The maxima were very low at times.

Humidity and Cloud.—The cloud proportion was high and the air was damp.

Rain.—Rain fell at all stations during the month, and the fall was excessive at [every] station except Dera Ismail Khan, where less than usual was received. At Murree, Siálkot [and] Simla the excess was more than 5 inches and the actual amount was two to three [times] the average. The Indus Valley and Montgomery received the smallest amounts and stations on and near the hills the heaviest.

B.

The following table gives the rainfall data for the Punjab stations for January 1894:—

Stations.	Normal average rainfall in January.	Actual rainfall in January 1894.	Difference from average in 1894.
Punjab, West.	Inches.	Inches.	Inches.
Mooltan	0'48	0'93	+0'4[illegible]
Dera Ismail Khan	0'53	0'42	-0'1[illegible]
Khusháb	0'52	1'70	+1'1[illegible]

NOTE.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 26th February 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 27TH JANUARY 1894.

General Results.—The total deaths registered from all causes in the Province were 13,906 against 13,859 in the previous week and 10,533 in the corresponding week of the past year, giving respectively an annual death-rate of 35·3, 35·2 and 26 7 per 1,000 of population. The death-rate was 0·1 per 1,000 greater than that registered last week, and was 4·7 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 123 deaths were registered against 113 in the previous week and 104 in the corresponding week of the past year.

Fevers.—From fevers there were 9,355 deaths against 9,333 in the previous week and 7,0.. in the corresponding week of the past year. The death-rate from these causes remains high, due to the wide-spread epidemic of Influenza.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 169 deaths against 168 in the previous week and 250 in the corresponding week of the past year.

Chest Disease.—One thousand four hundred and sixty-two against 1,337 and 889.

Snake bite.—*Nil* against *nil* and *nil*.

Hydrophobia.—*Nil* against 3 and 2.

All other Causes.—Two thousand seven hundred and ninety-seven against 2,905 in the previous week and 2,215 in the corresponding week of the past year.

Infantile Mortality.—Four thousand and thirty-two deaths were registered in the Province amongst infants under one year of age, of which number 2,120 were males and 1,912 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,172 births were registered (613 males and 559 females), giving a birth-rate of 43 per *mille* of population; 1,077 deaths were registered (573 males and 504 females), giving a death-rate of 40 per *mille* of population. The registered death-rate of the principal Municipal towns, 39·8 per 1,000, was 4·9 per 1,000 higher than 34·9 per 1,000, the rate recorded in the rest of the Province.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 26th February 1894.

A. STEPHEN, BRIGADE-SURGEON-LIEUT.-COL.,
Sanitary Commissioner, Pu

GENERAL REMARKS.

Rain has fallen in all districts except Umballa. Prices falling in Hissar, Umballa, Jullundur, Amritsar and Dera Ismail Khan; stationary elsewhere. Irrigation of spring crops in progress. Sowings of extra spring crops going on. Land is being prepared for autumn crops. Sowings of cotton commenced. Sugarcane juice being expressed. The standing crops are promising and are in good condition. Prospects are generally said to be good. A spell of sunny weather is now required. Crops have been injured by field rats in parts of Lahore. Cattle are generally in good condition. Fodder sufficient throughout the Province. Poppy crop is flourishing.

Note.—[illegible]ght rain.
[illegible]ail.

PESTONJI, *Supdt.*,
Office of Director of Land Records and Agriculture, Punjab.

Memo. of Errors for the month of December 1893.

Against Meluana (Gujranwala District) in columns 34, 37, 39 and 40 read 2·20 for 3·20.

Against Midh (Shahpur District) insert in column 33, 0·50, and for columns 37, 39, 40 for 0·47, 0·47 and 0·47 read 0·97, 0·50 and 0·97 respectively.

Against Bhera (Shahpur District) in columns 34, 37 and 40 for 0·28, 1·01 and 1·01 read 0·44, 1·17 and 1·17 respectively.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—T=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 5th March 1894.

W. A. C. ROE, SURGEON-LIEUT.-COL.,
Sanitary Commissioner, Pun[illegible]

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 3RD FEBRUARY 1894.

General Results.—The return is incomplete, the registers for the district of Jhang not having been received. Comparing the results of the districts from which returns have been received, the total deaths registered from all causes were 14,686 against 13,629 in the previous week and 12,652 in the corresponding week of the past year, giving respectively an annual death-rate of 38·1, 35·3 and 32·8 per 1,000 of population. The death-rate was 2·8 per 1,000 greater than that registered last week, and 7·4 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 99 deaths were registered against 123 in the previous week and 110 in the corresponding week of the past year.

Fevers.—From fevers there were 9,866 deaths against 9,203 in the previous week and 8,666 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 146 deaths against 163 in the previous week and 236 in the corresponding week of the past year.

Chest Disease.—One thousand four hundred and ninety against 1,419 and 1,027.

Snake bite.—One against *nil* and 1.

Hydrophobia.—Four against *nil* and 1.

All other Causes.—Three thousand and eighty against 2,721 in the previous week and 2,611 in the corresponding week of the past year.

Infantile Mortality.—Four thousand three hundred and thirty-five deaths were registered in the districts from which returns have been received amongst infants under one year of age, of which number 2,356 were males and 1,979 females.

Births and Deaths in Municipal Towns.—In the 43 large Municipal towns 1,060 births were registered (546 males and 514 females), giving a birth-rate of 40 per *mille* of population; 987 deaths were registered (528 males and 459 females), giving a death-rate of 37 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 5th March 1894.

W. A. C. ROE, SURGEON-LIEUT.-COL.,
Sanitary Commissioner, Punjab.

11	Shahpur ...	Heavy rainfall in Shahpur and Khusháb Tahsíls.	1. Sufficient.	Falling.	Prospects good. Extra rabi crops being sown.	...
12	D. I. Khan ...	0'85 at Sadr. 0'81 in Tank. 0'53 in Kuláchi. 0'90 in Bhakkar. 0'35 in Leiah. 1'20 in Shekh Budin.	1. Sufficient. 2. Good.	Stationary.	Condition of standing crops is good.	...
13	Peshâwar ...	0'65	1. Sufficient. 2. Good.	Ditto.	Prospects of crops good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Hissar, Umballa and Siálkot. Prices falling in Jullundur, Amritsar and Shahpur; stationary elsewhere. Extra spring crops being sown. Cotton sowings in progress. Land is being prepared for autumn crops. Condition and prospects of standing crops are good. The spring crops in parts of Lahore are said to have been damaged by field rats and floods from river. Cattle are generally in good condition. Fodder sufficient throughout the Province. Poppy crop is in good condition.

TULSI DAS, *Clerk of Statistics,*

Office of Director of Land Records and Agriculture, Punjab,

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—T=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

WEEKLY RAIN REPORTS RECEIVED TOO LATE FOR INSERTION IN PREVIOUS GAZETTES.

PESTONJI, *Supdt.,*

Office of Director of Land Records and Agricultur[e], P[unjab].

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF FEBRUARY 1894.

Explanation :—(*c*) Canal Rain-gauge Stations.

1	2	3	4	5	6	7	8	9	10
		Rainfall.							
		Average Rainfall of past years.			*Rainfall of present year.*				
District.	Rain-gauge Stations.	1st October to 28th February.	1st April to 30th September.	For month under report.	Month under report.	1st October 1893 to 28th February 1894.	1st April to 30th September 1894.	Total.	Condition of crops and health of people.
Hissar.	Sirsa ...	1·64	...	0·30	0·36	2·57	...	2·57	The prospects for the rabi are good. Rape seed and gram in flower. Sunshine and warmth required to bring the crop to maturity. Fodder sufficient. Health of people good.
	Fatahabad ...	1·83	...	0·45	0·61	3·20	...	3·20	
	Hissar ...	1·76	...	0·36	0·15	3·33	...	3·33	
	Hánsi ...	1·59	...	0·35	0·18	2·91	...	2·91	
	Bhiwáni ...	1·27	...	0·24	0·30	2·13	...	2·13	
	Budhláda ...	...	...	...	0·10	1·95	...	1·95	
	Tohána ...	...	...	...	1·23	3·49	...	3·49	
Jind State.	Dhaneta (*c*) ...	...	...	...	0·35	2·60	...	2·60	
	Safidan (*c*) ...	...	...	...	0·20	2·87	...	2·87	
	Jind (*c*) ...	...	...	...	0·54	2·97	...	2·97	
Bikaner State.	Chhani (*c*) ...	...	...	...	0·43	1·67	...	1·67	
Rohtak.	Rohtak ...	1·66	...	0·32	0·50	3·29	...	3·29	There has been seasonable rain throughout the district with much benefit to the crops. Sugarcane pressing still going on. General health good.
	Gohána ...	1·89	...	0·37	0·68	3·11	...	3·11	
	Sámpla ...	1·57	...	0·28	0·82	3·20	...	3·20	
	Jhajjar ...	1·45	...	0·28	0·53	2·92	...	2·92	
Gurgaon.	Farukhnagar ...	...	...	...	0·15	3·15	...	3·15	Wheat and barley thriving, but a little late. Gram doing well. Rape-seed harvest begun. Weather unusually mild. Health good. Fodder abundant except perhaps in parts of Núh and Fírozpur. Ploughings for autumn harvest well in hand and cane being layered. Canal was fully used.
	Játúsana ...	...	...	...	0·30	3·18	...	3·18	
	Rewári ...	1·32	...	0·22	0·09	3·55	...	3·55	
	Shahjahánpur ...	...	...	...	...	2·20	...	2·20	
	Tauru ...	...	...	...	0·40	2·73	...	2·73	
	Núh ...	1·15	...	0·31	0·28	3·07	...	3·07	
	Fírozpur ...	0·89	...	0·13	0·15	3·56	...	3·56	
	Hodal ...	...	...	...	...	3·32	...	3·32	
	Hattin ...	...	...	...	0·30	2·35	...	2·35	
	Palwal ...	1·68	...	0·38	0·38	3·00	...	3·00	
	Sohna ...	...	...	...	0·20	1·90	...	1·90	
	Gurgaon ...	1·99	...	0·31	0·26	3·16	...	3·16	
	Punahána ...	...	...	...	0·10	2·73	...	2·73	
Delhi.	Ballabgarh ...	1·55	...	0·36	0·34	3·37	...	3·37	The rain during the month under report did no damage to the crop and the prospects are still good, but a heavy cold weather flood came down the Jumna on the 10th and almost completely destroyed all the melon fields and other cultivation in bed of the river. Grass and fodder sufficient Health of people generally fair. Canal was closed during the month for annual repairs.
	Mahrauli ...	...	...	...	0·32	2·91	...	2·01	
	Sadr (Delhi) ..	2·36	...	0·34	0·39	4·39	...	4·39	
	Sonepat ..	1·83	...	0·37	0·69	4·08	...	4·08

	Mádhopur (*c*) ...	8·87	...	2·86	1·66	10·76	...	10·76	
	Shakargarh ...	5·17	...	2·00	0·94	9·55	...	9·55	
Sialkot.	Zafarwál ...	4·30	...	1·66	1·46	10·49	...	10·49	Although the rainfall of the month was below the average, there was a great deal of cloudy weather which brought rust on the wheat. The late rain, however, will have done much good, and if we only get good sunshine the rabi crops ought to be very good. Massar and gram have suffered from too much wet. The prices are very low, and general health of the people good. Fodder is plentiful.
	Pasrúr ...	4·46	...	1·61	0·78	8·94	...	8·94

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 13th March 1894.

W. A. CRAWFORD ROE, Surgeon-Lieut.-Colonel,
Sanitary Commissioner, Pun[jab].

Remarks by the Sanitary Commissioner, Punjab, on the General Health of the Province during the week ending Saturday, the 10th February 1894.

General Results.—The return is incomplete, the registers of the district of Amritsar for the present [we]ek and those of the Jhang district for the previous week not having been received. Comparing the [res]ults of the districts from which returns have been received, the total deaths registered from all [cau]ses in the Province were 13,014 against 13,845 in the previous week and 11,083 in the correspond[ing] week of the past year, giving respectively an annual death-rate of 35·5, 37·7 and 30·2 per 1,000 [p]opulation. The death-rate was 2·2 per 1,000 less than that registered last week, but was 6·1 [per] 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 87 deaths were registered against 89 in the previous week and 79 [in t]he corresponding week of the past year.

Fevers.—From fevers there were 8,813 deaths against 9,407 in the previous week and 7,603 in [the] corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 129 deaths against 128 in the previous [we]ek and 214 in the corresponding week of the past year.

Chest Disease.—One thousand one hundred and twenty-two against 1,206 and 920.

Snake-bite.—Two against 1 and *nil.*

Hydrophobia.—One against 4 and 2.

All other causes.—Two thousand eight hundred and sitxy against 3,010 in the previous week [and] 2,265 in the corresponding week of the past year.

Infantile Mortality.—Three thousand nine hundred and eighty deaths were registered in the [dis]tricts from which returns have been received amongst infants under one year of age, of which number [..]40 were males and 1,840 females.

Births and Deaths in Municipal Towns.—In the 44 large Municipal towns 936 births were [reg]istered (485 males and 451 females), giving a birth-rate of 38 per *mille* of population; 792 deaths [we]re registered (441 males and 351 females), giving a death-rate of 32 per *mille* of population.

[SA]NITARY COMMISSIONER'S OFFICE,
LAHORE:
The 13th March 1894.

W. A. CRAWFORD ROE, Surgeon-Lieut.-Colonel,
Sanitary Commissioner, Punjab.

Delhi ...	...	1. Sufficient. 2. Good.	Slightly rising.	Crops flourishing. Prospects good.	...
Umballa ...	...	1. Sufficient.	Stationary.	Crops are flourishing.	...
Jullundur ...	...	1. Sufficient. 2. Good.	Ditto.	Average.	...
Ferozepore ...	...	1. Sufficient.	Ditto.	Prospects good.	...
Amritsar ...	...	1. Sufficient. 2. Good.	Rising.	Condition of crops good.	...
Siálkot ...	...	1. Sufficient. 2. Good.	Stationary.	Rabi crops promising.	...
Lahore ...	...	1. Sufficient. 2. Good.	Falling in Sharakpur; stationary elsewhere.	Good except in Kasúr Tahsíl, where field rats have done some damage. Poppy crop in good condition.	Land is being prepared. Sowings of cotton, tobacco and vegetables in progress. Sugarcane juice being expressed.
Mooltan ...	...	1. Sufficient.	Stationary.	Good.	...
Ráwalpindi ...	0·35 at Sadr. 0·15 in Pindigheb. 0·20 in Fatahjang. 0·21 in Attock. 0·15 in Kahúta. 0·78 in Murree.	1. Sufficient. 2. Good.	Ditto.	Prospects good.	...
Shahpur ...	...	1. Sufficient. 2. Good.	Falling.	Condition of crops good.	...
D. I. Khan ...	0·03 at Sadr. 0·31 in Tánk. 0·15 in Kuláchi. 0·03 in Leiah.	1. Sufficient. 2. Good.	Stationary.	Good. Sowings of extra rabi crops in progress.	...
Peshâwar ...	0·07	1. Sufficient. 2. Good.	Ditto.	Prospects of rabi crops good.	...

GENERAL REMARKS.

No rain except in Ráwalpindi and Dera Ismail Khan Districts. Prices falling in Shahpur and a part of Lahore District; rising in Delhi and Amritsar; stationary elsewhere. Extra spring crop is being sown in Dera Ismail Khan. Cotton sowings in progress. Land is being prepared for autumn crops. Prospects of standing crops good. The spring crops in parts of Lahore have been injured by field rats. Cattle are generally in good condition. Fodder sufficient throughout the Province. Poppy crop is in good condition.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—T=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

Snowfall Report.

The fall of snow on the Khaibar Pass and other adjacent hills in the Peshawar District from 16th January to 15th February 1894 was measured as follows:—

Tira hills	3 feet.
Bara hill	1 to 2 feet.
Laka Sar Peak	1 foot.

General Remarks.—The snowfall of the present year is below the average.

Murree (Ráwalpindi District). The depth of snow at Murree during the month of February 1894 was measured about 4 feet and 10 inches.

PESTONJI, *Supdt.*,

Office of Director of Land Record and Agriculture, Punjab

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 20th March 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Seventy-five thousand five hundred and fifteen births were registered in the Prov[illegible] the month of January 1894, giving a birth-rate of 43 per *mille* of population. Of the total [illegible] births 40,095 were boys and 35,420 were girls.

The total number of deaths registered from all causes in the Province during the January 1894 was 65,673 against 66,825 in the previous month and 61,365 in the correspond[illegible] of the past year, giving an annual death-rate of 38, 38 and 35 per *mille* of population per an[illegible]tively.

There was not a single death registered under the head of cholera.

From small-pox 527 deaths were registered against 399 in the previous month and 675 [illegible]sponding month of the past year; fevers 44,523 against 45,989 and 43,464; dysentery and [illegible] 843 against 1,166 and 1,564.

During the month there were 18 deaths registered from suicide against 13 in the [illegible] wounding 30 against 52; accidents 231 against 253; snake-bite and killed by wild beasts [illegible] 24; and from all other causes 19,487 against 18,929 and 15,335 in the corresponding month [illegible] year.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 20th March 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-CO[illegible]
Sanitary Commiss[illegible]

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 17th March 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF PROVINCE DURING THE WEEK ENDING SATURDAY, THE 17TH FEBRUARY 1894.

General Results.—The total deaths registered from all causes in the Province were 13,... 14,187 in the previous week and 11,507 in the corresponding week of the past year, giving an annual death-rate of 34·5, 36·0 and 29·2 per 1,000 of population. The death-rate was ... less than that registered last week, but was 6·2 per 1,000 greater than the average rate of ... sponding week of the five years 1889–1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 74 deaths were registered against 96 in the previous w... in the corresponding week of the past year.

Fevers.—From fevers there were 9,081 deaths against 9,151 in the previous week a... the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 124 deaths against 150 in the ... week and 224 in the corresponding week of the past year.

Chest Disease.—One thousand four hundred and ninety-six against 1,465 and 1,024.

Snake-bite.—Three against 2 and 2.

Hydrophobia.—Four against 1 and *nil.*

All other causes.—Two thousand eight hundred and eight against 3,022 in the previ... and 2,439 in the corresponding week of the past year.

Infantile Mortality.—Four thousand and fifty deaths were registered in the Province ... infants under one year of age, of which number 2,226 were males and 1,824 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,063 bi... registered (513 males and 550 females), giving a birth-rate of 39 per *mille* of population: ... were registered (480 males and 383 females), giving a death-rate of 32 per *mille* of populatio...

13	Peshâwar ...	0·45	1. Sufficient. 2. Good.	Stationary.	Prospects of crops good.	...

GENERAL REMARKS.

Light rain fell in Ferozepore, Amritsar, Lahore, Mooltan, Ráwalpindi, Shahpur, Dera Ismail Khan and Peshâwar Districts. Prices stationary in Jullundur, Ferozepore, Siálkot, Mooltan and Peshâwar; falling elsewhere. Sowings of extra spring crops in progress. Sugarcane juice being expressed. Land is being prepared for coming autumn. Cotton cultivation commenced. Condition of standing crops is good. They are ripening. Crops have been injured by field rats in parts of Lahore. Recent rain has produced rust in parts of Dera Ismail Khan. Cattle are generally in good condition. Fodder is said to be sufficient throughout the Province. Poppy crop is in good condition.

* Mean of 27 days.
† " 25 "

During the month of February 1894 the distribution of pressure has been fairly normal, but the daily changes in pressure have been considerable, very rapid rises and falls taking place from day to day, which caused unsettled and showery weather throughout the month. A shallow low pressure area of no great importance passed over the south of the Punjab on the 14th, and another was discernible on the 23rd over the north-west, but no well-marked or considerable depression entered the Province during the month. Rain fell nearly every day, there being only 7 days on which no rain was reported. On the 6th, 16th and 27th the fall was general, occurring at nearly every station in the Punjab. On the remaining days it was partial, occurring chiefly at the hill stations. The heaviest fall was that of 1·74 inches registered at Simla on the 8th February.

Barometer and Winds.—The mean pressure of the month was above the normal at all stations, the excess being greatest at Simla, Siálkot and Murree. Winds were fairly normal in direction, except at Siálkot, Pesháwar and Simla, where they were more southerly than usual. They were somewhat below the normal in strength.

Temperature.—The mean temperature for the month was slightly to moderately in excess at all stations, though the day temperatures were in all cases below the normal owing to the large proportion of cloud prevailing during the month. But this defect was more than made up by the raising of the night temperatures due to the same reason, the excess at Lahore amounting to as much as 5·4° above the normal, while at several other stations it was more than 4°. The following table shows (1) the variation of the mean temperature of the whole Province from its normal mean temperature for each day of the month; and (2) the highest temperature recorded on each day, with the place at which it was registered :—

From the above it will be seen that at the commencement of the month temperature was considerably in defect, but as the month advanced this defect gradually diminished, till from the 11th onward it was steadily in excess till the 24th, from which date to the end of the month the mean average temperature varied but slightly from the normal. The highest mean temperature was that of Delhi, *viz.*, 62·4. The highest maximum temperature registered during the month was 83·3 at Mooltan on the 23rd.

Humidity and Cloud.—Skies were more densely clouded than usual and the humidity percentage higher.

Rainfall.—A reference to the following table, which gives the rainfall da Punjab stations for February, will show that rain fell at every station during the mont average rainfall for the West Punjab was 0·11 inch and for the East 0·92 inch in exce normal. The station at which the rainfall was most in excess was Simla, which 4·80 inches above the normal.

Snowfall.—The following information has been received regarding the snow the month :—

Dera Ismail Khan District, 1st to 28th February.—Snow fell in the country on 10 days during the month, the total extent of fall being above 6½ feet snowfall has not been general in the district ; no snow fell on the hills adjoining Tank Ta

Kángra District, 1st to 28th February.—The snowfall has been about the s last year, but there has been much rain and the snow has melted rapidly. Accumula snow on the higher passes of Kulu Tahsíl amounted to between 5 and 19 feet ; on those o Tahsíl, 4 and 18 feet.

Chamba District, 1st to 15th February.—The accumulations of snow a elevations are about the same as usual, but they are believed to be unusually heavy higher passes.

Hazára District, 1st to 15th February.—There was a fall of snow on the Abbo plain on the 7th. The snowfall on the lower ranges has this winter been moderate. Acc tion of snow on the Kagan and higher ranges varied from 2 to 12 feet.

Khyber Pass District, 1st to 15th February.—The snowfall this winter is sai below the average.

Kurram Valley District, 1st to 12th February.—Light falls of snow occurred o days and melted rapidly.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 27th March 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 24TH FEBRUARY 1894.

General Results.—The total deaths registered from all causes in the Province were 13,184 against 13,590 in the previous week and 11,146 in the corresponding week of the past year, giving respectively an annual death-rate of 33·4, 34·5 and 28·3 per 1,000 of population. The death-rate was 1·1 per [illegible] less than that registered last week, but was 5·8 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 77 deaths were registered against 74 in the previous week and [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 8,851 deaths against 9,081 in the previous week and 7,[illegible] in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 138 deaths against 124 in the previous week and 218 in the corresponding week of the past year.

Chest Disease.—One thousand three hundred and seventy-four against 1,496 and 1,037.

Snake-bite.—Six against 3 and 3.

Hydrophobia.—Two against 4 and 1.

All other causes.—Two thousand seven hundred and thirty-six against 2,808 in the previous week and 2,425 in the corresponding week of the past year.

Infantile Mortality.—Three thousand nine hundred and thirty-six deaths were registered in the Province amongst infants under one year of age, of which number 2,122 were males and 1,814 females.

Births and Deaths in Municipal Towns.—In the 49 large Municipal towns 1,026 births were registered (544 males and 482 females), giving a birth-rate of 38 per *mille* of population; 806 deaths were registered (429 males and 377 females), giving a death-rate of 30 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 27th March 1894.

13	Peshàwar ...	...	1. Sufficient. 2. Good.	Stationary.	Prospects of crops good.	...

GENERAL REMARKS.

Rainfall *nil*. Prices falling in Hissar, Amritsar, Ráwalpindi and Dera Ismail Khan; stationary elsewhere. Reaping of spring crops commenced. Sowings of extra spring crops in progress. Ploughings and sowings of sugarcane and cotton commenced. Condition and prospects of standing crops good. Crops are reported to have been injured by field rats in parts of Lahore and by rust in parts of Dera Ismail Khan. Cattle are generally in good condition. Fodder sufficient throughout the Province. Condition of poppy crop good.

Note.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 3rd April 1894.

W. A. CRAWFORD ROE, F.R.C.S., Surgeon-Lieut.-Colonel,
Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the General Health of the Province during the Week ending Saturday, the 3rd March 1894.

General Results.—The total deaths registered from all causes in the Province were 11,475 against 13,184 in the previous week and 11,046 in the corresponding week of the past year, giving respectively an annual death-rate of 29·1, 33·4 and 28·0 per 1,000 of population. The death-rate was 4·3 per 1,000 less than that registered last week, but was 2·1 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 82 deaths were registered against 73 in the previous week and 93 in the corresponding week of the past year.

Fevers.—From fevers there were 7,557 deaths against 8,851 in the previous week and 7,261 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 142 deaths against 138 in the previous week and 185 in the corresponding week of the past year.

Chest Disease.—One thousand two hundred and four against 1,374 and 1,044.

Snake bite.—Two against 6 and 3.

Hydrophobia.—Seven against 2 and 5.

All other Causes.—Two thousand four hundred and eighty-one against 2,740 in the previous week and 2,455 in the corresponding week of the past year.

Infantile Mortality.—Three thousand five hundred and sixty-nine deaths were registered in the Province amongst infants under one year of age, of which number 1,987 were males and 1,582 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 952 births were registered (473 males and 479 females), giving a birth-rate of 35 per *mille* of population; 799 deaths were registered (448 males and 351 females), giving a death-rate of 29 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 3rd April 1894.

W. A. CRAWFORD ROE, F.R.C.S.,
Surgeon-Lieut.-Col.,
Offg. Sanitary Commissioner, Punjab.

Sialkot.	Zafarwál ...	5·70	...	1·40	2·10	12·59	...	12·59	The rabi crops promise a bumper harvest. The weather throughout the month has been most favourable, and if only we have fine weather in April, the harvest will be a splendid one. The rain in March has enabled much sowing of sugarcane and cotton to be done. The general health of the people is good. The Revenue Extra Assistant Commissioner spent 26 days this month inspecting the crop girdáwari.
	Pasrúr ...	5·85	...	1·39	1·17	10·11	...	10·11

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF MARCH 1894—(CONTINUED).

Explanation: (c).—Canal Rain-gauge Stations.

2	3	4	5	6	7	8	9	10
	RAINFALL.							
	Average rainfall of past years.			Rainfall of present year.				
Rain-gauge Stations.	1st October to 31st March.	1st April to 30th September.	For month under report.	Month under report.	1st October 1893 to 31st March 1894.	1st April 1894 to 30th September 1894.	Total.	Condition of crops and health of people.
Swábi ...	5·88	...	1·16	2·06	11·52	...	11·52	Extra rabi sowings are in progress. Owing to timely rains the condition of standing crops is good. In Tahsíl Mardán the sesamum crops are being reaped. There was a heavy hailstorm over the rocky tract of the village of Dag Ismail Khel, Tahsíl Nowshera. No damage done. Fodder abundant. No floods from hill torrents. The Revenue Assistant was 19 days on tour during the month. Health of people good.
Lahore (Utman Bolak)	6·01	...	1·04	1·60	9·91	...	9·91	
Nowshera ...	6·15	...	1·57	1·47	7·09	...	7·09

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, APRIL 19, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 17th APRIL 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Rabi.	Prospects of Kharif.
Hissar ...	...	1. Sufficient. 2. Good.	Stationary.	Crops being cut.	...
Delhi ...	0·27 at Sadr.	1. Sufficient. 2. Fair.	Rising.	Crops being reaped.	...
Umballa ...	...	1. Sufficient.	Slightly rising.	Harvesting has commenced.	...
Jullundur ...	0·21	1. Sufficient. 2. Good.	Ditto.	Reaping commenced.	Sugarcane and cotton weeding in hand.
Ferozepore ...	0·03 at Sadr. 0·05 in City. 0·07 in Zira. 0·04 in Fazilka.	1. Sufficient.	Stationary.	Crops are being reaped.	...
Amritsar ...	0·24 average.	1. Sufficient.	Falling.	Harvesting commenced. Prospects good. Poppy crop ripened.	...
Sialkot ...	...	1. Sufficient. 2. Good.	Stationary.	Crops promising. Extra rabi sowings commenced.	...
Lahore ...	0·13 at Sadr. 0·11 in Chunián.	1. Sufficient. 2. Good.	Ditto.	Reaping in progress. Prospects good. Crops in Tahsil Kasúr are reported to have been injured by field rats. Poppy crop in good condition.	Sowings of cotton commenced.
Mooltan ...	0·08 in Kabirwála.	1. Sufficient. 2. Good.	Ditto.	Condition of crops good. Sidhnai Canal flowing.	...
Rawalpindi ...	1·55 at Ráwalpindi. 1·03 in Pindigheb. 0·91 in Fatahjang. 0·58 in Attock. 0·97 in Gujar Khan. 1·10 in Kahúta. 1·81 in Murree.	1. Sufficient. 2. Good.	Falling.	Prospects good.	...
Shahpur ...	Rainfall throughout.	1. Sufficient.	Stationary.	Crops in good condition.	...
D. I. Khan ...	1·11 at Sadr. 0·97 in Tánk. 0·31 in Kulachi. 0·06 in Bhakkar. 0·78 in Sheik Budín.	1. Sufficient. 2. Good.	Rising.	Rain was not beneficial to the crops. Heavy hail fell at Sadr for one hour which damaged considerably rabi and extra rabi crops. The crops in parts of district have been damaged to some extent by the hail.	...
Peshawar ...	1·19	1. Sufficient. 2. Good.	Stationary.	Prospects of standing crops good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Hissar, Umballa and Siálkot. Prices rising in Delhi, Umballa, Jullundur and Dera Ismail Khan; falling in [illegible] and Rawalpindi; stationary elsewhere. Reaping of spring crops going on. Sowings of extra spring crops in hand. Sowings and weedings of sugar[illegible] commenced. Standing crops are promising and their prospects are generally said to be good. Spring crops have been injured by field rats in [illegible] and by hail in Dera [illegible]

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.

The gauges in use are indicated thus—

b Watson's Improved.

s Symon's Improved.

Stations not thus marked use the old pattern gauge.

Columns 4—10—T=Thunder.

H=Hail.

R=Slight rain not measured.

[illegible]—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

[illegible]ARY COMMISSIONER'S OFFICE,
LAHORE:
The 10th April 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,

Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 10TH MARCH 1894.

General Results.—The total deaths registered from all causes in the Province were 11,330 ag[ainst] ,475 in the previous week and 9,861 in the corresponding week of the past year, giving respectiv[ely] n annual death-rate of 28·7, 29·1 and 25·0 per 1,000 of population. The registered death-rate w[as] ·4 per 1,000 less than that registered last week, but was 3·1 per 1,000 greater than the average rate he corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 88 deaths were registered against 82 in the previous wee[k and] 2 in the corresponding week of the past year.

Fevers.—From fevers there were 7,311 deaths against 7,557 in the previous week and 6,3[..] he corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 121 deaths against 142 in the pre[vious] eek and 152 in the corresponding week of the past year.

Chest Disease.—One thousand and seventy-one against 1,204 and 933.

Snake bite.—Five against 2 and 3.

Hydrophobia.—Three against 7 and 1.

All other Causes.—Two thousand seven hundred and thirty-one against 2,481 in the previous w[eek] nd 2,290 in the corresponding week of the past year.

Infantile Mortality.—Three thousand six hundred deaths were registered in the Province amon[g] nfants under one year of age, of which number 1,965 were males and 1,635 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 969 births w[ere] egistered (493 males and 476 females), giving a birth-rate of 36 per *mille* of population; 774 dea[ths] were registered (404 males and 370 females), giving a death-rate of 29 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 10th April 1894.

W. A. CRAWFORD ROE, F.R.C.S.,
SURGEON-LIEUT.-COL.,
Offg. Sanitary Commissioner, Pun[jab].

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 16th April 1894.* — W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL., *Offg. Sanitary Commissioner, Punjab.*

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 17TH MARCH 1894.

General Results.—The total deaths registered from all causes in the Province were 11,399 against ... in the previous week and 8,869 in the corresponding week of the past year, giving respectively an annual death-rate of 28·9, 28·7 and 22·5 per 1,000 of population. The death-rate was 0·2 per 1,000 greater than that registered last week, and was 4·8 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 74 deaths were registered against 88 in the previous week and 74 in the corresponding week of the past year.

Fevers.—From fevers there were 7,509 deaths against 7,311 in the previous week and 5,741 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 162 deaths against 121 in the previous week and 150 in the corresponding week of the past year.

Chest Disease.—Nine hundred and seventy-two against 1,071 and 871.

Snake-bite.—Three against 5 and 5.

Hydrophobia.—Two against 3 and 4.

All other causes.—Two thousand six hundred and seventy-seven against 2,731 in the previous week and 2,024 in the corresponding week of the past year.

Infantile Mortality.—Three thousand four hundred and ninety-five deaths were registered in the Province amongst infants under one year of age, of which number 1,853 were males and 1,642 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,003 births were registered (515 males and 488 females), giving a birth-rate of 37 per *mille* of population; 749 deaths were registered (422 males and 327 females), giving a death-rate of 28 per *mille* of population.

GENERAL REMARKS.

Rain has fallen in Ferozepore, Mooltan, Ráwalpindi, Dera Ismail Khan, and Peshawar Districts. Prices rising in Umballa, Jullundur, Amritsar, and Dera Ismail Khan; falling in Ferozepore; stationary elsewhere. Harvesting of spring crops in progress. Sowings of extra spring and autumn crops going on. Weeding of sugarcane and cotton commenced. Prospects of crops are said to be good. Outturn in two Tahsils of Dera Ismail Khan is expected to be below average. Cattle are generally in good condition. Fodder sufficient throughout the Province. Poppy crop ripened and is in good condition.

TULSI DAS, *Clerk of Statistics*,
Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.

The gauges in use are indicated thus—

b Watson's Improved.

s Symon's Improved.

Stations not thus marked use the old pattern gauge.

Columns 4—10—T=Thunder.

H=Hail.

R=Slight rain not measured.

D=Dust-storm.

WEEKLY RAIN REPORTS RECEIVED TOO LATE FOR INSERTION IN PREVIOUS GAZETTES.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 24th April 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.
Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 24TH MARCH 1894.

General Results.—The total deaths registered from all causes in the Province were 11,074 against ... in the previous week and 8,351 in the corresponding week of the past year, giving respectively an annual death-rate of 28·1, 28·9 and 21·2 per 1,000 of population. The death-rate was 0·8 per 1,000 less than that registered last week, but was 3·9 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 97 deaths were registered against 74 in the previous week and 80 in the corresponding week of the past year.

Fevers.—From fevers there were 7,218 deaths against 7,509 in the previous week and 5,362 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 125 deaths against 162 in the previous week and 141 in the corresponding week of the past year.

Chest Disease.—Nine hundred and fortty-three against 972 and 763.

Snake-bite.—Four against 3 and 1.

Hydrophobia.—Two against 2 and 5.

All other causes.—Two thousand six hundred and eighty-five against 2,677 in the previous week and ...98 in the corresponding week of the past year.

Infantile Mortality.—Three thousand three hundred and fifty-five deaths were registered in the Province amongst infants under one year of age, of which number 1,856 were males and 1,499 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,038 births were registered (557 males and 481 females), giving a birth-rate of 38 per *mille* of population; 773 deaths were registered (418 males and 355 females), giving a death-rate of 29 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 24th April 1894.

W. A. CRAWFORD ROE, F.R. C.S.,
SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

Peshawar	0·12	1. Sufficient. 2. Good.	Falling.	Prospects of standing crops good.	...

GENERAL REMARKS.

[illegible] in Ráwalpindi, Dera Ismail Khan and Peshâwar Districts. Prices unsettled in Ráwalpindi; falling in Ferozepore and Peshâwar [illegible]. Reaping and thrashing of spring crops going on. Sowings of extra spring crops nearly over. The outturn of spring crops is expected to be [illegible]. Prospects of standing [illegible] damaged by recent hail in parts of Dera Ismail Khan District. Cattle

SUMMARY OF METEOROLOGICAL CONDITIO[NS] PREVAILING OVER THE PUNJAB DURING MARCH 1894.

WEATHER REVIEW OF THE PUNJAB FOR THE MONTH OF MARCH

General Summary.—Fine weather prevailed in the Punjab during the greate of the month of March. On the 3rd pressure had given way briskly and was largely in By the next morning a further very rapid fall had taken place and a deep depression was with pressure nearly half an inch in defect in the North and Central Punjab. This gave rain to the Province, Murree registering 2·57 inches, Ráwalpindi 2·47 inches, Cherat 1·84 and several other stations over one inch. Winds were cyclonic in character, the cen convergance being to the south of Khusháb, and were very strong at the Hill Stations, esp at Murree and Cherat. Rain continued during the next 24 hours, in some cases accom ing thunderstorms, and hailstorms were experienced at Simla and Murree; but the dep had filled up as rapidly as it had formed. Fine weather again prevailed and lat occasional thunderstorms and light showers of rain till the morning of the 10th, when p gave way briskly in a narrow belt of country stretching from the Simla Hills, where the greatest, southwards to the Central Deccan, indicating that a depression of some intens formed over the Western Himalayas between Murree and Simla. Winds were strong Hill Stations, and several thunderstorms and hailstorms were reported. Cherat rece inch rain and Murree ·67 inch. By next morning the depression had partially filled up moved eastwards over the Himalayan area. No other disturbances took place dur month and, with the exception of local thunderstorms and duststorms, weather contin to the end of the month.

Barometer and Winds.—As will be seen from the following table, the mean p for the month was slightly in defect of the normal at all stations, the defect being g the Hill Stations of Murree and Simla. Winds varied but little from the normal in s and at most stations were fairly normal in direction. At Simla and Pesháwar, howe mean direction was almost exactly opposite to the normal one in March, and at Si Dera Ismail Khan it was respectively more easterly and more westerly than usual at th of the year.

Temperature.—At the beginning of the month temperature fell very rapidly Punjab, the mean maximum temperature on the 1st as registered next morning being as 14° below the normal. Temperature continued more or less in defect till the en month, when the day temperature rose to above the normal, the night temperature, b continuing slightly in defect, owing to the absence of cloud and abnormal dryness atmosphere. The mean for the month of both day and night temperatures was s considerably in defect at all stations. The day temperature at Delhi and Ludhiána much as 6° below the normal. At Simla it was still more largely in defect, but this due to the normals for this station having been calculated from observations regi warmer site than the present one. The following table gives 1) the variation from th of the mean temperature of the Punjab for each day of the month and (2) the highest m

temperature registered in the Province on each day with the station at which it was registered:—

Date.		Temperature variation of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.	Date.		Temperature variation of previous 24 hours.	Highest Maximum temperature of the day.	Station at which registered.
March 1st	...	− 4·9°	70·3°	Sirsa.	March 17th	...	− 1·6°	86·3°	Sirsa.
" 2nd	...	− 5·1°	72·3°	Do.	" 18th	...	− 2·5°	87·8°	Mooltan.

" 15th	...	+ 0·8°	95·3°	Do.	" 31st	...	+ 2·7°	104·9°	Montgomery.
" 16th	...	− 2·8°	89·8°	Do.					

Humidity and Cloud.—The mean humidity of the month was considerably in excess at most stations. At Simla and Murree it was slightly in defect. The cloud proportion was on the other hand below the normal at every station for which normals are available for comparison. The percentage of saturation was very high at the beginning of the month, but on the morning of the 12th there was a general, and at the Hill Stations a large, decrease (Simla and Murree registering a fall of over 50), and towards the close of the month humidity was generally in defect. The lowest humidities were recorded at Murree, where they varied during the last 5 days of the month from 13 per cent. on the 26th to 21 per cent. on the 28th.

Rainfall was in excess of the normal at all stations, except Pesháwar, Ludhiána and Sirsa, but at none of these stations did the defect amount to as much as half an inch. On the other hand, Murree received 3·52 inches in excess of its usual rainfall for March, and Simla 1·85 inches. The average rainfall in the West Punjab was 1·07 inches in excess of the normal and in the East Punjab 0·77 inch.

Snowfall.—The Deputy Conservator of Forests, Bashahr Division, Simla, in a report on the snowfall of the past winter in the Upper Sutlej Valley, states that the falls of snow from 1st December to the beginning of March were unusually numerous, and he noticed that they were in all cases preceded by strong westerly winds. Two feet was the average depth of each fall. More rain than usual fell at elevations below 7,000 feet, causing much damage to houses and loss in cattle and sheep, but the snowfall at higher elevations was abnormally heavy and exceeded the very heavy fall of the previous winter. The accumulation of snow on the higher passes at the end of March was unusually large.

The Superintendent of the Meteorological Observatory at Leh, in Ladakh, also calls attention to the unusually heavy snowfall experienced on the higher ranges during the past winter; and, comparing it with the falls of previous years since 1885, he finds it was three times heavier than the average. He also states that it was twice as heavy as the abnormally heavy fall of the winter of 1890-91. The whole country has been covered with snow ever since the 21st January and cultivation is hence very backward. It was only about the 5th March that the lower fields in the Indus Valley (height 10,500 feet) began to be clear of snow. This unusually heavy snowfall is believed to extend over a very large area to the west and north.

The following tables give (1) a summary of the meteorological conditions prevailing
r the Punjab in March 1894, and (2) the rainfall data for the month :—

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 1st May 1894.

W. A. CRAWFORD ROE, F.R.C.S., Surgeon-Lieut.-Col.
Offg. Sanitary Commissioner,

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 31ST MARCH 1894.

General Results.—The total deaths registered from all causes in the Province were 11,221 against [illegible] in the previous week and 8,335 in the corresponding week of the past year, giving respectively … annual death-rate of 28·5, 28·1 and 21·1 per 1,000 of population. The death-rate was 0·4 per 1,000 greater than that registered last week, and was 4·7 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 122 deaths were registered against 97 in the previous week and 72 in the corresponding week of the past year.

Fevers.—From fevers there were 7,235 deaths against 7,218 in the previous week and 5,362 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 173 deaths against 125 in the previous week and 162 in the corresponding week of the past year.

Chest Disease.—Nine hundred and seventy-four against 943 and 788.

Snake-bite.—Five against 4 and 4.

Hydrophobia.—Five against 2 and 4.

All other causes.—Two thousand seven hundred and seven against 2,685 in the previous week and [illegible] in the corresponding week of the past year.

Infantile Mortality.—Three thousand three hundred and ten deaths were registered in the Province amongst infants under one year of age, of which number 1,756 were males and 1,554 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 886 births were registered (464 males and 422 females), giving a birth-rate of 33 per *mille* of population; 827 deaths were registered (438 males and 389 females), giving a death-rate of 31 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 1st May 1894.

W. A. CRAWFORD ROE, F.R. C.S.,
SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

TULSI DAS, *Clerk of Statistics,*

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.

The gauges in use are indicated thus—

b Watson's Improved.

s Symon's Improved.

Stations not thus marked use the old pattern gauge.

Columns 4—10—T=Thunder.

H=Hail.

R=Slight rain not measured.

D=Dust-storm.

WEEKLY RAIN REPORTS RECEIVED TOO LATE FOR INSERTION IN PREVIOUS GAZETTES.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 7th May 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Offg. Sanitary Commissioner, Pu[illegible]

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 7TH APRIL 1894.

General Results.—The total deaths registered from all causes in the Province were 10,925 against [illegible] in the previous week and 8,025 in the corresponding week of the past year, giving respectively [illegible] annual death-rate of 27·7, 28·5 and 20·4 per 1,000 of population. The death-rate was 0·8 per 1,000 [illegible] than that registered last week, but was 4·5 per 1,000 greater than the average rate of the corresponding week of the five years 1888—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 102 deaths were registered against 122 in the previous week and 52 [illegible] corresponding week of the past year.

Fevers.—From fevers there were 7,107 deaths against 7,235 in the previous week and 5,204 in [illegible] corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 181 deaths against 173 in the previous [illegible] and 166 in the corresponding week of the past year.

Chest Disease.—Seven hundred and seventy-three against 974 and 736.

Snake-bite.—Eight against 5 and 2.

Hydrophobia.—Two against 5 and 1.

All other causes.—Two thousand seven hundred and fifty-two against 2,707 in the previous week [illegible] 1,864 in the corresponding week of the past year.

Infantile Mortality.—Three thousand two hundred and thirty-seven deaths were registered in [illegible] Province amongst infants under one year of age, of which number 1,720 were males and 1,517 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 909 births were [illegible] registered (467 males and 442 females), giving a birth-rate of 34 per *mille* of population; 812 deaths [illegible] registered (436 males and 376 females), giving a death-rate of 30 per *mille* of population.

[illegible]ITARY COMMISSIONER'S OFFICE,
LAHORE:
The 7th May 1894.

W. A. CRAWFORD ROE, F.R.C.S.,
SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

MORTUARY RETURN FOR THE MONTH OF MARCH 1894.

Deaths registered from different causes in each District of the Punjab during the month of March 1894.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 8th May 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Sixty-nine thousand two hundred and seventy-six births were registered in the Province during the month of March 1894, giving a birth-rate of 40 per *mille* of population. Of the total number of births 36,722 were boys and 32,554 were girls.

The total number of deaths registered from all causes in the Province during the month of March 1894 was 49,809 against 53,593 in the previous month and 39,749 in the corresponding month of the past year, giving an annual death-rate of 29, 34 and 23 per *mille* of population per annum respectively.

There was not a single death registered under the head of cholera.

From small-pox 412 deaths were registered against 323 in the previous month and 371 in the corresponding month of the past year; fevers 32,349 against 35,894 and 25,623; dysentery and diarrhœa 649 against 548 and 687.

During the month there were 29 deaths registered from suicide against 10 in the past month; wounding 39 against 39; accidents 271 against 210; snake-bite and killed by wild beasts 34 against 26; and from all other causes 16,026 against 16,543 and 12,646 in the corresponding month of the past year.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 8th May 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

Shahpur ...	...	1. Abundant. 2. Good.	Ditto.	Crops being harvested.	Canals flowing.
D. I. Khan ...	...	1. Sufficient. 2. Good.	Rising.	Reapings over. Condition of extra rabi crops is fairly good.	...
Peshawar ...	Slight rainfall.	1. Sufficient. 2. Good.	Fluctuating.	Crops being reaped.	...

GENERAL REMARKS.

Rain has fallen in Delhi, Jullundur, Ferozepore, Amritsar, Ráwalpindi and Pesháwar Districts. Prices unsettled in Pesháwar; rising in Jullundur and Dera Ismail Khan; falling in Ferozepore; stationary elsewhere. Reaping of spring crops nearly over. Threshing operations in progress. Weedings of sugarcane and cotton going on. The outturn of wheat and gram is generally average and that of rape seed below average. Extra spring crops are said to be in good condition. Cattle are generally in good condition. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.*

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.

The gauges in use are indicated thus—

i Watson's Improved.

s Symon's Improved.

Stations not thus marked use the old pattern gauge.

Columns 4—10—T=Thunder.

H=Hail.

R=Slight rain not measured.

D=Dust-storm.

	Phália ...	4·65	0·95	0·95	1·47	7·62	1·47	9·09	
Gujranwala.	Rámnagar ...	3·02	0·38	0·38	0·60	10·20	0·60	10·80	There was a slight fall of rain early in the month in Wazirabad and Gujránwála, which did not affect the crop one way or the other. The weather has been very favourable for harvest operations. Gram, barley and oilseeds have been reaped and garnered. Most of the wheat has now been reaped and harvested; work is being pressed on rapidly. The outturn is on the whole good, though not equal to last year's. The quality of the grain is excellent, except where it was damaged by excess of moisture in low lands. Fodder is plentiful. Prices steady, and there is some prospect of demand for the new wheat for export, otherwise prices will fall very low.
	Wazirabad ...	4·57	0·67	0·67	0·49	10·57	0·49	11·06

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF APRIL 1894—(CONTINUED).

Explanation: (*c*). Canal Rain-gauge Stations.

1	3	4	5	6	7	8	9	10
	RAINFALL.							
	Average rainfall of past years.			*Rainfall of present year.*				
Rain-gauge Stations.	1st October to 31st March.	1st April to 30th April.	For month under report.	Month under report.	1st October 1893 to 31st March 1894.	1st April 1894 to 30th April 1894.	Total.	Condition of crops and health of people.
Swábi ...	5·88	1·35	1·35	1·84	11·52	1·84	13·36	In this month the sowings of sugarcane and cotton have been finished. Extra rabi crops have been sown. In Swábi Tahsíl the tobacco crop has in some places been destroyed by an insect called "Peshai" and land-owners have had therefore to re-sow tobacco. Massoor, linseed and gram crops have been reaped. Wheat and barley crops are being reaped. The outturn is good. The standing crop is in good condition. Fodder abundant. No flood from hill torrents. Sufficient water in canals.
Lahore (Utman Bolak)	6·01	1·49	1·49	1·12	9·91	1·12	11·03

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 15th May 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL[ONEL], *Offg. Sanitary Commissioner, [Punjab].*

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 14TH APRIL 1894.

General Results.—The total deaths registered from all causes in the Province were 11,073 against [...] in the previous week and 7,760 in the corresponding week of the past year, giving respectively [an] annual death-rate of 28·1, 27·7 and 19·7 per 1,000 of population. The death-rate was 0·4 per 1,000 [great]er than that registered last week, and was 4·9 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 116 deaths were registered against 102 in the previous week and 62 [in] the corresponding week of the past year.

Fevers.—From fevers there were 7,184 deaths against 7,107 in the previous week and 4,979 in [the] corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 198 deaths against 181 in the previous [week] and 170 in the corresponding week of the past year.

Chest Disease.—Seven hundred and eighty-seven against 773 and 718.

Snake-bite.—Eight against 8 and 8.

Hydrophobia.—Three against 2 and 1.

All other causes.—Two thousand seven hundred and seventy-seven against 2,758 in the previous week [and] 1,819 in the corresponding week of the past year.

Infantile Mortality.—Three thousand and nineteen deaths were registered in the Province amongst [infa]nts under one year of age, of which number 1,624 were males and 1,395 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 767 births were [regi]stered (398 males and 369 females), giving a birth-rate of 28 per *mille* of population; 918 deaths [we]re registered (489 males and 429 females), giving a death-rate of 34 per *mille* of population.

[SAN]ITARY COMMISSIONER'S OFFICE, LAHORE: *The 15th May 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL, *Offg. Sanitary Commissioner, Punjab.*

SUPPLEMENT TO THE

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, MAY 24, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 22nd MAY 1894.

No.	Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Rabi.	Prospects of Kharif.
1	Hissar ...	0·35 at Hissar. 0·20 in Fatehabad. 0·20 in Sirsa.	1. Sufficient. 2. Good.	Stationary.	Threshing in progress.	...
2	Delhi ...	0·30 at Sadr.	1. Sufficient. 2. Fair.	Ditto.	...	...
3	Umballa ...	...	1. Sufficient.	Ditto.	Threshing in progress.	Heavy fall of hail in part of district caused loss of life.
4	Jullunder ...	0·05 in Nawashahr.	1. Sufficient. 2. Good.	Slightly rising.	Ditto.	Weeding of cotton in progress. Condition of sugarcane average.
5	Ferozepore ...	0·13 in Moga.	1. Sufficient. 2. Good.	Stationary.	Threshing operations going on.	...
6	Amritsar ...	0·25 average.	1. Sufficient.	Rising.	Threshing still in progress. Extra rabi in good condition.	...
7	Siálkot ...	...	1. Sufficient. 2. Good.	Slightly rising.	Threshing going on.	...
8	Lahore ...	...	1. Sufficient. 2. Good.	Stationary.	Gathering of the rabi harvest in progress. The outturn is not as good as expected.	...
9	Mooltan ...	...	1. Sufficient. 2. Good.	Ditto.	Rabi crops being harvested.	Canals flowing.
10	Ráwalpindi ...	0·12 at Ráwalpindi. 0·98 in Pindigheb. 0·36 in Attock. 0·52 in Gujar Khan. 0·94 in Kahúta. 0·62 in Murree.	1. Sufficient. 2. Good.	Ditto.	Rabi being cleaned.	
11	Shahpur ...	Partial rainfall in Bhera.	1. Abundant. 2. Good.	Ditto.	Wheat being harvested.	...
12	D. I. Khan ...	...	1. Sufficient. 2. Good.	Rising.	Condition of extra rabi crops is good.	Preparation of land for Kharif sowing in hand.
13	Peshawar ...	0·40	1. Sufficient. 2. Good.	Falling.	Crops being reaped and cleaned.	...

GENERAL REMARKS.

Rain has fallen in all districts except Umballa, Siálkot, Lahore, Mooltan and Dera Ismail Khan. Prices rising in Julluudur, Amritsar, Siálkot and Dera Ismail Khan; falling in Peshawar; stationary elsewhere. Threshing of spring crops going on. Weeding of cotton in progress. Land is being prepared for the coming autumn. Extra spring crops are said to be in good condition and sugarcane average. Cattle are generally reported to be in good condition. Fodder sufficient throughout the Province.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—T=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 22nd May 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 21ST APRIL 1894.

General Results.—The total deaths registered from all causes in the Province were 11,59[illegible] 11,073 in the previous week and 7,435 in the corresponding week of the past year, giving [illegible] an annual death-rate of 29·4, 28·1 and 18·9 per 1,000 of population. The death-rate was 1·3 [illegible] greater than that registered last week, and was 5·2 per 1,000 greater than the average rate of [illegible] sponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 182 deaths were registered against 116 in the previous week [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 7,595 deaths against 7,184 in the previous week and [illegible] the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 266 deaths against 198 in the [illegible] week and 180 in the corresponding week of the past year.

Chest Disease.—Seven hundred and sixty-six against 787 and 656.

Snake-bite.—Fifteen against 8 and 13.

Hydrophobia.—Two against 3 and 5.

All other causes.—Two thousand seven hundred and seventy-two against 2,777 in the previo[illegible] and 1,750 in the corresponding week of the past year.

Infantile Mortality.—Three thousand one hundred and ninety-four deaths were registered [illegible] Province amongst infants under one year of age, of which number 1,779 were males and 1,415 fema[illegible]

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 874 birth[illegible] registered (436 males and 438 females), giving a birth-rate of 32 per *mille* of population; 8[illegible] were registered (473 males and 424 females), giving a death-rate of 33 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 22nd May 1894.* } W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL, *Offg. Sanitary Commission[illegible]*

GENERAL REMARKS.

Rain has fallen in parts of Hissar, Delhi, Amritsar, Lahore, Shahpur, Dera Ismail Khan and Peshâwar Districts. Prices falling in Umballa, Jullundur,

SUMMARY OF METEOROLOGICAL CONDITIO[NS]

PREVAILING OVER THE PUNJAB DURING

APRIL 1894.

General Summary.—Ordinary hot weather conditions prevailed in the Punjab durin[g the] month of April. They were more strongly marked than usual during the first part of the m[onth,] the mean temperature of the Province being in excess up to the 7th April, when it fell to [about] the normal during the next 4 days, only to increase rapidly on the 12th and 13th. [On the] latter day it was as much as 6·5° in excess. A series of thunder-storms and dust-storm[s with] light and moderate rain caused it to fall very rapidly, and on the 14th it was 4·6° in [defect.] There was thus a large fall of 11° in the mean temperature of the Province in 24 hours. [At the] stations of Siálkot and Cherát the fall amounted to 16°. Temperature continued to [vary] irregularly, but during the remainder of the month it was generally in defect. On three occ[asions] the depression, which is a normal feature of the hot weather in Sind, moved north-eastw[ards over] the Punjab and broke up among the hills, giving dust-storms in the plains and thunder-s[torms at] the hill stations, but on no occasion were there any heavy falls of rain, the heaviest bei[ng the] following reported on the 14th, *viz.*, Cherát 2·00 inches, Murree 1·66 inches, Dera Ismai[l Khan] 1·41 inches, and a few others exceeding one inch. The depression which advanced in[to the] Punjab on the 22nd and 23rd was a deeper depression than either of the others, but th[e rain] it gave rise to was very small in amount, and its influence was chiefly felt in the streng[th] of the winds, especially at the hill stations. At Cherát on the 24th strong north-wester[ly winds] prevailed with an average velocity for the previous 24 hours of 25 miles per hour. Th[e wind] direction at other frontier stations also showed that there was an inflow of cool and [dry] winds from the Afghánistán and Bilúchistán plateau area which caused a moderate de[crease of] temperature and a remarkably large reduction of humidity. The most noteworthy in[stances] of the latter occurred at Peshāwar and Cherát, where the humidity of the air decrease[d from] 85 and 88 per cent. respectively on the 23rd to 14 and 38 per cent. on the 24th.

Barometer and Winds.—The mean pressure of the month varied but little fr[om the] normal. It was in defect at all stations except at Simla, where it was normal, being [slightly] in excess. The defect was greatest at Mooltan. Winds during the month were nearl[y normal] in strength, though at a few stations they were stronger than usual, but in direction th[ey were] somewhat irregular, especially at Simla, where the prevailing direction was nearly opp[osite to] the one usually obtaining in April. At some other stations they were more sou[th-]easterly than usual.

Temperature.—The following table gives (1) the variation from the normal mean temperature of the Punjab for each day of the month, and (2) the highest [maximum] temperature registered in the Province on each day, with the name of the station at which it was registered :—

Date.	Temperature variation of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.	Date.	Temperature variation of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.
April 1st ...	+ 4·0°	102·8°	Sirsa.	April 16th ...	− 1·6°	99·8°	Sirsa.
" 2nd ...	+ 4·8°	105·9°	Montgomery.	" 17th ...	− 4·3°	97·8°	Mooltan.
" 3rd ...	+ 6·9°	105·3°	Sirsa.	" 18th ...	− 4·1°	102·9°	Sirsa.
" 4th ...	+ 6·1°	105·8°	Do.	" 19th ...	− 1·0°	101·4°	Do.
" 5th ...	+ 6·3°	104·3°	Do.	" 20th ...	− 2·1°	105·4°	Montgomery.
" 6th ...	+ 0·8°	102·3°	Do.	" 21st ...	− 0·1°	109·4°	Sirsa.
" 7th ...	+ 0·1°	99·3°	Do.	" 22nd ...	+ 1·8°	112·4°	Do.
" 8th ...	− 1·7°	96·3°	Do.	" 23rd ...	+ 3·3°	109·4°	Do.
" 9th ...	− 3·1°	97·3°	Mooltan.	" 24th ...	− 0·5°	101·0°	Umballa.
" 10th ...	− 2·6°	100·3°	Sirsa.	" 25th ...	− 5·2°	102·4°	Sirsa.
" 11th ...	− 0·7°	104·3°	Do.	" 26th ...	− 3·6°	104·4°	Do.
" 12th ...	+ 2·5°	107·3°	Do.	" 27th ...	− 3·4°	105·9°	Sirsa & Montgomery.
" 13th ...	+ 6·5°	106·8°	Do.	" 28th ...	− 2·4°	105·4°	Sirsa.
" 14th ...	− 4·6°	100·3°	Do.	" 29th ...	− 2·1°	100·4°	Mooltan.
" 15th ...	− 4·2°	101·3°	Do.	" 30th ...	+ 0·4°	110·4°	Sirsa & Montgomery.

It will be seen from the above that the mean temperature of the Punjab was largely in excess during the first part of the month, the excess amounting to as much as 7° on the 3rd and continuing above 6° till the 6th, when it decreased to about the normal. During the rest of the month it was generally below the normal, the largest defect occurring on the 25th. The changes from day to day were often large, as for example on the 14th, when the mean temperature variation from the normal changed as much as 11°. The highest maximum temperature in the Province was on most days registered at Sirsa, at which station the mean maximum temperature for the month was 103°, or 3° above the normal. At most of the other stations it was in defect.

Humidity and Cloud.—At most stations the mean humidity of the month was less than usual. At Simla and Murree, however, it was slightly above the normal. There was very little cloud in the Punjab during the month.

Rainfall was very small in amount and varied very little from the normal. The only station that received no rain during the month was Ludhiána.

Snowfall.—The Superintendent of the Kyelang Observatory in Lahul states that the snowfall of the past winter was somewhat less than that of the previous winter, but considerably above the normal. The snowfall on the higher elevations has almost certainly been much heavier, and the accumulation of snow on all the passes in Lahul was considerable. Snow was lying in the fields 4 feet deep on the 10th April when the report was written.

The Reverend T. Schreve writing from Poo in the Upper Sutlej Valley states that the past winter has been exceptionally severe and the snowfall abnormally heavy, and that the natives of the Upper Sutlej Valley say they never remember such heavy snowfalls as have occurred during the past two winters.

The Deputy Conservator of Forests, Chamba, reports that the accumulation of snow on the 15th April was considerable and in ravines appeared to be much larger than usual, masses of snow remaining unmelted in the ravines down to 6,000 feet. Further in the interior to the west and north the snowfall of the past winter is said to have been heavier than even the exceptionally heavy fall of 1890-91.

The Agency Surgeon, Gilgit, states that the snowfall on the neighbouring hills was less than usual in November and December, and that in January, February and March it was considerably above the average. The total snowfall of the past winter was thus heavier than usual, and the inhabitants of the district are in consequence anticipating an unusually good harvest.

The following tables give (1) a summary of the meteorological conditions prevailing in the Punjab in April 1894 and (2) the rainfall data for the month :—

A.

SANITARY COMMISSIONER'S OFFICE,
LAHORE;
The 29th May 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 28TH APRIL 1894.

General Results.—The total deaths registered from all causes in the Province were 11,814 against 11,599 in the previous week and 7,339 in the corresponding week of the past year, giving respectively an annual death-rate of 30·0, 29·4 and 18·6 per 1,000 of population. The death-rate was 0·6 per mille greater than that registered last week, and was 4·7 per 1,000 greater than the average rate of the corresponding week of the five years 1889–1893.

Cholera.—There was one death registered under the head of cholera; it occurred in the Municipal town of Rúpar, in the Umballa District.

Small-pox.—From small-pox 165 deaths were registered against 182 in the previous week and ... in the corresponding week of the past year.

Fevers.—From fevers there were 7,818 deaths against 7,596 in the previous week and 4,5.. in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 302 deaths against 266 in the previous week and 192 in the corresponding week of the past year.

Chest Disease.—Eight hundred and nine against 766 and 618.

Snake-bite.—Six against 15 and 17.

Hydrophobia.—Three against 2 and 3.

All other causes.—Two thousand seven hundred and twenty against 2,772 in the previous week and 1,758 in the corresponding week of the past year.

Infantile Mortality.—Three thousand two hundred and eighty-three deaths were registered in the Province amongst infants under one year of age, of which number 1,772 were males and 1,511 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 880 births were registered (465 males and 415 females), giving a birth-rate of 32 per *mille* of population; 982 deaths were registered (540 males and 442 females), giving a death-rate of 36 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 29th May 1894.

W. A. CRAWFORD ROE, F.R.C.S.,
SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

NORTH-WESTERN RAILWAY.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 1st June 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 5TH MAY 1894.

General Results.—The total deaths registered from all causes in the Province were 13,673 against [illegible] in the previous week and 8,398 in the corresponding week of the past year, giving respectively [an annual] death-rate of 34·7, 30·0 and 21·3 per 1,000 of population. The death-rate was 4·7 per 1,000 [greater] than that registered last week, and 6·0 per 1,000 greater than the average rate of the corresponding week of the five years 1889–1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 218 deaths were registered against 165 in the previous week and 78 in the corresponding week of the past year.

Fevers.—From fevers there were 9,084 deaths against 7,818 in the previous week and 5,533 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 350 deaths against 302 in the previous [week] and 262 in the corresponding week of the past year.

Chest Disease.—Eight hundred and sixty-seven against 809 and 685.

Snake-bite.—Eight against 6 and 4.

Hydrophobia.—Four against 3 and 4.

All other causes.—Three thousand one hundred and forty-two against 2,720 in the previous [week] and 1,811 in the corresponding week of the past year.

Infantile Mortality.—Three thousand eight hundred and eighty-four deaths were registered in the [Province] amongst infants under one year of age, of which number 2,127 were males and 1,757 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 853 births were [registered] (438 males and 415 females), giving a birth-rate of 31 per *mille* of population; 1,046 deaths [were] registered (524 males and 522 females), giving a death-rate of 39 per *mille* of population.

[SAN]ITARY COMMISSIONER'S OFFICE,
LAHORE:
The 1st June 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Offg. Sanitary Commissioner, Punjab.

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF MAY 1894—(CONTINUED).

Explanation :—(*c*) Canal Rain-gauge Station.

1 District.	Rain-gauge Stations.	3 Rainfall: Average rainfall of past years: 1st October to 31st March.	4 Average: 1st April to 31st May.	5 Average: For month under report.	6 Rainfall of present year: Month under report.	7 1st October 1893 to 31st March 1894.	8 1st April 1894 to 31st May 1894.	9 Total.	10 Condition of crops and health of people.
	Pánipat ...	2.49	0.85	0.47	0.06	4.87	0.06	4.93	Rabi has been cut. Outturn is average. Health of people good Cotton and indigo is being sown in some places with canal water.
	Karnal ...	4.62	1.63	1.06	0.74	7.93	0.74	8.67	
	Rajaund ...	...	...	...	...	3.80	...	3.80	
	Kaithal ...	2.36	0.68	0.45	...	4.95	0.41	5.36	
	Gulah ...	...	...	...	0.50	4.48	0.50	4.98	
	Pipli ...	3.29	0.88	0.70	0.20	6.22	0.20	6.42	The outturn of the rabi harvest has been decidedly disappointing. The ears appear to have been much thinner than usual, and anticipations expressed last month were by no means fulfilled. There has been hail in the Pipli Tahsíl which killed several human beings and cattle; but the crops having been cut, the damage done was slight. There was very little rain during the month. Sugarcane in good condition so far.
	Jagádhri ...	5.61	1.29	0.84	0.28	7.41	0.28	7.69

...ARY COMMISSIONER'S OFFICE, LAHORE: The 8th June 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,

Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 12TH MAY 1894.

General Results.—The total deaths registered from all causes in the Province were 13,83[illegible] against 13,673 in the previous week and 9,824 in the corresponding week of the past year, giving respectively an annual death-rate of 35·1, 34·7 and 24·9 per 1,000 of population. The death-rate was 0·4 per 1,000 greater than that registered last week, and was 5·8 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There were 9 deaths registered under the head of cholera, *viz.*, 1 in the Mehrauli [illegible] Station District Delhi, 4 in the Sirhali Police Station, District Amritsar, and 4 in the Batala Police [illegible] District Gurdaspur.

Small-pox.—From small-pox 226 deaths were registered against 218 in the previous week [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 9,271 deaths against 9,084 in the previous week and [illegible] the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 383 deaths against 359 in the previous week and 338 in the corresponding week of the past year.

Chest Disease.—Eight hundred and forty-five against 867 and 735.

Snake-bite.—Six against 8 and 8.

Hydrophobia.—Two against 4 and 3.

All other causes.—Three thousand one hundred and ten against 3,142 in the previous [illegible] and 2,070 in the corresponding week of the past year.

Infantile Mortality.—Three thousand eight hundred and ninety-one deaths were registered [illegible] Province amongst infants under one year of age, of which number 2,171 were males and 1,720 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 804 births [illegible] registered (428 males and 376 females), giving a birth-rate of 30 per *mille* of population; 1,073 [illegible] were registered (584 males and 489 females), giving a death-rate of 40 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 8th June 1894.

W. A. CRAWFORD ROE, F.R.C.S., Sub-[illegible]
Offg. Sanitary Commissioner.

13	Peshawar ...	Slight rainfall.	1. Sufficient. 2. Good.	Continue low.	...	Extra rabi crops in good condition.

GENERAL REMARKS.

Rain fell all over the Province. Prices rising in Delhi; normal in Dera Ismail Khan; continue high in Umballa and Ráwalpindi, normal in Hissar, [Jul]lundur and Sialkot and low elsewhere. Harvesting of spring crops nearly over. Ploughings and sowings of autumn crops commenced. Irrigation of sugar[cane] and cotton in progress. Extra spring crops in good condition. Prospects of autumn crops good. Slight hail fell in parts of Dera Ismail Khan but no [d]amage has been caused. Cattle are said to be in good condition. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 16th June 1894.

W. A. CRAWFORD ROE, F.R.C.S., Surgeon-L[t.-Col.],
Offg. Sanitary Comm[issioner, Punjab].

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 19TH MAY 1894.

General Results.—The total deaths registered from all causes in the Province were 14,657 against [illegible] in the previous week and 9,841 in the corresponding week of the past year, giving respectively [an] annual death-rate of 37·2, 35·1 and 25·0 per 1,000 of population. The death-rate was 2·1 per 1,000 [grea]ter than that registered last week, and was 6·0 per 1,000 greater than the average rate of the corre[spo]nding week of the five years 1889—1894.

Cholera.—There were 29 deaths registered under the head of cholera, *viz.*, 2 in Patti Police [Sta]tion, District Lahore; 23 in Sirhâli Police Station, District Amritsar; and 4 in Batála Police Station, [Dist]rict Gurdáspur.

Small-pox.—From small-pox 243 deaths were registered, against 226 in the previous week and 118 [in] the corresponding week of the past year.

Fevers.—From fevers there were 9,822 deaths, against 9,271 in the previous week and 6,524 in [the] corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 433 deaths, against 383 in the previous [wee]k and 372 in the corresponding week of the past year.

Chest Disease.—Eight hundred and forty-six against 845 and 808.

Snake-bite.—Twelve against 6 and 11.

Hydrophobia.—Two against 2 and 1.

All other causes.—Three thousand two hundred and seventy against 3,111 in the previous week [an]d 1,926 in the corresponding week of the past year.

Infantile Mortality.—Four thousand and seventy-five deaths were registered in the Province [amo]ngst infants under one year of age, of which number 2,213 were males and 1,862 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 875 births were [reg]istered (478 males and 397 females), giving a birth-rate of 32 per *mille* of population; 1,172 deaths [we]re registered (628 males and 544 females), giving a death-rate of 43 per *mille* of population.

[SA]NITARY COMMISSIONER'S OFFICE,
LAHORE:
The 16th June 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Offg. Sanitary Commissioner, Punjab.

MORTUARY RETURN FOR THE MONTH OF APRIL 1894.

Deaths registered from different causes in each District of the Punjab during the month of April 1894.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 13th June 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Fifty-nine thousand three hundred and twenty births were registered in the Province during the month of April 1894, giving a birth-rate of 35 per *mille* of population. Of the total number births 31,345 were boys and 27,975 were girls.

The total number of deaths registered from all causes in the Province during the month April 1894 was 49,791 against 49,809 in the previous month and 33,094 in the corresponding month of the past year, giving an annual death-rate of 29, 29 and 20 per *mille* of population per annum respectively.

There was only one death registered under the head of cholera.

From small-pox 660 deaths were registered against 412 in the previous month and 286 in the corresponding month of the past year; fevers 32,629 against 32,349 and 21,244; dysentery and diarrhoea 1,048 against 649 and 783.

During the month there were 33 deaths registered from suicide against 29 in the past month; wounding 57 against 39; accidents 362 against 271; snake-bite and killed by wild beasts 54 against 34; and from all other causes 14,947 against 16,026 and 10,093 in the corresponding month of the past year.

SUPPLEMENT TO THE

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, JUNE 28, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 26th JUNE 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ...	0·23 at Hissar. 0·40 in Hansi. 0·71 in Bhiwáni 0·48 in Fatahábad. 0·47 in Sirsa.	1. Sufficient. 2. Good.	Slightly rising.	...	Ploughing commenced.
Delhi ...	0·69 at Sadr. 0·17 in Balabgarh 0·87 in Sonepat.	1. Sufficient. 2. Good.	Continue high.	...	...
Umballa ...	...	1. Sufficient. 2. Good.	Ditto.	Sowings commenced. Recent rains being favourable.	...
Jullundur ...	14·05 at Sadr.	1. Sufficient. 2. Good.	Falling.	Ploughings commenced.	...
Ferozepore ...	8·32 at Sadr. 11·96 in City. 13·16 in Moga. 13·41 in Zira. 3·56 in Muktsar. 3·80 in Fazilka. 7·31 in Nathána 6·50 in Jalálabad.	1. Sufficient.	Continue low.	...	...
Amritsar ...	8·59 average.	1. Sufficient.	Ditto.	Condition of crops good.	...
Siálkot ...	...	1. Sufficient. 2. Good.	Falling.	Prospects good.	...
Lahore ...	1·64 at Sadr.	1. Sufficient. 2. Good.	Continue low.	The land is being prepared for kharif crops. Jowár, til, and other crops are being irrigated.	Great damage done to the crops of villages on the banks of the Rávi owing to heavy flood.
Mooltan ...	0·01 at Sadr. 0·09 in Shujabad. 0·03 in Kabirwala.	1. Sufficient. 2. Good.	Rising.	Canals flowing.	Crops being harvested.
Rawalpindi ...	1·75 in Rawalpindi. 0·14 in Pindigheb. 3·61 in Gujar Khan 4·27 in Kahuta 3·80 in Murree.	1. Sufficient. 2. Good.	Continue high.	Crops appear average.	Crops being gleaned.
Shahpur ...	Rainfall throughout.	1. Sufficient.	Continue low.	Cotton sowings finished.	...
D. I. Khan ...	1·11 at Sadr. 0·02 in Tank.	1. Sufficient.	Continue normal.	River in flood and rising.	Condition of extra rabi crops good, but in one tahsil an insect is causing much damage.
Peshawar ...	...	1. Sufficient. 2. Good.	Continue low.	...	Prospects of extra rabi crops are good.

GENERAL REMARKS.

Rain has fallen in all districts except Umballa, Siálkot and Peshawar. Prices rising in Hissar and Mooltan; falling in Jullundur and Siálkot; continue ... in Delhi, Umballa and Rawalpindi; low in Ferozepore, Amritsar, Lahore, Shahpur and Peshawar and normal in Dera Ismail Khan. Spring crops ... Ploughings and sowings of autumn crops commenced. Standing crops are in good condition and their prospects are said to be good to average. ... is beneficial. Crops on the banks of the Rávi are greatly damaged by the recent heavy floods. The Indus in Dera Ismail Khan is also in flood. ... "Machhal" (cricket of the genus gryllodes) is causing much damage in parts of Dera Ismail Khan. Cattle are generally in good condition ... throughout the Province.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 21st June 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Offg. Sanitary Commissioner,

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 26TH MAY 1894.

General Results.—The total deaths registered from all causes in the Province were 14,323 against 14,657 in the previous week and 10,379 in the corresponding week of the past year, giving respectively an annual death-rate of 36·3, 37·2 and 26·3 per 1,000 of population. The death-rate was 0·9 per 1,000 less than that registered last week, but was 2·9 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There were 6 deaths registered under the head of cholera, *viz.*, 4 in Patti Police Station, District Lahore; 1 in Municipal town of Amritsar; and 1 in Batála Police Station, District Gurdáspur.

Small-pox.—From small-pox 273 deaths were registered, against 243 in the previous week and 110 in the corresponding week of the past year.

Fevers.—From fevers there were 9,631 deaths, against 9,822 in the previous week and 6,888 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 421 deaths, against 433 in the previous week and 411 in the corresponding week of the past year.

Chest Disease.—Seven hundred and twenty against 846 and 807.

Snake-bite.—Nine against 12 and 15.

Hydrophobia.—Three against 2 and 5.

All other causes.—Three thousand two hundred and sixty against 3,270 in the previous week and 2,081 in the corresponding week of the past year.

Infantile Mortality.—Three thousand nine hundred and fourteen deaths were registered in the Province amongst infants under one year of age, of which number 2,202 were males and 1,712 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 852 births were registered (459 males and 393 females), giving a birth-rate of 31 per *mille* of population; 1,169 deaths were registered (635 males and 534 females), giving a death-rate of 43 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 21st June 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Offg. Sanitary Commissioner, Punjab.

LAHORE, THURSDAY, JULY 5, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 3rd JULY 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
…ssar …	0·57 at Sadr. 1·24 in Hánsi. 3·37 in Bhiwáni. 2·13 in Fatahabad. 1·48 in Sirsa.	1. Sufficient. 2. Good.	Continue rising.	Sowings commenced.	…
…lhi …	0·52 at Delhi. 0·64 in Sonepat. 0·40 in Ballabgarh.	1. Sufficient. 2. Good.	Falling.	Sowings in progress.	…
…mballa …	1·94	1. Sufficient.	Continue high.	Ditto.	…
…ullundur …	6·42 at Sadr.	1. Sufficient. 2. Good.	Continue low.	Ploughing commenced.	…
…ozepore …	1·67 at Sadr. 1·80 in City. 3·91 in Moga. 2·41 in Zira. 2·10 in Muktsar. 1·95 in Fázilka. 2·68 in Jalálabad.	1. Sufficient.	Ditto.	…	…
…ritsar …	1·33 average.	1. Sufficient. 2. Good.	Ditto.	Condition of crops good.	…
…lkot …	Rainfall throughout.	1. Sufficient. 2. Good.	Ditto.	Prospects good.	…
…ahore …	2·30 at Lahore.	1. Sufficient. 2. Good.	Ditto.	Ploughings and sowings of kharif crops in progress.	…
…ooltan …	0·09 at Mooltan.	1. Sufficient.	Falling.	Canals flowing.	Rabi being harvested.
…walpindi …	0·34 at Ráwalpindi. 2·87 in Pindigheb. 0·05 in Fatahjang. 0·60 in Attock. 0·15 in Gujar Khan 0·35 in Kahúta. 0·90 in Murree.	1. Sufficient. 2. Good.	Continue rising.	Sowings of kharif crops commenced. Crops whatever sown appear average.	Crops being gleaned.
…hahpur …	Rainfall throughout.	1. Abundant. 2. Good.	Rising.	Crops being sown. Rain wanted.	…
…I. Khan …	0·22 in Tánk. 1·25 in Leiah.	1. Sufficient.	Ditto.	…	Extra rabi crops in good condition.
…shawar …	0·03	1. Sufficient. 2. Good.	Ditto.	…	Ditto.

GENERAL REMARKS.

…fallen all over the Province. Prices falling in Delhi and Mooltan; rising in Hissar, Ráwalpindi, Shahpur, Dera Ismail Khan and Peshávar; … in Umballa; and low elsewhere. Threshing of spring crops nearly over. Ploughings and sowings of autumn crops in progress. More rain wanted … Extra spring crops in good condition. Prospects of standing autumn crops are generally reported good. Cattle are said to be in good condition. … throughout the Province.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*T*=Thunder.
R=Slight rain not measured.

NOTE.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 3rd July 1894.* — W. A. CRAWFORD ROE, F.R.C.S., Surgeon-Lt.-Col., *Offg. Sanitary Commissioner*

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 2ND JUNE 1894.

General Results.—The total deaths registered from all causes in the Province were 14,419 against 14,323 in the previous week and 10,161 in the corresponding week of the past year, giving respectively an annual death-rate of 36·6, 36·3 and 25·8 per 1,000 of population. The death-rate was 0·3 per 1,000 greater than that registered last week, and was 3·9 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There were 9 deaths registered under the head of cholera, *viz.*, 1 in the Municipal town and 8 in the rural Circle of Patti, District Lahore.

Small-pox.—From small-pox 293 deaths were registered, against 270 in the previous week and 112 in the corresponding week of the past year.

Fevers.—From fevers there were 9,451 deaths, against 9,631 in the previous week and 6,665 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 453 deaths, against 421 in the previous week and 415 in the corresponding week of the past year.

Chest Disease.—Seven hundred and thirty-nine against 720 and 746.

Snake-bite.—Sixteen against 9 and 21.

Hydrophobia.—Two against 3 and 3.

All other causes.—Three thousand four hundred and fifty-six against 3,263 in the previous week and 2,053 in the corresponding week of the past year.

Infantile Mortality.—Four thousand three hundred and forty-three deaths were registered in the Province amongst infants under one year of age, of which number 2,395 were males and 1,948 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 916 births were registered (475 males and 441 females), giving a birth-rate of 34 per *mille* of population; 1,277 deaths were registered (636 males and 641 females), giving a death-rate of 47 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 3rd July 1894.* — W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL., *Offg. Sanitary Commissioner, Punjab.*

Shahpur ...	Slight rain fell in the Bhera and Khushāb Tahsils.	1. Abundant.	Continue low.	Crops in good condition.	...
D. I. Khan ...	0·45 in Kulāchi. 0·15 in Bhakkar. 0·66 in Sheikh Budin.	1. Sufficient. 2. Good.	Continue rising.	Condition of cotton is good. Ploughings for kharif sowings taken in hand in certain places.	Extra rabi crops in good condition.
Peshawar ...	1·12	1. Sufficient. 2. Good.	Continue high.	...	Ditto.

GENERAL REMARKS.

Rain fell all over the Province. Prices continue high in Umballa and Peshāwar; rising in Hissar, Rāwalpindi, Mooltan and Dera Ismail Khan; and low elsewhere. Ploughings and sowings of autumn crops in progress. Harvesting of past spring crops still going on in Mooltan. Standing autumn and extra rabi crops reported to be generally in good condition. Cattle said to be in good condition. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.,*

Office of Director of Land Records and Agriculture, Punjab.

SUMMARY OF METEOROLOGICAL CONDIT[IONS]

PREVAILING OVER THE PUNJAB DURIN[G]

MAY 1894.

General Summary.—Strongly marked hot weather conditions prevailed in th[e] during the month of May. Temperature was largely in excess of the normal, especially temperatures, which ranged from 6° to 8° above the normal of the day at many station highest temperatures were reported from Sirsa, Montgomery and Mooltan, Montgomery ing a maximum temperature of 116·9° on the 28th, which was the highest reached d[uring the] month. Very little rain fell during the month, and what did fall was mostly local in ch[aracter] chiefly accompanying duststorms in the plains and thunderstorms in the hills. R[ain was] most general on the 15th and 16th, but the falls were in all cases light and of little imp[ortance.] The most noteworthy feature of the meteorology of the month was, however, the excep[tionally] large fall of the barometer, which took place on the 8th, over the whole of Northern Ind[ia] to the effects of high temperature shown in an upward expansional movement of the atmo[sphere.] The fall was not so great at the hill stations, but in the Punjab plains it ranged from [...] Delhi to ·231″ at Dera Ismail Khan, and was the largest fall of its kind that has occ[urred in] several years. It caused no disturbance in the weather beyond producing very strong winds in Northern and Central India, due to the abnormally steep barometric gradients corresponding increase of temperature and decrease of humidity. The abnormal d[istribution] of pressure thus introduced was more or less persistent throughout the month, and th[e] pressure for the month in the Punjab was hence in slight to moderate defect at all the defect being least at the hill stations, as would be expected from the cau[se which] originally produced it.

Barometer and Winds.—As already stated, the mean pressure of the mo[nth was in] defect at all stations. In the plains the defect ranged from —·037″ at Peshâwar to — Ismail Khan. At the hill stations the defect was but small, being only —·016 at M[urree and] —·017 at Simla. Winds were stronger than usual, especially at Cherát, where the m[ean] velocity for the month was 12 miles per hour, and they were unusually northerly in at the hill stations. In the plains winds varied considerably from the normal d[irection at] many stations, especially at Ludhiána, Ráwalpindi and Peshâwar.

Temperature.—The following table gives (1) the variation from the normal of the [me]an temperature of the Punjab for the 24 hour period ending at 8 A. M. of each day of the [m]onth, and (2) the highest maximum temperature registered in the Province on each day, with [t]he name of the station at which it was registered :—

Date.	Mean temperature variation of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.	Date.	Mean temperature variation of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.

" 11th ...	+ 2·8°	111·4°	Do.	" 27th ...	+ 3·8°	115·4°	Sirsa.
" 12th ...	+ 2·0°	108·4°	Do.	" 28th ...	+ 1·8°	116·9°	Montgomery.
" 13th ...	+ 1·9°	109·4°	Sirsa and Mooltan.	" 29th ...	+ 3·7°	115·9°	Do.
" 14th ...	+ 4·6°	109·4°	Sirsa.	" 30th ...	+ 4.9°	111 ·9°	Umballa.
" 15th ...	+ 4·6°	107·4°	Mooltan.	" 31st ...	+ 0·2°	113·4°	Sirsa.
" 16th ...	+ 1·6°	107 4°	Sirsa.				

[Un]usually high temperatures were registered in the Punjab during May. The highest maxi[mu]m temperatures were recorded generally by the three stations of Sirsa, Montgomery and [Mo]oltan, Montgomery recording the highest on the 28th, *viz.*, 116·9°. The mean temperature [of] the Punjab was in excess of the normal on every day of the month. The excess was smallest [on] the 5th, 6th, 18th and 31st, when temperature was almost normal, and greatest on the 2nd, 3rd [an]d 10th, when temperature was 6° and 7° higher than the normal temperature of the day. The [me]an maximum or day temperatures and the mean minimum or night temperatures were both

in excess of the normal, and by about the same amounts. The temperatures recorded at Ráwal-pindi are in marked contrast to those at all other stations, which is probably due to an alteration in the surroundings of the observatory, trees and shrubs having been planted in the immediate vicinity and copiously watered, which necessarily reduces the temperature in the neighbourhood of the shed considerably, especially in the hot weather.

Humidity and Cloud.—The air was drier than usual at several stations, and very low humidities were recorded at Khusháb, where the mean 8 A. M. percentage of saturation for the whole month was only 24. Skies were unusually clear, and at all stations the amount of cloud was below the normal.

Rain.—There was hardly any rain during the month, and at most stations the amounts recorded were below the usual amount received in May. The only stations which received a slight excess of the normal fall were Pesháwar, Umballa and Delhi. The largest amount recorded at any one station during the month was 3·17 inches at Simla. Only four other stations received more than one inch.

The following tables give (A) a summary of the meteorological conditions prevailing in the Punjab in May 1894, and (B) the rainfall data for the month :—

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF JUNE 1894—(CONTINUED).

Explanation :—(c) Canal Rain-gauge Station.

1	2	3	4	5	6	7	8	9	10
		Rainfall.							
		Average rainfall of past years.			Rainfall of present year.				
	Rain-gauge Stations.	1st October to 31st March.	1st April to 30th June.	For month under report.	Month under report.	1st October 1893 to 31st March 1894.	1st April 1894 to 30th June 1894.	Total.	Condition of crops and health of people.
	Pánipat ..	2·49	3·32	2·47	2·21	4·87	2·27	7·14	Rainfall was plenty and in time. Kharif sowings have commenced. Locusts appeared in some villages of the Pánipat Tahsíl, but did not alight or cause any damage.
	Karnal ..	4·02	5·74	4·11	6·83	7·93	7·57	15·50	
	[illegible]aund ..	...	...	...	4·30	3·80	4·30	8·10	
	Kaithal ..	2·36	3·21	2·53	6·10	4·95	6·60	11·55	
	Gulah ..	...	...	...	9·02	4·48	9·52	14·00	
	Pipli ..	3·29	3·82	2·94	2·39	6·22	2·59	8·81	Kharif ploughings and sowings were in progress throughout the district in the second half of the month. Some little difficulty in raising cash for the rabi instalment of land revenue is represented to have existed owing to the low price of grain. Health of people good.
	Jagádhri ..	5·61	5·75	4·46	4·01	7·11	4·29	11·70	
	Umballa ...	3·93	5·38	3·86	10·06	6·72	11·15	17·87

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,

Offg. Sanitary Commissioner, Punjab.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 3rd July 1894.*

Remarks by the Sanitary Commissioner, Punjab.

Sixty-two thousand eight hundred births were registered in the Province during the May 1894, giving a birth-rate of 36 per *mille* of population. Of the total number of birth were boys and 29,559 were girls.

The total number of deaths registered from all causes in the Province during the May 1894 was 62,758 against 49,791 in the previous month and 43,205 in the correspondin of the past year, giving an annual death-rate of 36, 29 and 25 per *mille* of population per annu tively.

There were 50 deaths registered under the head of cholera, against 1 in the previous month.

From small-pox 1,106 deaths were registered against 660 in the previous month and 438 in the sponding month of the past year; fevers 41,800 against 32,629 and 28,624; dysentery and 1,841 against 1,048 and 1,586.

During the month there were 43 deaths registered from suicide against 33 in the past wounding 60 against 57; accidents 470 against 362; snake-bite and killed by wild beasts 54; and from all other causes 17,319 against 14,947 and 11,499 in the corresponding month of the year.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 3rd July* 1894. — W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL, *Offg. Sanitary Commissioner, Punjab.*

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 7th July 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 9TH JUNE 1894.

General Results.—The total deaths registered from all causes in the Province were [illegible] 14,419 in the previous week and 9,574 in the corresponding week of the past year, giving [illegible] an annual death-rate of 35·1, 36·6 and 24·3 per 1,000 of population. The death-rate was [illegible] less than that registered last week, but was 2·3 per 1,000 greater than the average rate of [illegible] sponding week of the five years 1889—1893.

Cholera.—There were 15 deaths registered under the head of cholera, against 9 in [illegible] week. The following statement gives the localities in which these deaths occurred :—

Districts.	Towns and Rural Circles.	Deaths.	Remarks.
Lahore	Patti Town	8	
Do.	Rural Circle	3	
Amritsar	Tarn Taran Town	1	
Do.	Rural Circle	3	
	Total ...	15	

Small-pox.—From small-pox 261 deaths were registered against 293 in the previous week [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 9,012 deaths against 9,451 in the previous week and [illegible] the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 382 deaths against 453 in the [illegible] week and 395 in the corresponding week of the past year.

Chest Disease.—Seven hundred and seven against 739 and 714.

Snake-bite.—Twenty-one against 16 and 11.

Hydrophobia.—Three against 2 and 2.

All other causes.—Three thousand four hundred and twenty against 3,456 in the previous [illegible] and 1,944 in the corresponding week of the past year.

Infantile Mortality.—Four thousand and seventeen deaths were registered in the [illegible] amongst infants under one year of age, of which number 2,197 were males and 1,820 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 891 births [illegible] registered (475 males and 416 females), giving a birth-rate of 33 per *mille* of population; 1,276 [illegible] were registered (640 males and 636 females), giving a death-rate of 47 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 7th July 1894.

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, JULY 19, 1894.

PART I.

STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 17th JULY 1894.

No.	Reporting Station.	Rain	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
1	Hissar ...	0·47 at Hissar. 0·30 in Hánsi. 0·11 in Bhiwáni. 0·31 in Fatahabad. 0·31 in Sirsa.	1. Sufficient. 2. Good.	Continue high.	Sowings in progress.	...
2	Delhi ...	0·13 at Sadr. 1·33 in Sonepat. 0·87 in Ballabgarh.	1. Sufficient. 2. Fair.	Continue low.	Ditto.	...
3	Umballa ...	...	1. Sufficient. 2. Fair.	Falling.	Ditto.	...
4	Jullundur ...	0·85 at Sadr.	1. Sufficient. 2. Good.	Continue low.	Sowings commenced.	Standing crops average.
5	Ferozepore ...	3·81 at Sadr. 6·01 in City. 1·71 in Moga. 4·01 in Muktsar. 1·54 in Fazilka. 2·53 in Jalálabad.	1. Sufficient.	Rising.	Good. Locusts appeared but did no damage.	...
6	Amritsar ...	1·78 average.	1. Sufficient. 2. Good.	Continue low.	Good.	Poppy crops harvested.
7	Sialkot ...	Rainfall throughout.	1. Sufficient. 2. Good.	Ditto.	Good. Sowings in progress.	...
8	Lahore ...	1·79 at Sadr.	1. Sufficient. 2. Good.	Ditto.	Sowings in progress. Rice and cotton being irrigated.	...
9	Mooltan ...	1·24 at Mooltan. 1·25 in Mailsi. 0·68 in Lodhran. 0·43 in Saujabad. 2·15 in Kabirwála.	1. Sufficient. 2. Good.	Continue high.	Good. Canals flowing.	Crops being harvested.
10	Rawalpindi ...	1·63 at Rawalpindi. 1·03 in Pindigheb. 1·63 in Attock. 1·10 in Fatah Jang. 2·74 in Kahúta. 5·94 in Murree.	1. Sufficient. 2. Good.	Ditto.	Crops sown appear average.	...
11	Shahpur ...	Rainfall throughout.	1. Abundant. 2. Good.	Rising.	Good. Sowings in progress. Crops already sown in good condition.	...
12	D. I. Khan ...	3·82 at Sadr. 2·72 in Tank. 3·12 in Kaláchi. 3·05 in Bhakkar. 2·76 in Leah. 4·07 in Sheikh Budin.	1. Sufficient. 2. Good.	Continue high.	Good. Crops benefited by the recent rain. Melon crop slightly damaged.	...
13	Peshawar ...	0·11	1. Sufficient. 2. Good.	Falling.	...	Extra rabi crops in good condition.

GENERAL REMARKS.

Rain has fallen in all districts except Umballa. Prices rising in Ferozepore and Shahpur; falling in Umballa and Peshawar; continue high in Hissar, Mooltan, Rawalpindi, and Dera Ismail Khan; continue low elsewhere. Sowings of autumn crops in progress. Prospects of the autumn crops are generally reported good except in Rawalpindi where it appears to be average. Recent rains have benefited the crops in Dera Ismail Khan. Locusts appeared in part of Ferozepore but did no damage. Melon crop slightly damaged by rain in Dera Ismail Khan. Cattle are generally reported in good condition. Fodder sufficient throughout the Province. The agricultural position is good. Spring harvest was excellent; stocks are large, grain is cheap. No difficulties or distress is anticipated in any district. Monsoon rains have been general and prospects of the autumn crops are good.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*T*=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

[illegible]—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

[illegible]Y COMMISSIONER'S OFFICE,
LAHORE:
The 11th July 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Offg. Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 16TH JUNE 1894.

General Results.—The total deaths registered from all causes in the Province were 12,4... 13,821 in the previous week and 9,676 in the corresponding week of the past year, giving re... an annual death-rate of 31·5, 35·1 and 24·5 per 1,000 of population. The death-rate was 3·6 per ... less than that registered last week, and 0·3 per 1,000 less than the average rate of the corre-sponding week of the five years 1889—1893.

Cholera.—There were 4 deaths registered under the head of cholera; they occurred in the ... cipal town of Patti, District Lahore.

Small-pox.—From small-pox 215 deaths were registered against 261 in the previous week and ... in the corresponding week of the past year.

Fevers.—From fevers there were 8,238 deaths against 9,012 in the previous week and ... the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 333 deaths against 382 in the pr... week and 396 in the corresponding week of the past year.

Chest Disease.—Five hundred and eighty-one against 707 and 739.

Snake-bite.—Twenty-one against 21 and 21.

Hydrophobia.—*Nil* against 3 and 3.

All other causes.—Three thousand and twenty-eight against 3,420 in the previous week and ... in the corresponding week of the past year.

Infantile Mortality.—Three thousand six hundred and fifty-seven deaths were registered in the Province amongst infants under one year of age, of which number 1,895 were males and 1,762 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 969 births were registered (504 males and 465 females), giving a birth-rate of 36 per *mille* of population; 975 deaths were registered (508 males and 467 females), giving a death-rate of 36 per *mille* of population.

13	Peshawar ...	0·91	1. Sufficient. 2. Good.	Continue low.	...	Extra rabi crops in good condition.

GENERAL REMARKS.

Rain has fallen in all districts except Mooltan. Prices rising in Jullundur, Amritsar, Siálkot and Lahore; continue high in Hissar, Ferozepore, Mooltan, Ráwalpindi, Shahpur and Dera Ismail Khan and low elsewhere. Ploughings and sowings of autumn crops in progress. Sowings of next spring commenced in Hissar. Extra spring and standing autumn crops are generally in good condition. Sowings of autumn crops have been benefited by the recent rains and their prospects are said to be good. Locusts appeared in parts of Ferozepore but did no damage; but rats are reported to be spoiling the crops. Crops on the low lands have been damaged by excessive rains in Amritsar and by high floods the sowings in parts of Dera Ismail Khan. Cattle are generally reported to be in good condition. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*T*=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

TULSI DAS, *Clerk of Statistics,*
Office of Director of Land Records and Agriculture, Punjab.

SUMMARY OF REMARKS ON THE RABI CROP OF THE PUNJAB FOR 1894.

THE exceptionally good rabi of 1893 has been followed by an equally good one in 1894. There has been indeed an increase in the area sown in the Province; but the outturn, though in general good, has not proved equal to the expectations formed of it, and in some districts was decidedly disappointing. In places rust appeared in the wheat and did considerable damage. The Province as a whole has, however, undoubtedly enjoyed an unusually good harvest. The rainfall was in general ample and seasonable. In two districts only in the south-east the autumn rain of 1893 ceased early. October and November were dry months; in December there was rain in 22 out of 31 districts. In January rain was plentiful and generally seasonable. In February and March the rainfall was lighter than in 1893. Since March little rain has fallen. The crops have been cut and harvested in fine weather. This is in contrast to last year, when much grain was injured on the threshing floor by heavy rain.

There has been an increase under both heads of irrigated and unirrigated. The increase in irrigated area was largest in Jhang, where it was due to an extension of the Chenab Canal. The increase in total cultivation was largest in Ferozepore, Jhang, Ráwalpindi and Pesháwar, in each of which districts it exceeded 100,000 acres.

As regards total area, only three districts show a decrease from the figures of last year. These are Dera Ismail Khan, where it amounts to 102,897 acres, or 17·9 per cent., and Dera Ghází Khan, where it is 72,212 acres, or 23·5 per cent. There is a very trifling decrease of 310 acres in Hoshiárpur. The decrease in the Deraját Districts was due to a deficient supply of water in the hill streams during August and September, caused by scanty rainfall in the hills. The Indus inundations were also less extensive than usual. Taking the Province as a whole, there has been an increase of 928,975 acres, or 6·4 per cent. over the area of last year. This year's area exceeds the average area of the last nine years by 2,746,311 acres or 21·5 per cent. The total crop this year was 15,548,611 acres, of which 4,663,310 acres were irrigated and 10,885,301 acres as unirrigated. The percentage of irrigated land was 30·0. The irrigated area was 146,044 acres, or 3·2 per cent., and the unirrigated area 782,931 acres or 7·7 per cent. above that of last year. The irrigated area exceeded the normal area by 3·0 per cent. and the unirrigated by 31·5 per cent.

The outturn per acre for the whole Province was probably about average, the gross outturn being considerably above it on account of the large area sown. In Hissar there was good early rain, and the season was favourable throughout, the outturn being above average. In Rohtak the crop is classed as a 16-anna one. In Gurgaon and Delhi it was a fair average crop. In Karnál the area shows a slight increase only, but the increase under wheat was very large. In Umballa field rats (presumably voles) did a good deal of harm, and the grain though good was inferior to what was expected. In Simla there was a good deal of rust in the wheat.

In Kángra there was a large increase in area. Some rust appeared on irrigated wheat, but in general the crops were well above average. In Hoshiárpur the area was almost exactly the same as last year, but the grain crop was lighter and the straw crop heavier In this district and also in Jullundur the wheat crop was attacked by rust. Ferozepore shows an increase of 13·5 per cent. in area and the crop was very good.

Mooltan shows a slight increase in area and the crops were fair. In Jhang there was a considerable increase in area owing to the extension of the Chenab Canal and the new Colony. In Lahore the crop was a fair one. In Amritsar it was decidedly a good one. In Gurdaspur much of the crop was injured by excess of moisture and the district zamíndárs have not done well.

In Siálkot the area was very large, but the outturn per acre not so good as in 1893. Moisture and cold injured the crops, and produced rust and mildew.

In Gujrát and Gujránwála there was an increase in area, but the outturn per acre of wheat in particular is said to have been little more than half what it was in 1893. This was due to continuous rain and cloud in February and March. In Shahpur, Jhelum and Ráwalpindi on the other hand the crops, especially wheat, were excellent.

In Hazára the harvest area was a very fair one. In Pesháwar, althongh there were local failures, the crop on the whole was very good and in Kohát it was above average.

In the Deraját the crop was good in Bannu. In Dera Ismail Khan the remark is made that the season cannot be considered otherwise than favourable to the zamíndárs. In Dera Ghází Khan the crop was not so good. In Muzaffargarh the harvest appears to have been a fair one.

Supplies both of grain and fodder are now very large in the Province. Taught by the experience of last year the farmers made haste to get their grain in before it should be injured by rain.

It is interesting to note that while the increase in the total area of the rabi harvest was 6·4 per cent. the increase in the area under wheat amounted to 12 per cent. The increase in irrigated and unirrigated areas for all crops was respectively 3·2 per cent. and 7·7 per cent. For wheat alone the increase on irrigated area was 9·5 per cent. and on unirrigated 13·7 per cent. Deducting the area under wheat we find that the total area of other crops grown on irrigated lands shows an actual decrease of 6·8 per cent. as compared with last year, while the increase in area under other crops grown on unirrigated lands comes to only 2·7 per cent. The total area under crops other than wheat in 1893 and 1894 was almost identical, there being an increase of only 0·4 per cent., or less than one-half per cent.

These figures are very interesting. They show that in this particular year at any rate wheat did replace other crops on irrigated lands. Also it is to be noted that the percentage of increase in wheat cultivation was double the percentage of increase in all crops taken together including wheat, and about thirty times greater than the percentage of increase in other crops taken alone. The season was also so favorable to wheat-growing that the increase in area under this cereal grown without the aid of irrigation exceeded the rate of increase on irrigated lands. It is unquestionable that very special attention was given to the production of wheat during the year. The harvest was excellent; stocks are very large; but unfortunately, at least for the growers, prices are low in this country and in Europe.

LAHORE:
The 20th July 1894.

F. A. ROBERTSON,
Director of Land Records and Agriculture, Punjab

REMARKS ON CROP RETURNS FOR RABI 1894.

HISSAR DISTRICT.

PLENTIFUL rainfall of September was sufficient and beneficial for rabi sowings. Rain ceased in October and November. In December and January the rainfall, though slight, was very useful to the sprouting crops. The standing crops were invigorated by the rainfall of February. On the whole the rainfall throughout the season was sufficient for sowings and to bring the crops to maturity.

Irrigated area.—The area of irrigated crop compares as follows :—

1893	39,046
1894	47,737
Increase	8,691

The increase is chiefly observable in Hissar, Sirsa and Fatahabad Tahsíls, which is due to the opening of the Sirsa Branch Canal, by which a large area was irrigated during the season.

Unirrigated area.—The unirrigated area shows an increase of 17,132 acres as compared with last year.

The increase is mainly observable in Fatahabad and Sirsa Tahsíls, and it is due to the fact that the floods of Ghaggar stream were timely and good this year.

General Remarks.—The good rainfall of September laid down a good foundation for rabi sowings. Subsequent rainfall, though not so heavy as last year, was sufficient to keep the crop in good condition, and the outturn is reported above the average.

ROHTAK DISTRICT.

THE outturn of the rabi crop this year on the whole was an average one, due to good rains during the month of September, which fell seasonably for sowing purposes. There was an increase of 16,170 acres in the area cultivated over last year. There was a decrease in the irrigated area of 2,122 acres and an increase in the unirrigated area of 18,292 in consequence of plentiful rains in September and January.

The outturn both on irrigated and unirrigated land was a 16-anna one compared with last year. The area put under wheat shows a decrease of 9,470 acres, while the area under gram exceeded by 26,924 acres.

GURGAON DISTRICT.

THERE were good rains during June, July and August 1893. This led to an increase in the area ploughed for the rabi of 1894, and the occurrence of the seasonable rain at the end of the year resulted in assuring a good yield from the area under crop. The July and August rains flooded the Sáhibi and Landsha streams to a much greater extent than they had been flooded during the last few years, and this resulted in the cultivation for the rabi of lands which usually lie too high to be benefited by these streams. The acreage of rabi cropped shows an increase in every tahsíl except Nuh. The greatest increase on last year is in Gurgaon and Firozpur, where it amounts to about 10 per cent. These are the only tahsíls where irrigated lands show an increase. In Gurgaon there are no canals, and in Firozpur the beneficial effects of the Landsha were principally felt. Palwal shows an increase in total cultivation of about 1 per cent. and Rewári of about ¾ per cent., and this is entirely in the irrigated area, the unirrigated acreage cropped having decreased in both tahsíls. This is due in the case of Palwal to the free use of canal water, which was, owing to the character of the season, more readily obtainable, and the system by which land irrigated from bands is now shown as irrigated, and not as sailáb, as was done last year, has increased the irrigated area and decreased the unirrigated area in every tahsíl except Rewári and Palwal, where there is little land irrigated. Moreover, improvements in the bands carried into effect in Gurgaon and Firozpur allowed an actually greater area to be irrigated from them than was possible during former years. The increase in irrigated land in Rewári is accounted for by the greater use of wells, for the building of which large advances for takávi have been made more particularly in this tahsíl.

The heavy rains and the floods in the Landsha while benefiting the district at large were harmful to the low-lying tracts of the Nuh Tahsíl, and the extent to which the lands liable to be submerged were flooded is responsible for the falling-off of the acreage cultivated in that tahsíl. The land was still under water at the time when it should have been ploughed and sown, and there was therefore a decrease of about 5 per cent. on the area cultivated last rabi. Irrigated area, it is true, shows an increase of 6,692 acres on 9,011 in [illegible] but this is entirely due to the change of system in recording band-irrigated lands, and the non-irrigated area cropped fell from 94,799 in 1893 to 79,394 acres.

The greatest increase of acreage cropped is found in wheat, the crop being 17 per cent. more than it was last year. This increase took place in both irrigated and unirrigated land. There was nothing to seriously damage the wheat crop, which was successfully harvested, but there were falls of hail during the beginning of the year, which, though not very serious, probably prevented the yield of grain from being as heavy as it otherwise would have been. There was an increase of 3 per cent. in the acreage of barley, which is all on unirrigated ground. The most serious decrease was in gram and amounted in all to 9 per cent., although the acreage of gram sown on irrigated land increased 55 per cent. The causes of this were that on account of the favourable season land on which gram was usually sown alone was this year sown with Gochni (wheat and gram mixed) and that the gram cropped received more damage than the wheat from hail storms, and was also damaged by white ants, especially in Firozpur.

Rape and Tarámira being sown with wheat and barley show an increase of 31 per cent. on last year's figures, which is explained by the increase in the cultivation of wheat and barley.

Tobacco shows an increase, as is usual, in this district, the tobacco grown here being thought well of in the neighbouring districts. Last year the crop was not up to the average on account of the weather, and this year's crop shows an advance of 45 per cent. Melons and other extra rabi crops, besides tobacco, were below average, having been damaged by hail in May.

Straw was abundant and good.

The health of the people has been good.

Rinderpest has been noted in every tahsíl, though not to any very serious extent.

Food stocks and fodder are large. There has not been such large export of wheat, &c., as to enable zamíndárs to dispose of their produce, and it is still to a great extent on their hands, the demand being very slack.

DELHI DISTRICT.

THE statistics show an increase of nearly 4 per cent. in the total cultivated area as compared with last year. The increase occurs chiefly in the unirrigated tracts, and is due to the more favourable meteorology of the year.

The outturn was a fair average.

KARNAL DISTRICT.

There is a net increase of 4,367 acres in the total area under the rabi crops of 1894, the figures for the present and preceding rabi harvest being as follows :—

Year.	*Irrigated.*	*Unirrigated.*	*Total.*
1893	* 87,798	* 385,335	* 473,133
1894	106,065	371,435	477,500
Difference	+ 18,267	— 13,900	+ 4,367

The increase under irrigated and decrease under unirrigated is due to rains not having fallen in time this year.

The variation in the areas of certain chief staples will appear from the following table :—

Crops.	Area under Rabi 1893.	Area under Rabi 1894.	Increase or decrease.
Wheat	119,918	185,831	+ 65,913
Wheat and gram	68,118	(Distributed under the appropriate headings.)	— 68,118 (Not an *actual* decrease.)
Gram	199,424	214,451	+ 15,027
Barley	17,073	23,375	+ 6,302
Rapeseed, &c....	45,359	32,456	— 12,903

The high winds at the time of maturing caused failure of crops on the following areas :—

	Irrigated.	*Unirrigated.*	*Total.*
Tahsíl Pánipat	289	3,538	3,827
Tahsíl Kaithal	197	7,148	7,345
Tahsíl Karnál	161	10,150	10,311
Sub-Tahsíl Guhla	117	9,999	10,116
Total ...	764	30,835	31,599

The average outturn per acre of the principal crops is estimated as follows :—

Wheat	8 maunds.
Gram	7 "
Barley...	9 "
Sarshaf	5 "

No noticeable disease occurred either in men or cattle during the harvest, a few cases of disease among cattle having been duly attended to.

* Corrected figures.

UMBALLA DISTRICT.

More crops harvested during the year under report as compared with the previous year, though gram and other crops were much damaged by wild rats, and the rape was spoiled by the excessive rain.

The produce of the harvest is good on the whole; but not so good as was expected just before reaping time.

SIMLA DISTRICT.

The important feature of the weather preceding this harvest is the large amount of rain that fell in January, February and March. Too much fell, and the result was a good deal of rust all through the district. This was partially remedied by the hot, bright weather of April and May, but the yield has, it is stated, suffered everywhere. There has been some increase in the area under crop, but the outturn is not more than average.

KANGRA DISTRICT.

The total area under crops has risen from 269,444 to 326,699 acres, an increase of over 20 per cent., and the percentage of increase has been quite as much on irrigated as on unirrigated land. In this district, where irrigation is carried on from private *kuhls* or canals, there is not the same inducement in a year of good rainfall to grow a baráni rather than a nahri crop. The increase was general, being found in every tahsíl and in almost every crop. It was not greater in wheat than was to be expected, as more than half the whole cropped area is under wheat. Alsi, gram and massar suffered from too much rain at the beginning of the year. Wheat also was bad on rice land, as the soil became too wet, and rust (kungi) in many such places did considerable damage. The wheat on baráni land, especially near the houses where manure was sufficient, was an excellent crop. The people say it is an average or somewhat better than average crop; but judging from what I have seen I would say that the crop as a whole was well above the average.

HOSHIARPUR DISTRICT.

This year 536,418 acres of land were cropped as against 536,728 acres during the preceding year. A detail of the principal crops for the two years is given below:—

	1893.	1894.	*Increase or decrease.*
Wheat	323,936	315,674	− 8,262
Barley	28,031	30,223	+ 2,192
Gram	116,976	137,225	+ 20,249
Massar	15,222	13,841	− 1,381
Oil-seeds...	20,972	13,720	− 7,252
Other crops	31,591	25,735	− 5,856
Total ...	536,728	536,418	− 22,751 + 22,441

The year, like the last, has been favourable. There was plenty of rain, and the area cultivated was almost as large as in the preceding year, the difference being very small,—310 acres only.

The heavy rain in January and February 1894 has slightly damaged the crop, and the outturn of grain is not quite equal to last year, but the straw produced is abundant.

This year, under the instructions received on the subject, the mixed crops, wheat and barley, barley and massar, shown singly in the return bear a proportion of half and half; and wheat and gram two-thirds wheat and one-third gram. In this return prepared from the Patwári Crop Abstract they have been distributed accordingly and shown in it.

JULLUNDUR DISTRICT.

There was an increase of 29,324 acres, or 5·79 per cent., in the total area cropped during the rabi 1894 as compared with the previous rabi of 1893. The increase has occurred throughout the district and is chiefly marked in Nakodar and Phillour. The increase has chiefly occurred in wheat and gram and is due to the fact that last year a good deal of the rabi crops were injured by the hail storm and to the fact that owing to the timely and abundant rainfall at the sowing season large areas formerly under chari crops were ploughed up and cultivated with gram.

Character of harvest.—There was a good rainfall at the sowing season. The winter and spring rains were abundant, and wheat crop was generally attacked by the blight called "kungi." It affected the yield and the quality. One end of the grain has became black. The other crops ripened well and the yield was bumper.

LUDHIANA DISTRICT.

Ludhiána.—Rabi outturn good throughout the tahsíl. Slight damage was caused to rape seed by adverse winds the outturn being a 12-anna one.

Samrála.—Same as Ludhiána Tahsíl. The oilseed crop was a poor one.

Jagraon.—Outturn generally good. Slight damage was done to rape seed and gram in some parts of the tahsíl.

General.—The outturn of rabi was generally good, but owing to untimely rainfall the wheat was damaged in some parts of the district, the grain being discolored to some extent; and rape seed outturn was poor.

There is a large increase on the cropped area as compared with that of the previous year owing to sufficient rainfall.

FEROZEPORE DISTRICT.

The total area of crop is about 13 per cent. above the figures of last year, though even that year's crop was regarded as a bumper. Moreover, the harvested grain has in the present year escaped the loss which it suffered last year by untimely rain in May. There is a small falling-off in the canal irrigated areas in Moga and Muktsar which is partly compensated by a great extension of canal watering in Fázilka. The increase in unirrigated crops extends to all tahsíls. The largest increases under particular crops are over about 19 per cent. in wheat and about 96 per cent. in rape, &c. In barley there is a small decrease due to that grain being displaced by wheat. Other crops show comparatively small fluctuations.

MOOLTAN DISTRICT.

There is an increase of 3,638 acres in the area cropped this year which is due partly to satisfactory working of the canals and partly to good rainfall.

Increase.

Wheat 12,673 acres in all tahsíls except Mailsi.

	Acres.	
Barley	3,502	Chiefly in Kabirwála and partly in the rest.
Peas	7,163	Ditto ditto.
Fodder	1,651	Chiefly in Kabirwála and Mailsi.
Turnips and carrots ...	4,464	Chiefly in Kabirwála, Lodhrán and Mailsi.

Decrease.

Gram	4,642	Owing to the inundation of Chenab and Ravi Rivers a small area was cultivated.
Other cereals ...	3,870	
Massar	1,434	
Rape and others ...	15,464	Decrease is due to the fact that a larger area was sown with wheat and barley owing to its being remunerative.
Vegetables ...	529	Owing to the vegetable crop being damaged last year, a smaller area was sown.

JHANG DISTRICT.

The area under the rabi crop during the year 1893 was 402,774 acres. Last year the area [illegible] 301,987 acres. The difference is explained as below :—

Tahsíls.			Rabi 1893.		Rabi 1894.		Difference.	
			Irrigated.	Unirrigated.	Irrigated.	Unirrigated.	Irrigated.	Unirrigated.
Jhang...	...	...	86,521	27,935	107,652	33,307	+ 21,131	[illegible]
Chiniot	...	...	78,623	18,870	137,500	28,340	+ 58,877	[illegible]
Shorkot	...	...	55,066	34,972	58,385	37,590	+ 3,319	[illegible]
	Total	...	220,210	81,777	303,537	99,237	+ 83,327	[illegible]

There has been an increase of area cultivated in all the three tahsils of the district, and the [illegible] increase has been in the area under wheat, rape, barley, carrots and turnips, peas and other [illegible] food crops.

This has been owing to the development of the Chenab Canal, to timely rain and the [illegible] the rivers.

The area under "Rawan" gram and massar shows a considerable decrease as these articles [illegible] sold at a very cheap rate during the year under report and the agriculturists did not think it [illegible] profitable to sow them extensively. The other articles do not show any considerable variation.

Hail fell in some villages of the Chiniot and Jhang Tahsíls, but no damage was caused.

The crops were good, but the outturn was average.

MONTGOMERY DISTRICT.

There is a noticeable increase in the area under wheat, both irrigated and unirrigated, more [illegible] the latter, due to timely and sufficient rains at the time of rabi sowings and good sailáb from the river. [illegible] canals also brought plentiful and seasonable supplies of water.

The outturn was not so favorable as might have been expected from the initial conditions, the [illegible] wheat, barley and gram—being damaged by somewhat hot winds in March and April. Wheat also [illegible] from rust; barley and gram show a falling-off in area, due perhaps to an existing supply in excess [illegible] demand. The large area under carrots and turnips is due to the fact that the latter is one of the [illegible] if not the principal, fodder crops in the district.

There has been an increase over the figures of last year. The wheat crop may be taken at a [illegible] one and the yield average. Prices are low owing to no demand and accumulated stocks. Fodder [illegible] cient. People and cattle are healthy.

LAHORE DISTRICT.

The area under wheat and oil-seeds this year is considerably in excess of that of last year, but [illegible] off the decrease under *gram* the net increase under "total of all crops" is 38,182 acres, of which [illegible] under the head of irrigated.

The large stocks of grain saved to the zamindárs from the harvest of 1893 and selling at a [illegible] price induced them to resort to wheat sowing for which the summer rains were very favorable.

The continuous rains of the winter season did much good to the crops sown on the land solely [illegible] ent on rain or too high to receive irrigation but produced rust and injured the crops on low-[illegible] soils. The oil-seed (rape) crops were attacked by insects (called Tela), and the gram crops were [illegible] some extent by the unfavorable winds of March. The outturn of the crops noted above was [illegible] not so good as expected, but still the rabi crop must be considered a fair one.

The people fearing the calamity of heavy rain which destroyed a considerable amount of their [illegible] on the threshing floors last year, have exerted themselves and have got in their crops this year in safety.

AMRITSAR DISTRICT.

The total area under rabi crop in 1894 was 602,622, or 31,550 acres more than that in the [illegible] year. This increase was mostly in unirrigated (báráni) lands.

There was a decrease of 14,332 acres in irrigated lands. A large increase is shown under [illegible] gram crops on unirrigated lands, *viz.*, 38,585 as compared with areas of last year under those [illegible] wheat, gram and wheat and gram mixed: this was due to the seasonable rains.

The yield of the wheat crops was not quite as good as that of the preceding rabi; the yield [illegible] was decidedly good. The wheat crops were to a small extent damaged by kungi.

The rape crops suffered considerably owing to excessive cold and rain, and the yield was, [illegible] below the average.

Fodder was sufficient throughout the year.

On the whole the harvest was a decidedly good one.

GURDASPUR DISTRICT.

The area given as cropped is 520,471 acres, being 3·7 per cent. larger than that of 1893, but the outturn is disappointing and cannot be reckoned more than average. All low lands have suffered more or less, and there is a pretty general complaint of lightness in the grain of wheat, while Batála has also suffered moderately from smut.

All crops are, broadly speaking, much the same. Where drainage, natural or artificial, relieved the land, they have done fairly well, otherwise damage has been considerable.

On the whole the district zamindárs have not done very well. The crop rates are cheap, and the outturn is only moderate.

SIALKOT DISTRICT.

The climatic conditions of this harvest very much resembled those of 1893, the only difference was the excessive rain during the latter half of September 1894. The monsoon broke early, and, with the exception of a rather long break from about the end of the third week in August till the middle of September, the rainfall was both copious and continuous. Practically no rain fell from the beginning of October till the end of December, but from the first of January till March there were ample showers. The river and hill torrents were in constant flood during the first three months of 1894, and crops on low lying lands suffered considerably.

2. The total area under crops was 653,296 acres, an increase of 42,431 acres, or 6·9 per cent. over that of last year. This increase was confined entirely to the unirrigated area, the irrigated area having actually shrunk by 11·5 per cent.

3. The totals for the preceding years of this Settlement are as follows :—

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
1888.	1889.			1890.			1891.			1892.			1893.			1894.		
		Increase.			Decrease.			Increase.			Decrease.			Increase.			Increase.	
Total.	Total.	Actual.	Per cent	Total.	Actual.	Per cent	Total.	Actual.	Per cent	Total.	Actual.	Per cent	Total.	Actual.	Per cent.	Total.	Actual.	Per cent.
[illegible]651	607,529	17,877	3	511,602	95,927	15·7	658,741	147,139	29	590,620	68,121	10	610,865	20,245	3·4	653,296	42,431	6·9

Thus the area cropped this year is higher than any since Settlement operations began, except that of 1891. The total, large as it is, would have been still larger but for the abnormally large area cropped during the previous spring and autumn harvests.

4. The variations in area by tahsíls are as follows :—

Zafarwál	...	...	...	An increase of	11·0 per cent.
Raya	...	...	...	"	3·2 "
Pasrúr	...		...	"	5·0 "
Siálkot	...	...	...	"	9·0 "
Daska	...	...	...	"	7·7 "

The two tahsíls showing the largest increase are those with the largest proportionate area dependent on rain. The large increase in these two tahsíls and in Daska is also partly due to the large failed areas under rice owing to the long break in the rains in September.

5. The fluctuations in the various crops during the two past rabi harvests are given below :—

1		2	3	4	5	6	7	8	9
Year.		Wheat.	Barley.	Gram.	Massar.	Oilseed.	Fodder.	Other miscellaneous crops.	Total.
1893	... ...	341,774	123,927	23,150	29,931	10,969	60,724	20,390	610,865
1894	... ...	386,436	112,690	41,220	33,305	8,624	53,580	17,441	653,296
Difference	Actual ...	+ 44,662	−11,237	+18,070	+3,374	−2,345	−7,144	−2,949	+42,431
	Per cent ...	13·1	9·1	78·1	11·3	21·4	11·8	14·5	6·9

In the above table the mixed crops for 1893 have been divided and distributed under their appropriate headings.

The only crops which show an increase are wheat, gram and massar. The decrease under barley is due in a large measure to the partial failure of the crop last year owing to bad seed.

The decrease of oilseeds and fodder is due to the increase of grazing owing to the heavy rain and the excellence of the fodder crops during the previous kharif.

6. The outturn is certainly not so high per acre as last year. In this respect this harvest resembles the rabi of 1891 more closely than that of 1893. The yield of gram and massar is distinctly below the average and that of wheat and barley is slightly below the average.

The heavy rain caused the grain to shrink in the ear and in some low lying tracts blackened it. The yield of straw is everywhere abnormally good.

7. Considerable damage was done by floods to crops on *sailáb* lands and everywhere the cold injured the pulses as much as the excessive moisture. Rust and mildew did more harm than in 1893, but less than in 1891. There were no visits from locusts, and the cases of rickburning were few and far between. Harvesting operations were carried out with exceptional promptitude.

GUJRAT DISTRICT.

The condition of the harvest at the time of Girdawari was good, but it deteriorated at the time of ripening owing to continuous rains and clouds having been during the last winter, producing a kind of red coloured substance in wheat in February and March owing to which the grain could not attain its proper size. The wheat remained green till the beginning of April, which is longer than usual. The crops were also damaged by strong winds which blew about the beginning of April throughout the district. The wheat produce has been half the average this year.

No damage done to barley. The gram and the massar produce is less than the average and is not good even in the low lying lands. Generally speaking, the produce is fair.

GUJRANWALA DISTRICT.

The area figures of the present rabi are compared with those of previous years in the following table :—

	Sown.	Failed.	Harvested.	Irrigated.	Unirrigated.
Average of 5 years 1888—92	434,323	25,491	408,832	309,155	99,677
Old villages	445,132	6,263	438,879	303,100	135,779
Rabi 1893 new colonies	...	...	28,361	28,071	290
Total	...	...	467,240	331,171	[illegible]
Old villages	526,095	15,456	510,639	307,102	203,537
Rabi 1894 new colonies	50,622	6,937	43,685	40,514	3,171
Total	576,717	22,393	554,324	347,616	[illegible]

The figures for the new colonies in the whole cultivation begun only two years ago, have been shown separately, so that the normal increase in the old villages might be distinguished from the special increase due to the allotment of new lands.

2. Taking the old villages alone there is an increase in the area harvested of 72,000 acres or 16 per cent. on the figures of rabi 1893, an exceptionally good year, and of 102,000 acres, or, 25 per cent., on the average of the previous 5 years.

In fact the present year beats the previous record, that of 1889, by as much as 64,000 acres. Including the new colonies, the development of which is proceeding very rapidly, there has been an increase of 87,000 acres on last year's harvested area and of over 106,000 acres on those of any previous years.

3. As regards area therefore the results of the harvest have been exceptionally good. This is due (1) to favorable monsoon rains last year, which enabled abnormally large areas to be sown on both wet and dry soils (2) to the very heavy and well timed winter rains which promoted the growth and helped the crop to maturity. Between 30th December and 1st April the mean rainfall was nearly 8 inches against an average of about 3 inches for the same period, (3) to the steady development of canal irrigation, though in a wet year like the present this cause is less marked than in a dry year.

Thus we find that in the present year 37 per cent. of the crop was grown on *baráni* land against [illegible] per cent. last year, also a very favorable year for dry sowings, and 24 per cent. the average of the previous years. Even land attached to wells was worked as baráni this year, and as the baráni outturn was relatively much better than that of irrigated land, much of the crop was secured with a minimum outturn of labor. The wells were very little worked, and were at a standstill all over the district from 30th December to 15th March.

4. The increase is spread all over the district, *viz.*—

Wazirabad	12,000	acres.
Gujránwála	35,000	"
Háfizabad and Khángah Dográn ...	34,000	"
New Colonies	15,000	"

and over all the leading staples, *viz.*—

Wheat	56,000
Gram, barley	16,000
Oilseeds	6,000

Barley alone shows a decrease of 7,000 acres due probably to the low price of the grain and the fact that the conditions were favorable for growing wheat on the rather inferior soils generally reserved for barley.

5. As regards outturn it must be said that the yield has not come up to expectations. Up to the time that the crop was threshed it was believed that the yield would be excellent—equal to last year's, but now that the grain has been garnered the result is disappointing. The zamindárs say that it is only half of last year's yield. This is of course an exaggeration ; but I believe the yield is certainly one-third to one-fourth less per acre than last year. Land which yielded 16 maunds of wheat per acre last year this year yields only 11 to 12 maunds. The deficient outturn is most marked in the case of wheat and oilseeds especially on irrigated lands, and is ascribed to the excessive moisture, which favoured the stalk at the expense of the ear. In low lands too the crops did not fully recover from the rust brought on in February and March by cold cloudy weather. The failed area is 3 per cent. against 5 per cent. last year.

6. In spite therefore of abundant stocks of old grain and the largest area harvested on record, prices are slowly but steadily rising since the results of the harvest have become patent. This may of course be due to the fact that the new grain, most of which is of excellent quality, is more readily saleable than the damaged stocks of last year. There is practically no export, and it is satisfactory that prices are healthy. Wheat is now selling at 20 to 25 seers, for it was feared some months ago that if there were no export it would now be selling at a maund per rupee.

SHAHPUR DISTRICT.

Wheat is particularly good. The kharif was spoiled by the floods, but a rich alluvial silt was deposited which improved the soil. There is less "táramíra" because wheat was cultivated in its stead. Rain was also very seasonable. Prices were bad some time ago, but are now improving. Cattle are also in excellent condition.

JHELUM DISTRICT.

A larger area was sown this year owing to good rain at times of sowing and ploughing. The sailáb area shows a slight decrease due to heavy rains. The outturn is on the whole average. Wheat is the chief staple of local production and consumption, and the cultivators prefer the rabi crops to those of kharif. The produce is sufficient for local requirements. Fodder is plentiful. Owing to great damage to produce caused by rains of July last, the zamindárs made great efforts to harvest the crop as quickly as possible.

RAWALPINDI DISTRICT.

A larger area was sown this rabi owing to abundant and seasonable rainfall at the sowing season. The rains of January, February and March were very favorable to the crop, which has generally been good throughout the district. There is an increase of 19 per cent. in the area on which the crop has come to maturity as compared with the last year. The yield has generally been excellent.

HAZARA DISTRICT.

There is an increase of 31,136 acres in the total area as compared with last year. The [illegible] greater in wheat and barley and also in rape and others. The only decrease is under head [illegible] which does not call for remarks. The cause of increase under cereals and pulses is the timely [illegible] time, of which the agriculturists took advantage and sowed more wheat than barley on irrigated [illegible]

There is a decrease of 806 acres upon last year in irrigated area, mostly in Haripur and [illegible] Tahsíls, in which barley was sown, but this decrease has been more than made up by increase [illegible] gated area, and there is an increase rather than decrease on the whole.

The enormous increase under oilseeds is due to timely rainfall, and the commodity being [illegible] one the zamindárs naturally took to sowing it in abundance.

There is an increase all round except in 'Fodder Crops' and 'Miscellaneous Food Crops.' The [illegible] being more favorable for cereals, the zamindárs did not care for inferior crops, especially as they [illegible] of grass from the last year's stock.

PESHAWAR DISTRICT.

THE rainfall, though deficient over the greater part of the district at the sowing season, was [illegible] well distributed during the rest of the period of the harvest, and in Swabi, where there were good [illegible] in September and October, nothing better could have been wished for.

The result is that the harvest was far superior even to that of 1893, which again was [illegible] good crop. The total area under irrigated crops rose from 208,812 acres to 234,102 acres, or by [illegible] cent., and of the unirrigated crops from 284,022 acres to 420,925 acres, or by 48 per cent. As [illegible] per cent. of the total cropped area was under wheat and barley. The latter crop did well [illegible] where; but, as anticipated in the Final Forecast, the lateness of the sowings, which over the greater [illegible] the district were effected at the end of December and the beginning of January, and the want [illegible] shower at the beginning of April, operated injuriously on the wheat, and failures were heavy in [illegible] and Peshāwar, where the kharāba deductions, mainly under wheat, rose to 8 and 9 per cent., [illegible] I think, even have been higher.

The average percentage of failure was 4·1 as against 4·2 last year.

The outturn of grain of both crops, except on the worst Maira soils, was heavy and of good [illegible] In many cases even the yield on unirrigated lands was much in excess of that on well and canal [illegible]

The only other important staple is sarshaf, the area under which fell from 27,524 acres to [illegible] This crop is cultivated almost entirely in the north and north-east portion of the district, where the [illegible] more plentiful. A very large area was sown early in October, but unfortunately the young [illegible] attacked by blight and the ground locusts, so that the people turned their cattle into them and [illegible] area with wheat or barley. Where the crop survived the yield was very good indeed.

Fodder crops, mainly shaftal, have this year been shown in column 19. The area is small [illegible] the plentiful stock of last year's bhúsa and the abundant growth of grass.

Tobacco has risen from 4,023 acres to 6,433 acres; while the area under melons has largely [illegible] The quality of the tobacco in Mardán and Swabi, where the plant is mainly grown, promises [illegible] though the price owing to the large outturn last year keeps low.

After two bumper harvests in succession stocks of grain and fodder are superabundant, [illegible] practically no export at present, and in consequence prices are ruling lower throughout the [illegible] they have done for 30 years.

KOHAT DISTRICT.

FOR want of sufficient rain during the months of October and November 1893, rabi [illegible] made only on the irrigated lands in the district, and partially on the unirrigated lands in the [illegible] Kohát Tahsíls. No sowings were made on the unirrigated lands in the Hangu Tahsíl.

There were, however, copious rains at the end of December 1893, and during January [illegible] extensive sowings were made on the unirrigated lands in the district. The rainfall continued [illegible] vals, and the standing crops promised well. Consequently the area of crops harvested is larger [illegible] with the figures for rabi 1893 as shown below :—

	Irrigated	Unirrigated	Total
Rabi 1893	22,282	86,722	[illegible]
Rabi 1894	24,761	98,373	[illegible]
Increase	+2,479	+11,651	[illegible]

The produce of the crops both on irrigated and unirrigated lands is about the average, except [illegible] Tahsíl, where the yield on the unirrigated lands is below the average.

Hail fell in the month of May 1894 in certain villages of the district, but caused little [illegible] crops, except in village Surozai, in the Hangu Tahsíl, where standing wheat and barley [illegible] destroyed.

BANNU DISTRICT.

COMPARED with previous year, there has been an increase of 25,241 acres in the cultivation of wheat and of 220 acres in others, and a decrease of 23,365 in the following :—

Barley	412
Gram	13,561
Peas	113
Masar	1,066
Linseed	81
Mustard	2,111
Others	4,936
Fodder	1,085
	23,365

Deducting this decrease, the increase in cultivation is reduced to 2,096 acres. The rainfall has been seasonable, and zamíndárs have preferred to extend the cultivation of wheat largely. The outturn of the crop has also been good.

DERA ISMAIL KHAN DISTRICT.

THE area under crops decreased by 18 per cent. as compared with the figures of Rabi 1893. The falling-off was chiefly in the unirrigated area "Dáman" of the Dera and Kuláchi Tahsíls. This is due to the deficient supply brought by the hill streams during August and September 1893, caused by the scanty rainfall in the hills as well as on the plains. There was also a slight decrease in the Cis-Indus Kachis of Leiah and Bhakkar Tahsíls, which is attributed to the fact that the flood from the Indus was not so heavy as last year, and consequently certain lands adjoining the pacca tract remained unirrigated.

The quality of the crops was generally good throughout the district, and this was the result of the timely rain which fell in January, February and March. On the 13th April 1894 a heavy hail storm occurred in certain parts of the Dera, Bhakkar and Leiah Tahsíls and caused injury to the crops. It was followed by unfavourable winds, which weakened the grain in ear to a certain extent, and consequently the outturn was not quite so good as was expected. But even taking all this into consideration the character of the season cannot be described otherwise than favourable to the zamíndárs.

The extra rabi crop under all heads was better than the average, while melons have done very well on the Dáman.

The prices have fallen to some extent, and the market being dull, the zamíndárs had some difficulty in getting money to pay in the rabi instalment.

DERA GHAZI KHAN DISTRICT.

IN land irrigated from canals and wells the canals were generally flowing well at sowing time, and in maturing the crops the wells were supplemented by favourable rainfall in January and February. Good crops were therefore obtained. Wheat occupies most of the area in land of this class, and the remaining area is chiefly taken up by fodder for the well-cattle.

The hill torrents come down in less force in the autumn than in the previous year, and the inundation from the Indus was less extensive than usual. The area cropped in unirrigated land was therefore below the average. The rain of January and February did not benefit the crops on unirrigated to the same extent as on irrigated land, and the outturn also is therefore estimated as being below the average.

In Rájanpur most of the unirrigated land cropped was river flooded and wheat was the chief crop cultivated. In Sangarh and Dera Gházi Khan wheat occupied about half the unirrigated area. In the former tahsíl, where there is a large area watered from hill torrents, oil seeds were grown on most of the remaining area, and in the latter tahsíl, where the greater area is river flooded, gram and pulses were the next in area to wheat. In Jámpur, where the hill torrents flood a considerable extent of land, oil seeds were produced on three-fifths of the cultivation as compared with about one-third cropped with wheat.

MUZAFFARGARH DISTRICT.

Tahsíl Muzaffargarh.

THE total area brought under cultivation during Rabi 1894 is 150,489 against 146,257 last year. The increase of 4,232 is due to the flood. The increase is in the sowing of wheat, barley and peas.

Tahsíl Alípur.

The total area brought under cultivation in this tahsíl during 1894 is 133,132 against 127,862. The increase of 5,270 is also due to the flood and good supply of canal water. The increase is in the sowing of wheat and peas.

Tahsíl Sinánwán.

The total area brought under cultivation in this tahsíl is 78,372 against 87,118. The decrease of 746 is due to the insufficient supply of flood water from River Indus. The decrease is in the sowing of gram, peas, turnips and carrots. There is a slight increase of 756 in the total area of the district during the year 1894 against 1893.

F. A. ROBERTSON,

Director of Dept. of Land Records and Agriculture, Punjab.

PUBLIC WORKS DE[illegible]NJAB, IRRIGATION BRANCH.

Irrigation Operations of [illegible] 1894 up to 30th June 1894.

Canal Divisions.	Water distributed during June 1894 — Depth in Canal at regulating gauge — Full supply.	Depth in Canal — Actual throughout June 1894.	Gross [illegible] — Estimated full supply.	[illegible] irrigated (approximate) — District.	Acres.	Rainfall — Number of years on which average is struck.	Rainfall — Average.	Rainfall — During month.	Chief Crops (approximate) — Name.	Area irrigated during June 1894.	Area irrigated to end of June 1894.	Area irrigated to end of June 1893.	Remarks.

—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

[SANIT]ARY COMMISSIONER'S OFFICE,
LAHORE:
The 20th July 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 23RD JUNE 1894.

General Results.—The total deaths registered from all causes in the Province were 10,990 against 12,420 in the previous week and 9,112 in the corresponding week of the past year, giving respectively an annual death-rate of 27·9, 31·5 and 23·1 per 1,000 of population. The death-rate was 3·6 per mille less than that registered last week, and 1·0 per 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 217 deaths were registered against 215 in the previous week and [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 6,999 deaths against 8,238 in the previous week and [illegible] the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and di arrhœa 273 deaths against 333 in the previous week and 381 in the corresponding week of the past year.

Chest Disease.—Five hundred and forty-three against 581 and 658.

Snake-bite.—Twenty-four against 21 and 28.

Hydrophobia.—One against *nil* and 6.

All other causes.—Two thousand nine hundred and thirty-three against 3,028 in the previous week and 1,889 in the corresponding week of the past year.

Infantile Mortality.—Three thousand two hundred and ninty-five deaths were registered in the Province amongst infants under one year of age, of which number 1,757 were males and 1,538 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,030 births were registered (544 males and 486 females), giving a birth-rate of 38 per *mille* of population; 951 deaths were registered (472 males and 479 females), giving a death-rate of 35 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 20th July 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 31st JULY 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ...	0·27 at Sadr. 0·31 in Hánsi. 0·41 in Fatahabad.	1. Sufficient. 2. Good.	Continue high.	...	Sowings in progress. Rain wanted in some parts.
Delhi ...	0·32 at Sadr. 0·07 in Sonepat. 0·28 in Ballabgarh.	1. Sufficient. 2. Good.	Continue low.	Sowings finished. Prospects good.	...
Umballa ...	0·61 at Sadr,	1. Sufficient.	Ditto.	Grains germinated. Prospects good.	...
Jullundur ...	Slight rain all over the District except at Sadr.	1. Sufficient. 2. Good.	Falling.	Sowings in progress. Prospects of standing crops average.	...
Ferozepore ...	0·50 at Sadr. 1·97 in Zíra.	1. Plentiful.	Continue high.	Locusts appeared in parts of district, but did no damage. Field rats are doing some harm to gram sown.	...
Amritsar ...	0·62 average.	1. Sufficient 2. Good.	Ditto.	Sowings nearly over. Condition of crops good.	...
Siálkot ...	...	1. Sufficient. 2. Good.	Ditto.	Good.	...
Lahore ...	0·10 at Kasúr.	1. Sufficient. 2. Good.	Ditto.	Ploughing and sowings in progress. Prospects good. Rats are doing some harm.	...
Mooltan ...	0·15 in Lodhran. 0·69 in Kabirwála.	1. Sufficient. 2. Good.	Ditto.	Sowings in progress. Canals flowing.	...
Rawalpindi ...	0·84 in Kahúta. 10·37 in Murree.	1. Sufficient. 2. Good.	Ditto.	Being sown.	...
Shahpur ...	...	1. Abundant. 2. Good.	Ditto.	Sowings still in progress. Crops promising.	...
D. I. Khan ...	0·49 in Kuláchi. 0·61 in Bhakkar. 2·30 in Leah. 0·10 in Sheikh Budín.	1. Sufficient. 2. Good.	Ditto.	Sowings in progress. Crops damaged by high floods in parts of the district.	...
Peshawar ...	...	1. Sufficient. 2. Good.	Continue low.	...	Extra rabi in good condition.

GENERAL REMARKS.

Rain has fallen in all districts except in Siálkot, Shahpur and Pesháwar. Prices falling in Jullundur; continue low in Delhi, Umballa and Pesháwar, high elsewhere. Ploughings and sowings of autumn crops in progress. Sowings of next spring crops also commenced. Extra spring and standing autumn are generally in good condition. Locusts appeared in parts of Ferozepore but did no damage. Crops are said to be bitten by field rats in parts of Lahore and Ferozepore Districts and injured by high floods in parts of Dera Ismail Khan. Cattle are generally reported to be in good condition. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

SUMMARY OF METEOROLOGICAL CONDITI PREVAILING OVER THE PUNJAB DURING JUNE 1894.

General Summary.—The first part of the month was marked by unusually h weather, and some remarkably high day temperatures were registered, Montgomery 5th registering a maximum of 118·9°, which was the highest temperature reached d year. On the 6th the south-west monsoon burst on the west coast, and it advanced into the interior. The Punjab experienced the first burst of monsoon rainfall on the when Delhi recorded a fall of 3·12 inches, and temperature fell rapidly from 5° in ex the normal on the 10th to 6° below on the 12th. The highest maximum temp registered in the whole Province on the 13th was only 109·9° at Montgomery. Dus and thunder-storms gave light local showers during the next few days, and on the monsoon entered the Province, and general, but on the whole light, rain fell over the Punjab on the 17th and 18th. On the 19th pressure gave way rapidly forming a de along the foot of the hills between Siálkot, Lahore and Ludhiána, and heavy rain fel North and East Punjab. Lahore received the large fall of 4·94 inches, Siálkot 2·8 inche Ludhiána 2·01 inches. Rain continued the next day, but the falls were not so hea heaviest being 2·62 inches at Simla; and on the 21st there was practically no rain, th shower reported being one of half an inch at Lahore. During the next two days th local showers at Umballa, Ráwalpindi, Simla and Murree. The rainfall on the 25th w general, but the falls continued light in most cases, the only falls above an inch being 2·02 inches, Ludhiána 1·71 inches, and Siálkot 1·07 inches. A remarkable series storms and thunder-storms on the 29th gave some heavy local falls. The most were Ludhiána 4·28 inches, Simla 3·11 inches, and Khusháb 1·05 inches. The S Punjab and the Punjab Hill Districts continued to receive moderate rain next day, d indraught of monsoon winds caused by a depression passing through Rájpútána received a fall slightly exceeding 2 inches.

Barometer and Winds.—Pressure was in defect of the normal for the m stations, the largest deficiency occurring at stations in the plains, where it averag As in May, winds were more northerly than usual at the hill stations. In the plains th fairly normal in direction at Sirsa, Siálkot, Ráwalpindi, Mooltan and Dera Ismail Kh at other stations they were more southerly and easterly than usual.

Temperature.—The following table gives (1) the variation from the norm mean temperature of the Punjab for the 24-hour period ending at 8 A. M. of each d

nth; and (2) the highest maximum temperature registered in the Province on each day with the name of the station at which it was registered :—

Date.	Mean temperature variation of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.	Date.	Mean temperature variation of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.
June 1st ...	− 1·4°	115·9°	Montgomery.	June 17th ...	− 1·7°	105·0°	Pesháwar.
„ 2nd ...	+ 1·0°	115·4°	Montgomery & Sirsa.	„ 18th ...	− 5·5°	104·5°	Do.

„ 4th ...	+ 3·1°	117·4°	Sirsa & Montgomery.	„ 20th ...	− 7·5°	105·9°	Do.
„ 5th ...	+ 5·0°	118·9°	Montgomery.	„ 21st ...	− 3·5°	108·4°	Montgomery.
„ 6th ...	+ 4·5°	117·1°	Dera Ismail Khan.	„ 22nd ...	+ 1·0°	111·1°	Dera Ismail Khan.
„ 7th ...	+ 5·0°	117·1°	Khusháb.	„ 23rd ...	− 0·4°	109·9°	Montgomery.
„ 8th ...	+ 4·7°	117·1°	Do.	„ 24th ...	− 2·3°	109·9°	Do.
„ 9th ...	+ 5·8°	116·1°	Do.	„ 25th ...	− 2·5°	109·4°	Montgomery and Sirsa.
„ 10th ...	+ 4·9°	110·9°	Mooltan.	„ 26th ...	− 0·9°	110·0°	Pesháwar.
„ 11th ...	− 2·2°	114·5°	Do.	„ 27th ...	+ 0·2°	113·4°	Montgomery.
„ 12th ...	− 6·1°	114·5°?	Do.	„ 28th ...	+ 1·6°	113·4°	Do.
„ 13th ...	− 2·0°	109·9°	Montgomery.	„ 29th ...	− 0·6°	100·4°	Mooltan.
„ 14th ...	+ 1·0°	115·4°	Do.	„ 30th ...	− 7·5°	102·4°	Do.*
„ 15th ...	+ 1·7°	114·9°	Do.				
„ 16th ...	+ 1·1°	115·9°	Do.				

As will be seen from the above, temperature was considerably in excess of the normal during the first 10 days of the month, but during the remaining 20 days it was generally in slight to large defect, varying with the rainfall. The variations from the normal were large, ranging from +5·8° on the 9th to −8·5° on the 19th, but the mean average temperature of the Province for the whole month was nearly normal, being only 0·3° in defect. Very high maximum temperatures were recorded during the first part of the month, the highest temperature in the Punjab this year having been registered at Montgomery on the 5th, when the thermometer rose to 118·9° in the shade. Maxima of between 115° and 117° were of frequent occurrence. The mean maximum temperature of the month was in defect at Delhi, Ludhiána, Lahore, Siálkot, Ráwalpindi, Simla and Murree, and was in excess at Sirsa, Pesháwar, Dera Ismail Khan and Mooltan. The highest mean maximum temperature was that of Montgomery, viz., 109·7°. The mean maximum temperature of the month was in slight excess at most stations.

Humidity and Cloud.—The mean relative humidity of the air and the mean vapour tension were both much greater than usual at all stations, due to the unusually early advance of monsoon winds into the Province. The cloud proportion was also in excess of the normal.

Rain.—More rain than usual has been received during the month at most stations, the only stations at which less than the normal quantity for June was received being Mooltán, Montgomery and Pesháwar. Pesháwar received no rain during the month. The excess was greatest at the hill stations and at Lahore, Umballa and Ludhiána. At Lahore and Ludhiána the rainfall was more than four times the average amount usually received in June, due chiefly to a heavy fall of over 4 inches received at Lahore on the 19th, and another heavy fall of 4·25 inches received at Ludhiána on the 29th.

The following tables give (A) a summary of the meteorological conditions pre[illegible] in the Punjab in June 1894, and (B) the rainfall data for the month:—

—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

...ARY COMMISSIONER'S OFFICE,
LAHORE:
The 27th July 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 30TH JUNE 1894.

General Results.—The total deaths registered from all causes in the Province were [illegible] 10,990 in the previous week and 8,297 in the corresponding week of the past year, giving [illegible] an annual death-rate of 26·1, 27·9 and 21·0 per 1,000 of population. The registered death-rate [illegible] per 1,000 less than that registered last week, and was 1·5 per 1,000 less than the average [illegible] corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 179 deaths were registered against 217 in the previous week [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 6,477 deaths against 6,999 in the previous week and [illegible] the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 277 deaths against 273 in the [illegible] week and 290 in the corresponding week of the past year.

Chest Disease.—Five hundred and three against 543 and 567.

Snake-bite.—Forty against 24 and 35.

Hydrophobia.—Three against 1 and 2.

All other causes.—Two thousand eight hundred and eleven against 2,933 in the [illegible] week and 1,783 in the corresponding week of the past year.

Infantile Mortality.—Three thousand one hundred and twenty-three deaths were [illegible] the Province amongst infants under one year of age, of which number 1,603 were males and [illegible]

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 992 [illegible] registered (534 males and 458 females), giving a birth-rate of 37 per *mille* of population; [illegible] were registered (413 males and 409 females), giving a death-rate of 30 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 27th July 1894.* }

W. A. CRAWFORD ROE, F.R.C.S., [illegible]
Sanitary Commissioner

LAHORE, THURSDAY, AUGUST 9, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 7th AUGUST 1894.

No.	Reporting Station.	Rain	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
1	Hissar ...	1·72 at Hissar. 0·46 in Hánsi. 1·88 in Bhiwáni. 0·15 in Fatahabad. 0·20 in Sirsa.	1. Sufficient. 2. Good.	Falling.	...	Sowings completed. Rain urgently needed.
2	Delhi ...	2·00 at Sadr. 2·12 in Sonepat. 0·50 in Ballabgarh.	1. Sufficient.	Continue low.	Favorable. Crops flourishing.	...
3	Umballa ...	1·83	1. Sufficient.	Ditto.	Good. Crops flourishing.	...
4	Jullundur ...	1·42 at Sadr.	1. Sufficient. 2. Good.	Ditto.	Average. Sowings in progress.	...
5	Ferozepore ...	0·71 in Moga. 0·17 in Zíra. 0·03 in Fazilka.	1. Plentiful.	Falling.	Rats continue damaging the grain sown. Locusts still in parts of district.	...
6	Amritsar ...	0·28 average.	1. Sufficient	Ditto.	Good. Sowings nearly completed.	...
7	Siálkot ...	...	1. Plentiful. 2. Good.	Ditto.	Good.	...
8	Lahore ...	0·77 in Chunián. 0·93 in Sharakpur.	1. Sufficient. 2. Good.	Ditto.	Crops in parts of district damaged by floods, also by rats.	Ploughings in progress.
9	Mooltan ...	...	1. Sufficient. 2. Good.	Rising.	Condition of crops good.	...
10	Ráwalpindi ...	4·25 at Ráwalpindi. 6·88 in Kahúta. 1·55 in Pindigheb. 1·40 in Gujar Khan. 1·85 in Fatehjang. 1·15 in Attock.	1. Sufficient. 2. Good.	Falling.	Prospects average.	...
11	Shahpur ...	Rainfall throughout.	1. Abundant.	Continue high.	Promising. Sowings still in progress.	...
12	D. I. Khan ...	0·99 in Tánk. 0·23 in Bhakkar. 0·11 in Sheikh Budín.	1. Sufficient. 2. Good.	Ditto.	Sowings in progress.	...
13	Peshávar ...	...	1. Sufficient. 2. Good.	Continue low.	Crops in good condition.	

GENERAL REMARKS.

Rain has fallen in all districts except Siálkot, Mooltan and Peshávar. Prices rising in Mooltan, falling in Hissar, Ferozepore, Amritsar, Siálkot, Lahore and Ráwalpindi, continue high in Shahpur and Dera Ismail Khan, and low elsewhere. Sowings of autumn crops still in progress. Ploughings for spring commenced. More rain urgently needed at Hissar. Standing crops are flourishing and their prospects are said to be good. Crops damaged in parts of Ferozepore and Lahore by rats, and in parts of Lahore by heavy floods in the Ravi. Cattle are generally in good condition. Fodder sufficient throughout the Province.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 3rd August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-L[T.-COL.],
Sanitary Commi[ssioner] …

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 7TH JULY 1894.

General Results.—The total deaths registered from all causes in the Province were 9,371 against [illegible] in the previous week and 7,837 in the corresponding week of the past year, giving respectively annual death-rate of 23·8, 26·1 and 19·9 per 1,000 of population. The death-rate was 2·3 per 1,000 less than that registered last week, and 2·8 per 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 122 deaths were registered against 179 in the previous week and 99 in the corresponding week of the past year.

Fevers.—From fevers there were 5,875 deaths against 6,477 in the previous week and 4,994 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 242 deaths against 277 in the previous week and 325 in the corresponding week of the past year.

Chest Disease.—Four hundred and twenty-five against 503 and 541.

Snake-bite.—Forty-eight against 40 and 42.

Hydrophobia.—Five against 3 and *nil.*

All other causes.—Two thousand six hundred and fifty-four against 2,811 in the previous week and 1,835 in the corresponding week of the past year.

Infantile Mortality.—Two thousand nine hundred and seventy-one deaths were registered in the Province amongst infants under one year of age, of which number 1,552 were males and 1,419 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,046 births were registered (556 males and 490 females), giving a birth-rate of 39 per *mille* of population; 773 deaths were registered (391 males and 382 females), giving a death-rate of 29 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 3rd August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 1st August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Sixty-two thousand nine hundred and eighty-nine births were registered in the Province during the month of June 1894, giving a birth-rate of 37 per *mille* of population. Of the total number of births 33,508 were boys and 29,481 were girls.

The total number of deaths registered from all causes in the Province during the month of June 1894 was 51,300 against 62,758 in the previous month and 39,488 in the corresponding month of the past year, giving an annual death-rate of 30, 36 and 23 per *mille* of population per annum respectively.

There were 22 deaths registered under the head of cholera against 50 in the previous month.

From small-pox 954 deaths were registered against 1,106 in the previous month and 503 in the corresponding month of the past year; fevers 33,243 against 41,800 and 25,939; dysentery and [illegible] 1,423 against 1,841 and 1,604.

During the month there were 44 deaths registered from suicide against 43 in the past [illegible] wounding 65 against 60; accidents 568 against 470; snake-bite and killed by wild beasts [illegible] 69; and from all other causes 14,862 against 17,319 and 10,466 in the corresponding month of [illegible] year.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 1st August 1894.*

EAST INDIAN RAILWAY, AUDIT OFFICE; The 1st August 1894.

J. DOUGLAS,

No. 33 of 1894.

SUPPLEMENT TO THE

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, AUGUST 16, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 14th AUGUST 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ...	0·38 in Hánsi. 0·12 in Fatahabad.	1. Sufficient. 2. Good.	Continue low.	...	Rain urgently needed.
Delhi ...	0·78 at Sadr. 1·33 in Sonepat. 1·36 in Ballabgarh.	1. Sufficient. 2. Fair.	Ditto.	Continue favourable.	...
Umballa ...	1·49	1. Sufficient.	Ditto.	Fair. If there is much more heavy rain, crops in low-lying land will be damaged.	...
Jullundur ...	0·75 at Sadr. Slight in other tahsils.	1. Sufficient. 2. Good.	Ditto.	Average. Sowings nearly finished.	...
Ferozepore ...	0·26 in Zíra. 0·05 in Fázilka.	1. Plentiful.	Ditto.	Crops drying for want of rain. Rats are damaging the crops. Locusts disappeared.	...
Amritsar ...	0·32 average.	1. Sufficient	Ditto.	Average. Sowings nearly completed.	...
Siálkot ...	...	1. Plentiful. 2. Good.	Ditto.	Good.	...
Lahore ...	0·03 in Chunián.	1. Sufficient. 2. Good.	Ditto.	Good. Some damage done to crops by floods from Sutlej and field rats.	Ploughings in progress, but rain is badly wanted.
Multan ...	0·42 in Kabírwála.	1. Sufficient. 2. Good.	Ditto.	Good. Some crops damaged by floods.	...
Ráwalpindi ...	1·70 at Ráwalpindi. 1·77 in Fatehjang. 0·51 in Attock. 0·55 in Gujar Khan. 5·84 in Kahúta.	1. Sufficient. 2. Good.	Rising.	Average.	...
Shahpur ...	...	1. Abundant.	Falling.	Good. Rain wanted.	...
D. I. Khan ...	...	1. Sufficient. 2. Good.	Continue low.	Good. Sowings still in progress.	...
Peshawar ...	...	1. Sufficient. 2. Good.	Ditto.	Good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Siálkot, Shahpur, Dera Ismail Khan and Peshawar. Prices rising in Ráwalpindi; falling in Shahpur; [illegible] elsewhere. Sowings of autumn crops nearly finished. Ploughings of spring crops in progress. Rain badly wanted in most districts. Condition [illegible] of standing crops are reported good to average. Crops are drying for want of rain in certain districts. Crops damaged in parts of Lahore and [illegible] by heavy floods and in parts of Ferozepore and Lahore by rats. Cattle are generally reported good. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*T*=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF JULY 1894—(CONTINUED).

Explanation :—(*c*) Canal Rain-gauge Station.

2	3	4	5	6	7	8	9	10
	Rainfall.							
	Average rainfall of past years.			*Rainfall of present year.*				
Rain-gauge Stations.	1st October to 31st March.	1st April to 31st July.	For month under report.	Month under report.	1st October 1893 to 31st March 1894.	1st April 1894 to 31st July 1894.	Total.	Condition of crops and health of people.
Pánipat ...	2·49	10·84	7·52	8·13	4·87	10·40	15·27	Rainfall though plenty otherwise was not sufficient for the rice, and the crop has consequently been sown less than usual in the baráni Nardak tracts. The Jamna floods caused some damage to villages in the Khádir Circle. General health of people good.
Karnal ...	**4·02**	**15·09**	**9·35**	**10·20**	**7·93**	**17·77**	**25·70**	
Rajaund ...	...	..	...	5·57	3·80	9·87	13·67	
Kaithal ...	2·36	9·74	6·53	6·44	4·95	13·04	17·99	
Gulah ...	...	...	...	4·42	4·48	13·94	18·42	
Pipli ...	3·29	12·09	8·27	17·54	6·22	20·13	26·35	The rainfall has been everywhere more incessant and in some places a good deal more heavy than is usual. On the whole the condition of crops is satisfactory, though it may ultimately be found that damage has been done on low-lying lands, and the health of the people is good.
Jagádhri ...	5·61	16·91	11·16	12·77	7·41	17·06	24·47	
Umballa ...	**3·93**	**16·34**	**10·96**	**9·24**	**6·72**	**20·39**	**27·11**

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF JULY 1894—(CONCLUDED).

2	3	4	5	6	7	8	9	10
	Rainfall.							
	Average rainfall of past years.			Rainfall of present year.				
Rain-gauge Stations.	1st October to 31st March.	1st April to 31st July.	For month under report.	Month under report.	1st October 1893 to 31st March 1894.	1st April 1894 to 31st July 1894.	Total.	Condition of crops and health of people.
Tánk ...	1.71	4.03	3.08	3.21	5.29	4.63	9.92	The rain has been general throughout the district. The irrigation of the Daman is above the average. Kharif sowings are about half finished. Prospects good everywhere. The kharif in the Kachi will be small, but the rabi area will be extensive owing to the heavy floods. There is plenty of grass both in the Daman and in the Thal. The Indus is still in high flood. Several villages in the Kachi have been flooded out. The irrigation from hill torrents has been satisfactory. Most of the important bunds have stood.
Kuláchi ...	1.77	3.49	1.97	6.09	4.52	7.46	11.98	
D. I. Khan ...	2.24	3.78	2.00	4.19	3.78	8.07	11.85	
Bhakkar ...	1.59	3.54	2.25	5.50	3.52	6.78	10.30	
Leiah ...	1.48	3.40	2.15	5.39	2.84	6.75	9.59	
Sheikh Budin ...	...	...	...	5.89	4.48	6.96	11.44	
Sanghar ...	1.40	3.76	1.73	1.14	2.01	1.74	3.75	Kharif sowings are nearly over. Rabi harvesting is altogether over. Health of people good. Lands are fully irrigated. Canals are working well. Overflow of the hill streams has done some damage to indigo crop in the Rájanpur Tahsil.
D. G. Khan ...	1.99	4.13	2.40	2.06	3.60	2.06	5.66

[illegible]—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

[illegible]ARY COMMISSIONER'S OFFICE,
LAHORE:
The 14th August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 14TH JULY 1894.

General Results.—The total deaths registered from all causes in the Province were [illegible] 9,371 in the previous week and 7,645 in the corresponding week of the past year, giving [illegible] an annual death-rate of 21·8, 23·8 and 19·4 per 1,000 of population. The death-rate was [illegible] less than that registered last week, and was 6·3 per 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 115 deaths were registered against 122 in the previous week [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 5,129 deaths against 5,875 in the previous week and [illegible] the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 252 deaths against 242 in the previous week and 276 in the corresponding week of the past year.

Chest Disease.—Four hundred and fifty-four against 425 and 589.

Snake-bite.—Forty-seven against 48 and 56.

Hydrophobia.—One against 5 and 2.

All other causes.—Two thousand five hundred and ninety-nine against 2,654 in the previous [illegible] and 1,793 in the corresponding week of the past year.

Infantile Mortality.—Two thousand eight hundred and thirty-two deaths were registered [illegible] the Province amongst infants under one year of age, of which number 1,485 were males and 1,34[illegible]

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 983 births were registered (499 males and 484 females), giving a birth-rate of 36 per *mille* of population; 724 [illegible] were registered (349 males and 375 females), giving a death-rate of 27 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 14th August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-L[illegible]
Sanitary Commissioner, [illegible]

Peshawar ...	...	1. Sufficient. 2. Good.	Ditto.	Good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Siálkot, Mooltan and Peshåwar. Prices slightly falling in Hissar; below normal in Siálkot; rising in Rawalpindi, and continue low elsewhere. Weeding of autumn crops commenced. Ploughings for spring crops going on. The condition and prospect of [illegible] crops are reported good to average. The crops were withering in Hissár, but they have improved by the recent rain. More rain is wanted in Hissár and [illegible]. The crops are reported to have been damaged by floods in parts of Lahore and Mooltan and by field rats in parts of Ferozepore and Lahore. Cattle [illegible] reported in good condition. Fodder sufficient throughout the Province.

TULSI DAS, *Clerk of Statistics,*

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*T*=Thunder.
R=Slight rain not measured.
D=Dust-storm.

WEEKLY RAIN REPORTS RECEIVED TOO LATE FOR INSERTION IN PREVIOUS GAZETTE.

NOTE.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 21st August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Sanitary Commissioner

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 21ST JULY 1894.

General Results.—The total deaths registered from all causes in the Province were 9,393 against ... in the previous week and 7,521 in the corresponding week of the past year, giving respectively ...nual death-rate of 23·8, 21·8 and 19·1 per 1,000 of population. The death-rate was 2·0 per 1,000 ...er than that registered last week, but was 3·1 per 1,000 less than the average rate of the corre...ding week of the five years 1889—1893.

Cholera.—There was one death registered under the head of cholera it occurred in the Municipal ... of Patti, District Lahore.

Small-pox.—From small-pox 102 deaths were registered against 115 in the previous week and 59 ...e corresponding week of the past year.

Fevers.—From fevers there were 5,707 deaths against 5,129 in the previous week and 4,655 in ...rresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 270 deaths against 252 in the previous ... and 266 in the corresponding week of the past year.

Chest Disease.—Four hundred and fifty-eight against 454 and 585.

Snake-bite.—Forty-two against 47 and 26.

Hydrophobia.—Five against 1 and 2.

All other causes.—Two thousand eight hundred and eight against 2,599 in the previous week and ... in the corresponding week of the past year.

Infantile Mortality.—Three thousand two hundred and one deaths were registered in the ...nce amongst infants under one year of age, of which number 1,663 were males and 1,538 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,218 births were ...tered (617 males and 601 females), giving a birth-rate of 45 per *mille* of population; 892 deaths registered (456 males and 436 females), giving a death-rate of 33 per *mille* of population.

...ITARY COMMISSIONER'S OFFICE,
LAHORE:
The 21st August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

WEATHER AND CROP REPORT FOR WEEK ENDING 28th AUGUST 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ...	0·45 at Hissar. 2·12 in Hánsi. 0·70 in Bhiwáni. 0·35 in Fatahabad. 1·37 in Sirsa.	1. Sufficient. 2. Good.	Slightly falling.	Fair. Withered crops reviving.	...
Delhi ...	2·00 at Sadr. 1·58 in Sonepat. 1·40 in Ballabgarh.	1. Sufficient.	Continue low.	Continue favorable.	...
Umballa ...	1·74 at Sadr.	1. Sufficient.	Ditto.	Crops ripening.	...
Jullundur ...	6·60 at Sadr. 5·05 in Phillour. 2·00 in each of the other tahsíls.	1. Sufficient.	Ditto.	Weeding going on.	Ploughing commenced.
Ferozepore ...	3·18 at Sadr. 1·71 in City. 1·28 in Moga. 3·20 in Zíra. 4·40 in Muktsar. 1·51 in Fázilka. 1·83 in Nathána. 0·52 in Jalálabad.	1. Plentiful.	Ditto.	Rats continue to damage crops in parts.	...
Amritsar ...	3·96 average.	1. Sufficient.	Ditto.	Average.	Ploughings in progress.
Sialkot ...	Rainfall throughout.	1. Sufficient. 2. Good.	Below normal.	Promising.	...
Lahore ...	1·60 at Sadr. 3·55 in Chunián. 1·70 in Kasúr. 1·15 in Sharakpur.	1. Sufficient. 2. Good.	Continue low.	Good. The field rats are injuring crops in parts.	Ploughings in progress.
Multan ...	2·76 at Sadr. 0·75 in Mailsi. 0·93 in Lodhrán. 1·78 in Shujabad. 0·42 in Kabírwála.	1. Sufficient. 2. Good.	Ditto.	Good.	...
Rawalpindi ...	0·19 in Ráwalpindi. 6·01 in Fatehjang. 2·84 in Attock. 1·35 in Gujar Khan. 1·06 in Kahúta.	1. Sufficient. 2. Fair.	Rising.	Average.	...
Shahpur ...	Partial rainfall in Bhera and Khusháb Tahsíls.	1. Abundant.	Falling.	Rain needed.	...
D. I. Khan ...	0·75 in Leiah. 0·41 in Sheikh Budín.	1. Sufficient.	Above ordinary.	Good. Sowings in progress.	...
Peshawar ...	...	1. Sufficient. 2. Good.	Continue low.	Good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Peshawar. Prices rising in Ráwalpindi; above ordinary in Dera Ismail Khan; falling in Hissar and Shahpur; [illegible] in Sialkot; continue low elsewhere. Sowings of autumn crops still going on. Weeding of standing crops commenced. Ploughings for spring crops [illegible]. Condition and prospect of standing crops are reported good to average. Withered crops are reviving in Hissar. More rain needed in Shahpur. [illegible] continue to damage crops in parts of Ferozepore and Lahore. Condition of cattle is generally reported good. Fodder sufficient throughout the [illegible].

PESTONJI, *Supdt.*,
Office of Director of Land Records and Agriculture, Punjab.

SUMMARY OF METEOROLOGICAL CONDITI[ONS] PREVAILING OVER THE PUNJAB DURIN[G] JULY 1894.

General Summary.—Unusually cool weather prevailed in the Punjab d[uring the] month of July, the day temperatures in particular being largely below the normal. T[empera]ture was most in defect from the 7th to the 9th, when unsettled pressure conditions, [...] on the 8th and 9th by the passage of a cyclonic storm through Rájputána and Si[...] moderately heavy rain over the whole Province. On the 8th heavy falls of rain were [...] from Sirsa (3·64 inches) and Dera Ismail Khan (2·84 inches), and several other [...] received amounts between one and two inches. On the 13th rain was again report[ed ...] most stations, and there was another period of unsettled showery weather from the 15th [...] 17th. Simla and Murree each received over 3 inches of rain on the 16th, and on the [...] Ludhiána registered a fall of 2·03 inches and Cherát 2·93 inches. On the 29th there [...] important change in the distribution of pressure. Pressure gave way rapidly over the [...] of the Punjab, especially in the north-west, and the monsoon area of low pressure wa[s] transferred much further north than usual, which had the effect of diverting the m[...] current further towards the east and then causing a partial break in the rains in the [...] plains. The hill districts, however, continued to receive moderate to heavy rain, for the [...] of humid winds blowing against the hills in the extreme east of the Punjab was defle[cted...] them to the north-west, and proceeding along the line of the hills gave very heavy rain [...] on the 29th and 30th and moderate rain to the other hill stations. Simla registered the [...] fall of 6 inches on the 29th and another fall of over 2 inches next day. One of the [...] of the present monsoon is the series of heavy local showers that have been received at [...] stations in different parts of the country, while other stations often in the immediate [neigh]bourhood have received less rain than usual. Instances of this are not wanting in the [...] For example, only a little more than half its usual rainfall for July was received at [...] while at the neighbouring station of Khusháb rainfall was very largely in excess, the [...] alone amounting to nearly twice its average normal fall for the month.

Barometer and Winds.—At the hill stations the mean pressure of the m[onth ...] normal, but in the plains it was in excess of the normal. The excess was most [...] Pesháwar and Mooltan, where it was more than ·030″. At nearly all stations wind [...] direction, but slightly from the usual direction prevailing in July, and in most cases [...] velocity agreed exactly with the normal. Winds were slightly feebler at Delhi, S[...] Mooltan. At Montgomery and Khusháb winds were strong, the mean velocity [...] month amounting to 10 and 8 miles per hour respectively.

Temperature.—The following table gives (1) the variation from the normal of the [...] temperature of the Punjab for each day of the month; and (2) the highest maximum [tem]perature registered in the Province on each day, with the name of the station at which it [wa]s registered:—

Date.		Variation from normal of mean temperature of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.	Date.		Variation from normal of mean temperature of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.
1st	...	− 3·6°	106·4°	Mooltan.	July 17th	...	− 6·8°	101·4°	Mooltan.
2nd	...	− 2·6°	107·4°	Montgomery.	„ 18th	...	− 7·4°	101·4°	Do.
3rd	...	− 1·6°	107·5°	Pesháwar.	„ 19th	...	− 3·4°	103·4°	Mooltan and Montgomery.
4th	...	− 0·8°	109·1°	Dera Ismail Khan.	„ 20th	...	− 2·2°	105·9°	Mooltan.
5th	...	+ 0·5°	104·4°	Montgomery and Mooltan.	„ 21st	...	− 2·9°	102·4°	Do.
6th	...	− 3·8°	105·4°	Montgomery.	„ 22nd	...	− 0·9°	105·4°	Do.
7th	...	− 1·3°	106·4°	Do.	„ 23rd	...	+ 0·8°	105·4°	Do.
8th	...	− 6·6°	90·2°	Delhi.	„ 24th	...	+ 0·7°	104·9°	Montgomery.
9th	...	− 9·0°	96·8°	Mooltan.	„ 25th	...	+ 1·0°	103·4°	Do.
10th	...	− 5·9°	96·3°	Do.	„ 26th	...	+ 1·2°	107·0°	Pesháwar.
11th	...	− 4·2°	102·4°	Do.	„ 27th	...	− 1·2°	101·9°	Montgomery.
12th	...	− 2·4°	95·3°	Do.	„ 28th	...	− 2·5°	103·9°	Montgomery and Sirsa.
13th	...	− 5·0°	103·4°	Do.	„ 29th	...	− 1·2°	104·0°	Pesháwar.
14th	...	− 0·6°	104·4°	Mooltan and Montgomery.	„ 30th	...	− 1·6°	101·9°	Montgomery.
15th	...	− 0·8°	102·4°	Montgomery.	„ 31st	...	− 3·1°	103·4°	Do.
16th	...	− 3·2°	100·4°	Mooltan.					

There were only 5 days on which the average mean temperature of the Province [exc]eeded the normal, and on none of these days was the excess more than 1·2°. During the [whol]e of the rest of the month temperature was in defect, the deficiency being greatest on the [...]9th, 10th, 17th and 18th when it ranged from 5·9° to 9°·0. July has hence been a remark[ably] cool month due to the unusual amount of cloud that has been present at all stations. [The] highest maximum temperature recorded each day has varied considerably from day to [day]. The lowest was 90·2° registered at Delhi on the 8th, which followed one of 106·4° at [Mon]tgomery on the previous day, and the highest was 109·1 which was recorded at Dera [Isma]il Khan on the 4th.

As will be seen from the table at the close the highest mean maximum temperature [of t]he month was 101·8° at Mooltan, where rainfall was least in amount. This is the only [stati]on where the mean maximum temperature was in excess of the normal. At all other [stati]ons it was moderately to largely in defect. As skies were more heavily clouded than usual, [the m]ean minimum temperature at some stations exceeded the normal and at the others were [only s]lightly in defect. The deficiency that occurred at all stations, except Mooltan, in the [mon]thly mean temperature was thus due chiefly to unusually low day temperatures. No tem[perat]ures were recorded at Srinagar on the first 4 days of the month as the thermometer should [have] been submerged by a heavy flood in the river Jhelum.

Humidity and Cloud.—The air was much damper than usual and the cloud propor[tion was] considerably larger than the normal.

Rain.—The rainfall of the month at the hill stations of Simla and Murree was mally heavy, especially at Murree where it amounted to 25·75 inches, or more than average normal fall for July. Simla received 29·84 inches, or 12·29 inches in excess usual rainfall. The most striking feature in the rainfall of the month was its unequal tion. Several stations, such as Mooltan, Peshâwar, Lahore and Ludhiána, received than usual; while others, Khusháb and Ráwalpindi for example, received amounts excess. Khusháb, in the centre of the Punjab, received a remarkable series of heavy normal rainfall for July is only 2·86 inches, but on the 8th it registered a fall of 1·50 the 17th another of 1·85 inches, on the 18th an exceptionally heavy fall of 2·90 inches itself was equal to the average fall for the whole month, and again on the 20th another fall of 2·32 inches.

The following are the heaviest falls of rain reported during the month by the given in the table at the close :—

On the 5th Murree 3·62 inches.

8th Sirsa 3·64 „

16th Murree 3·53 „

26th Simla 4·50 „

27th Murree 5·53 „

29th Simla 6·01 „

The following tables give (A) a summary of the meteorological conditions during the month and (B) the rainfall data :—

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

Columns 4—10—*T*=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

NOTE.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 23rd August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 28TH JULY 1894.

General Results.—The total deaths registered from all causes in the Province were 9,45[illegible] 9,393 in the previous week and 7,409 in the corresponding week of the past year, giving respectively an annual death-rate of 24·0, 23·8 and 18·8 per 1,000 of population. The death-rate was 0·2 per [illegible] greater than that registered last week, but was 2·5 per 1,000 less than the average rate of the corre-sponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 92 deaths were registered against 102 in the previous week and [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 5,584 deaths against 5,707 in the previous week and [illegible] the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 277 deaths against 270 in the previous week and 304 in the corresponding week of the past year.

Chest Disease.—Five hundred and forty-one against 458 and 572.

Snake-bite.—Fifty-eight against 42 and 45.

Hydrophobia.—One against 5 and 4.

All other causes.—Two thousand eight hundred and ninety-eight against 2,808 in the previous week and 1,758 in the corresponding week of the past year.

Infantile Mortality.—Three thousand two hundred and sixty-seven deaths were registered in the Province amongst infants under one year of age, of which number 1,666 were males and 1,601 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,186 births were registered (622 males and 564 females), giving a birth-rate of 44 per *mille* of population: 86[illegible] were registered (408 males and 454 females), giving a death-rate of 32 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 23rd August 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-C[illegible],
Sanitary Commissioner, Pu[illegible]

Shahpur ...	...	1. Sufficient.	Falling.	Rain needed to improve the crops.	...
D. I. Khan ...	...	1. Sufficient.	Above the ordinary.	Good.	Ploughings commenced.
Peshawar ...	...	1. Sufficient. 2. Good.	Continue low.	Good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Siálkot, Mooltan, Shahpur, Dera Ismail Khan and Peshâwar. Prices rising in Ráwalpindi; falling in Hissar, [illegible] and Shahpur; below normal in Siálkot; above the ordinary in Dera Ismail Khan; continue low elsewhere. Sowings of autumn crops over. Weeding [illegible]. Ploughings for spring crops going on. Prospects of standing crops are reported good to average. Their condition is improving in Hissar. More [illegible] needed in Shahpur. Crops have been damaged by excessive rain on low land in Amritsar, and by field rats in parts of Ferozepore and Lahore. Cattle [illegible] reported in good condition. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved
Stations not thus marked use the old pattern gauge.

Columns 4—10—*T*=Thunder.
H=Hail.
R=Slight rain not measured.
D=Dust-storm.

[illegible]ARY COMMISSIONER'S OFFICE,
LAHORE:
The 4th September 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 4TH AUGUST 1894.

General Results.—The return is incomplete, the registers for the district of Shahpur been received. Comparing the results of the districts from which returns have been received deaths registered from all causes were 9,672 against 9,280 in the previous week and 8,3 sponding week of the past year, giving respectively an annual death-rate of 25·1, 24 1,000 of population. The death-rate was 1·0 per 1,000 greater than that registered last week 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 85 deaths were registered against 91 in the previous week in the corresponding week of the past year.

Fevers.—From fevers there were 5,785 deaths against 5,510 in the previous week and the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 368 deaths against 274 in the week and 276 in the corresponding week of the past year.

Chest Disease.—Five hundred and sixteen against 534 and 585.

Snake-bite.—Sixty-three against 54 and 43.

Hydrophobia.—Nine against 1 and 2.

All other causes.—Two thousand eight hundred and forty-six against 2,816 in the week and 1,938 in the corresponding week of the past year.

Infantile Mortality.—Three thousand three hundred and sixty-five deaths were registered districts from which returns have been received amongst infants under one year of age, of which 1,719 were males and 1,646 females.

Births and Deaths in Municipal Towns.—In the 44 large Municipal towns 1,179 registered (618 males and 561 females), giving a birth-rate of 44 per *mille* of population were registered (481 males and 503 females), giving a death-rate of 37 per *mille* of population

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 4th September 1894.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 4TH AUGUST 1894.

General Results.—The return is incomplete, the registers for the district of Shahpur not having been received. Comparing the results of the districts from which returns have been received the deaths registered from all causes were 9,672 against 9,280 in the previous week and 8,388 in the corresponding week of the past year, giving respectively an annual death-rate of 25·1, 24·1 and 21·[illegible] per 1,000 of population. The death-rate was 1·0 per 1,000 greater than that registered last week, but [illegible] 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 85 deaths were registered against 91 in the previous week and [illegible] in the corresponding week of the past year.

Fevers.—From fevers there were 5,785 deaths against 5,510 in the previous week and 5,4[illegible] in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 368 deaths against 274 in the previous week and 276 in the corresponding week of the past year.

Chest Disease.—Five hundred and sixteen against 534 and 585.

Snake-bite.—Sixty-three against 54 and 43.

Hydrophobia.—Nine against 1 and 2.

All other causes.—Two thousand eight hundred and forty-six against 2,816 in the previous week and 1,938 in the corresponding week of the past year.

Infantile Mortality.—Three thousand three hundred and sixty-five deaths were registered in the districts from which returns have been received amongst infants under one year of age, of which number 1,719 were males and 1,646 females.

Births and Deaths in Municipal Towns.—In the 44 large Municipal towns 1,179 births were registered (618 male s and 561 females), giving a birth-rate of 44 per *mille* of population; 98[illegible] deaths were registered (481 males and 503 females), giving a death-rate of 37 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE, LAHORE:
The 4th September 1894.

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, SEPTEMBER 13, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 11th SEPTEMBER 1894.

No.	Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
1	Hissar ...	1·89 at Sadr. 4·03 in Hánsi. 3·78 in Bhiwáni. 5·54 in Fatahabad. 3·80 in Sirsa.	1. Sufficient. 2. Good.	Continue low.	Fair. Crops improving.	Ploughing commenced.
2	Delhi ...	3·91 at Sadr. 7·67 in Sonepat. 11·94 in Ballabgarh.	1. Sufficient. 2. Fair.	Ditto.	Continue favorable save of Khadar lands damaged by excessive rain.	...
3	Umballa ...	4·16 at Sadr.	1. Sufficient.	Ditto.	Crops ripening.	...
4	Jullundur ...	2·08 throughout the district.	1. Sufficient.	Ditto.	...	Ploughing commenced.
5	Ferozepore ...	0·30 in Moga. 0·37 in Zíra. 1·46 at Sadr city. 3·08 in Muktsar. 1·48 in Fazilka. 1·17 in Nathána. 0·30 in Jalalabad.	1. Sufficient.	Ditto.	Good.	...
6	Amritsar ...	3·58 average.	1. Sufficient. 2. Good.	Ditto.	Average. Crops in low lying lands damaged by excessive rain.	Ploughing commenced.
7	Siálkot ...	...	1. Sufficient. 2. Good.	Low.	Good.	...
8	Lahore ...	0·06 in Chúnián. 0·70 in Kasúr.	1. Sufficient. 2. Good.	Continue low.	Good.	Ploughings in progress.
9	Moultan ...	0·37 in Mailsi. 0·24 at Sadr. 0·20 in Kabirwála.	1. Sufficient. 2. Good.	Low.	Good.	...
10	Ráwalpindi ...	3·11 at Sadr. 1·59 in Murree. 2·43 in Attock. 1·83 in Pindigheb. 2·21 in Fatehjang. 6·41 in Kahúta. 2·91 in Gujar Khán.	1. Sufficient. 2. Fair.	Normal.	Average.	...
11	Shahpur ...	Rainfall throughout district.	1. Sufficient. 2. Good.	Falling.	Fair. Rain needed.	...
12	D. I. Khan ...	0·14 at Sadr. 0·01 in Tank. 0·43 in Bhakkar. 1·06 in Leiah. 0·43 in Sheikh Budin.	1. Sufficient.	Low.	Good. Rain needed.	Ploughings in progress.
13	Peshawar	...	1. Sufficient. 2. Good.	Continue low.	Good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Siálkot and Peshawar. Prices normal in Ráwalpindi; low elsewhere. Sowings of autumn crops over. Ploughing for spring crops commenced. Prospects of standing crops are reported good to average. More rain is needed in Shahpur, and parts of Dera Ismail Khan. Crops are improving in Hissar. Excessive rains have damaged the crops on low lying lands in parts of Delhi and Amritsar. Cattle are generally in good condition. Fodder sufficient throughout the Province.

Office of Director of Land Records and Agriculture, Punjab.

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF AUGUST 1894.

Explanation :—(*c*) Canal Rain-gauge Station.

2	3	4	5	6	7	8	9	10
Rain-gauge Stations.	Rainfall. Average Rainfall of past years. 1st October to 31st March.	1st April to 31st August.	For month under report.	Rainfall of present year. Month under report.	1st October 1893 to 31st March 1894.	1st April 1894 to 31st August 1894.	Total.	Condition of crops and health of people.
Sirsa ...	2·20	9·72	3·30	2·32	2·81	10·92	13·73	The rainfall of the month has greatly improved the standing kharíf crop and it is very beneficial for the rabi sowings. Rainfall in June and July was insufficient and thus kharíf sowings were restricted to a greater extent. The rainfall in the latter part of August has revived the withered crops and the prospects are fair. Fodder sufficient.
Fatehabad ...	2·32	12·04	3·89	2·09	3·62	10·00	13·62	
Hissar ...	2·37	12·17	4·25	5·80	4·05	10·03	14·08	
Hánsi ...	1·99	11·20	3·91	5·26	4·03	9·61	13·64	
Bhiwáni ...	1·68	12·06	4·92	5·88	2·16	16·09	18·25	
Budhláda ...	...	...	...	2·25	2·35	12·51	14·86	
Tohána ...	...	...	...	2·44	3·49	10·20	13·69	
Dhaneta (*c*) ...	...	...	...	4·18	3·10	16·28	19·38	
Safidan (*c*) ...	...	...	...	4·50	2·87	16·80	19·67	
Jind ...	...	...	...	4·10	3·32	18·02	21·34	
Chhani ...	...	...	...	4·47	1·94	12·57	14·51	
Rohtak ...	2·26	14·43	5·13	5·20	3·89	15·63	19·52	Health of people good. No rain up to about 23rd, and crops were then in a critical condition. Plentiful rain from 23rd to 31st. Crops safe. Tanks filled.
Gohána ...	2·41	14·25	4·29	6·57	3·61	16·99	20·60	
Sámpla ...	2·00	15·39	5·29	6·62	3·64	17·77	21·41	
Jhajjar ...	1·84	14·84	5·43	6·19	3·13	15·22	18·35	
Farukhnagar ...	...	...	...	6·98	3·48	12·10	15·58	The kharíf crops throughout the district generally are in very good condition. There has been good rain and rabi ploughings have commenced. In Firozpur bájra is reported as having to some extent failed for want of rain at the end of July and beginning of August, and in Palwal a few villages have been damaged by inundation from the canal and the River Jumna. Fodder is abundant. Health of people is good. Food stocks ample. Canal not in use on account of rain.
Jatúsana ...	...	...	...	4·57	3·33	14·56	17·89

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF AUGUST 1894—(CONTINUED).

Explanation :—(c) Canal Rain-gauge Station.

1	2	3	4	5	6	7	8	9	10
		RAINFALL.							
		Average rainfall of past years.			*Rainfall of present year.*				
District.	Rain-gauge Stations.	1st October to 31st March.	1st April to 31st August.	For month under report.	Month under report.	1st October 1893 to 31st March 1894.	1st April 1894 to 31st August 1894.	Total.	Condition of crops and health of people.
Karnal.	Pánipat ...	2·49	16·11	5·27	8·73	4·87	19·13	24·00	Kharíf sowings are over. Prospects are good. At present Jumna floods have caused a little damage in the Pánipat Tahsíl. Rabi sowings have been commenced all over except in the Naili Chak of the Kaithal Tahsíl, where heavy floods of the Sarasti do not allow it.
	Karnal ...	4·02	21·01	5·92	5·22	7·93	22·99	30·92	
	Rajaund ...	...	...	...	1·56	3·80	11·43	15·23	
	Kaithal ...	2·36	12·83	3·09	3·06	4·95	16·10	21·05	
	Gulah ...	...	...	...	6·24	4·48	20·18	24·66	
Umballa.	Pipli ...	3·29	18·82	6·73	7·32	6·22	27·45	33·67	Except in Jagádhri general condition of kharif is reported good as a rule. Rice, cotton and sugarcane are promising. Maize and chari are suffering from rain, which is incessant, even where not specially heavy. The Khadar lands are suffering from excessive moisture Field rats are complained of in Umballa and caterpillars in Jagádhri.
	Jagádhri ...	5·61	27·93	11·02	4·58	7·41	21·64	29·05	
	Umballa ...	3·93	23·85	7·51	9·20	6·72	29·59	36·31

Kila Máhi (c) ...	...	...	...	3·95	5·75	8·80	14·55	
Kohat ...	6·31	10·50	2·90	1·68	5·09	16·67	21·76	Good rainfall during the month throughout the district. The rice crop has been harvested and other crops both on irrigated and unirrigated lands promise exceedingly well. In Barak Tappa, however, some damage has been caused to bájra and moth crops by an insect called Toka (a species of grass hopper). Health of people is fair. There is sufficient water in spring and Toi. A new spring called "Shaikh Ali" has appeared near Hangu which contains water sufficient to move a water-mill. This spring only appears in years of superabundant rainfall. A similar spring has also started in the Ustarzai Toi, which also only makes its appearance after very rainy seasons and generally about once in every six years.

SANITARY COMMISSIONER'S OFFICE
LAHORE:
The 6th September 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 11TH AUGUST 1894.

General Results.—The total deaths registered from all causes in the Province were 10,635 against [illegible] in the previous week and 8,989 in the corresponding week of the past year, giving respectively [illegible] annual death-rate of 27·0, 24·9 and 22·8 per 1,000 of population. The death-rate was 2·1 per 1,000 [illegible] than that registered last week, and was 1·5 per 1,000 greater than the average rate of the [corre]sponding week of the five years 1889–1893.

Cholera.—There were 2 deaths registered under the head of cholera. They occurred in the Muni[cipal] town of Delhi.

Small-pox.—From small-pox 82 deaths were registered against 88 in the previous week and 43 [in the] corresponding week of the past year.

Fevers.—From fevers there were 6,568 deaths against 5,840 in the previous week and 6,054 in [the co]rresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 368 deaths against 372 in the previous [week] and 281 in the corresponding week of the past year.

Chest Disease.—Four hundred and sixty-eight against 522 and 588.

Snake-bite.—Eighty-one against 64 and 52.

Hydrophobia.—*Nil* against 9 and 1.

All other causes.—Three thousand and sixty-six against 2,912 in the previous week and 1,968 [in the] corresponding week of the past year.

Infantile Mortality.—Three thousand six hundred and eighty-five deaths were registered in the [Prov]ince amongst infants under one year of age, of which number 1,915 were males and 1,770 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,353 births were [regis]tered (707 males and 646 females), giving a birth-rate of 50 per *mille* of population; 955 deaths [were] registered (491 males and 464 females), giving a death-rate of 35 per *mille* of population.

[SAN]ITARY COMMISSIONER'S OFFICE,
LAHORE:
The 6th September 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

MORTUARY RETURN FOR THE MONTH OF JULY 1894.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 10th September 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,

Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Seventy-two thousand nine hundred and seventy-seven births were registered in the Province [during] the month of July 1894, giving a birth-rate of 42 per *mille* of population. Of the total number of births 38,661 were boys and 34,316 were girls.

The total number of deaths registered from all causes in the Province during the month of July 1894 was 41,206 against 51,300 in the previous month and 34,355 in the corresponding month of the past year, giving an annual death-rate of 24, 30 and 20 per *mille* of population per annum [respec]tively.

There was only one death registered under the head of cholera.

From small-pox 480 deaths were registered against 954 in the previous month and 236 in the corresponding month of the past year; fevers 24,946 against 33,243 and 21,811; dysentery and diarrhœa 1,202 against 1,423 and 1,302.

During the month there were 31 deaths registered from suicide against 44 in the past month; wounding 50 against 65; accidents 776 against 568; snake-bite and killed by wild beasts 235 against 119; and from all other causes 13,485 against 14,862 and 9,606 in the corresponding month of the past year.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 10th September 1894.* — W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL, *Offg. Sanitary Commissioner, [Punjab].*

Peshawar ...	...	1. Sufficient. 2. Good.	Ditto.	Good.	...

GENERAL REMARKS.

Rain has fallen in all districts except Hissar, Siálkot, Lahore, Mooltan and Peshâwar. Prices normal in Râwalpindi and continue low elsewhere. Ploughings for spring crops in progress. Prospects of autumn crops are reported good to average. More rain needed in Shahpur. The standing crops have been damaged by excessive rains in parts of Delhi, Umballa and Amritsar, by field rats in parts of Ferozepore, and by floods in parts of Mooltan. Cattle are mostly in good condition. Fodder reported to be sufficient throughout the Province.

[illegible]TARY COMMISSIONER'S OFFICE,
LAHORE:
The 14th September 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 18TH AUGUST 1894.

General Results.—The total deaths registered from all causes in the Province were 11,561 against 10,635 in the previous week and 9,720 in the corresponding week of the past year, giving respectively an annual death-rate of 29·3, 27·0 and 24·7 per 1,000 of population. The death-rate was 2·3 per 1,000 greater than that registered last week, and was 2·6 per 1,000 greater than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was 1 death registered under the head of cholera. It occurred in the Police Station of Kohat.

Small-pox.—From small-pox 80 deaths were registered against 82 in the previous week and 45 in the corresponding week of the past year.

Fevers.—From fevers there were 7,222 deaths against 6,568 in the previous week and 6,609 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 415 deaths against 368 in the previous week and 324 in the corresponding week of the past year.

Chest Disease.—Five hundred and fifty-six against 468 and 666.

Snake-bite.—Sixty-five against 81 and 50.

Hydrophobia.—Three against 0 and 3.

All other causes.—Three thousand two hundred and nineteen against 3,066 in the previous week and 2,022 in the corresponding week of the past year.

Infantile Mortality.—Four thousand one hundred and one deaths were registered in the Province amongst infants under one year of age, of which number 2,186 were males and 1,915 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,345 births were registered (712 males and 633 females), giving a birth-rate of 50 per *mille* of population; 1,052 deaths were registered (540 males and 512 females), giving a death-rate of 39 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE, LAHORE:
The 14th September 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

SUPPLEMENT TO THE

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, SEPTEMBER 27, 1894.

PART I.
STATISTICAL.

[W]EATHER AND CROP REPORT FOR WEEK ENDING 25th SEPTEMBER 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
[H]issar ...	...	1. Sufficient 2. Good.	Continue low.	Crops ripening.	Sowings commenced.
[De]lhi ...	...	1. Sufficient. 2. Fair.	Ditto.	Favorable except on Khadar lands.	...
[Um]balla ...	...	1. Sufficient.	Ditto.	Harvesting commenced.	...
[Jull]undur ...	...	1. Sufficient.	Ditto.	Cotton and sugarcane being irrigated.	Ploughing going on.
[Fer]ozepore ...	...	1. Sufficient. 2. Good.	Ditto.	Rats are damaging the crops in two tahsils.	...
[Am]ritsar ...	...	1. Sufficient.	Ditto.	Average. Crops on low lying lands damaged by excessive rains.	Ploughings nearly finished. Sowing of gram, &c., commenced.
[Sia]lkot ...	...	1. Sufficient. 2. Good.	Ditto.	Crops promising.	Ploughing in progress.
[La]hore ...	...	1. Sufficient. 2. Good.	Ditto.	Good. Field rats continue to damage crops in parts.	Ploughing in progress.
[Mu]ltan ...	...	1. Sufficient. 2. Good.	Ditto.	Good.	Turnips being sown.
[Ra]walpindi ...	...	1. Sufficient. 2. Good	Low.	Average.	...
[S]hahpur ...	...	1. Sufficient. 2. Good.	Below normal.	Crops drying for want of rain.	...
D. I. Khan ...	...	1. Sufficient. 2. Good.	Continue low.	Good.	Ploughing in progress.
[P]eshawar ...	...	1. Sufficient. 2. Good.	Ditto.	Good.	...

GENERAL REMARKS.

[Rain]fall nil. Prices below normal in Shahpur and continue low elsewhere. Harvesting of autumn crops commenced in Umballa. Cotton and [sugarcane] being irrigated. Ploughings and sowings of spring crops going on. Prospects are reported to be good to average. Crops drying for want of rain [in Shahpur]. Crops damaged by field rats in parts of Ferozepore and Lahore, and by excessive rain in parts of Delhi and Amritsar. Cattle are generally in good [condition]. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

TULSI DAS, *Clerk of Statistics,*

Office of Director of Land Records and Agriculture, **Punjab.**

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved
Stations not thus marked use the old pattern gauge.

COLUMNS 4—10.—R = Slight rain, not measured.

WEEKLY RAIN REPORTS RECEIVED TOO LATE FOR INSERTION IN PREVIOUS GAZETTES.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 22nd September 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Sanitary Commissioner,

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 25TH AUGUST 1894.

General Results.—The return is incomplete, the registers for the districts of Jullundur and hahpur not having been received. Comparing the results of the districts from which returns have been rived, the total deaths registered from all causes were 11,144 against 10,691 in the previous week d 9,636 in the corresponding week of the past year, giving respectively an annual death-rate of 30·3, and 26·3 per 1,000 of population. The death-rate was 1·2 per 1,000 greater than that registered week, and 1·7 per 1,000 greater than the average rate of the corresponding week of the years 1889–1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 77 deaths were registered against 77 in the previous week and 43 he corresponding week of the past year.

Fevers.—From fevers there were 7,031 deaths against 6,702 in the previous week and 6,636 in corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 441 deaths against 385 in the previous k and 318 in the corresponding week of the past year.

Chest Disease.—Four hundred and eighty-seven against 483 and 649.

Snake-bite.—Forty-three against 63 and 41.

Hydrophobia.—One against 3 and 3.

All other causes.—Three thousand and sixty-four against 2,977 in the previous week and 1,995 he corresponding week of the past year.

Infantile Mortality.—Three thousand nine hundred and twenty-four deaths were registered in the icts from which returns have been received amongst infants under one year of age, of which number were males and 1,860 females.

Births and Deaths in Municipal Towns.—In the 41 large Municipal towns 1,153 births were istered (606 males and 547 females), giving a birth-rate of 45 per *mille* of population; 996 deaths registered (531 males and 465 females), giving a death-rate of 39 per *mille* of population.

NITARY COMMISSIONER'S OFFICE, LAHORE: *The 22nd September 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

SUPPLEMENT TO THE

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, OCTOBER 4, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 2nd OCTOBER 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ...	...	1. Sufficient. 2. Good.	Continue low.	Crops ripening.	Sowings in progress.
Delhi ...	...	1. Sufficient. 2. Fair.	Ditto.	Continue favorable. Crops flourishing except in Khadar lands.	...
Umballa ...	...	1. Sufficient.	Ditto.	Sunny weather favourable for reaping of crops which is in progress.	...
Jullundur ...	...	1. Sufficient.	Ditto.	...	Ploughings going on.
Ferozepore ...	...	1. Sufficient.	Ditto.	Rats are damaging the crops in parts of district.	...
Amritsar ...	...	1. Sufficient.	Ditto.	Average. Crops ripening.	Sowings of gram, &c., in progress. Ploughing is retarded by excessive moisture in low-lying lands.
Sialkot ...	...	1. Sufficient. 2. Good.	Ditto.	Promising.	Ploughings in progress.
Lahore ...	...	1. Sufficient. 2. Good.	Ditto.	Good.	Ditto.
Mooltan ...	...	1. Sufficient.	Ditto.	Ditto.	Ploughings commenced.
Rawalpindi ...	...	1. Sufficient. 2. Good.	Ditto.	Average.	...
Shahpur ...	...	1. Sufficient. 2. Good.	Falling.	Crops badly in need of rain.	...
D. I. Khan ...	...	1. Sufficient. 2. Good.	Continue low.	Harvesting commenced.	Ploughings in hand.
Peshawar ...	...	1. Sufficient. 2. Good.	Ditto.	Condition of standing crops good.	...

GENERAL REMARKS.

Rainfall nil. Prices falling in Shahpur and continue low elsewhere. Harvesting of autumn crops commenced. Ploughings and sowings of spring crops going on, but are retarded by excessive moisture in low-lying land in Amritsar. Condition and prospects of standing crops are said to be good to average. Crops badly in need of rain in Shahpur. Crops are being damaged by field rats in parts of Ferozepore. Cattle are generally in good condition. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

RAIN RETURNS, PUNJAB.

Explanations.

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
b Watson's Improved.
s Symon's Improved.
Stations not thus marked use the old pattern gauge.

COLUMNS 4—10.—T = Thundur.
H = Hail.
R = Slight rain, not measured.
D = Dust-storm.

WEEKLY RAIN REPORTS RECEIVED TOO LATE FOR INSERTION IN PREVIOUS GAZETTES.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 27th September 1894.* | W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL, *Sanitary Commissioner, Punjab.*

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 1ST SEPTEMBER 1894.

General Results.—The total deaths registered from all causes in the Province were 13,342 against [illegible]149 in the previous week and 10,743 in the corresponding week of the past year, giving respectively [illegible] annual death-rate of 33·8, 30·8 and 27·3 per 1,000 of population. The death-rate was 3·0 per 1,000 [illegible]ater than that registered last week; it was also 3·0 per 1,000 greater than the average rate of [illegible] corresponding week of the five years 1889–1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 55 deaths were registered against 79 in the previous week and 36 [illegible] the corresponding week of the past year.

Fevers.—From fevers there were 8,735 deaths against 7,705 in the previous week and 7,392 in [illegible] corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 472 deaths against 468 in the previous [illegible]k and 334 in the corresponding week of the past year.

Chest Disease.—Five hundred and sixteen against 542 and 703.

Snake-bite.—Fifty-nine against 44 and 54.

Hydrophobia.—Five against 3 and 4.

All other causes.—Three thousand and five hundred against 3,308 in the previous week and 2,220 [illegible] the corresponding week of the past year.

Infantile Mortality.—Four thousand six hundred and fifty-one deaths were registered in the [illegible]vince amongst infants under one year of age, of which number 2,423 were males and 2,228 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,359 births were [illegible]istered (698 males and 661 females), giving a birth-rate of 50 per *mille* of population; 1,183 deaths [illegible] registered (593 males and 590 females), giving a death-rate of 44 per *mille* of population.

[SA]NITARY COMMISSIONER'S OFFICE, LAHORE: *The 27th September 1894.* | W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL., *Sanitary Commissioner, Punjab.*

AREA IRRIGATED (APPROXIMATE). — RAINFALL. — CHIEF CROPS (APPROXIMATE).

Canal	District.	Acres.	Number of years on which average is struck.	Average.	During month.	Name.	Area irrigated *during* August 1894.	Area irrigated *to end of* August 1894.	Area irrigated *to end of* August 1893.	Remarks.
Swat River Canal	[illegible] ...	22,580	8	4'03	2'89	Sugarcane ...	...	1,500	1,803	Canal ran 27 days. Prospects much improved. A large amount of maize sown. The ultimate area will probably not fall far short of the average of 31,000 acres.
						Rice ...	...	371	1,605	
						Cotton ...	4	1,908	949	
						Indigo ...	...	...	...	
						Maize ...	10,326	13,946	14,661	
						Jowar and Chari	183	257	274	
						Miscellaneous ...	633	4,598	3,948	
Total Swat River Canal	–	22,580	...	...	...	...	11,146	22,580	23,240	
Western Jumna Canal	[illegible] ...	2,000	22	7'69	10'10	Sugarcane ...	233	49,241	36,983	On the 10th and 11th August, 5 bays of the Western Jumna sluices were washed away. As the river was high the supply in August was not affected. The demand was good till towards end of month, when it ceased owing to rain. The irrigated area will probably be the second best on record, the highest being that of 1869-70. The Sirsa Branch Kharif irrigation is, however, less than was expected.

SUPPLEMENT TO THE

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, OCTOBER 11, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 9th OCTOBER 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ...	...	1. Sufficient. 2. Good.	Continue low.	Crops ripened.	Sowings in progress.
Delhi ...	...	1. Sufficient. 2. Fair.	Ditto.	Prospects continue favorable. Crops flourishing except in Khadar lands.	...
Umballa ...	...	1. Sufficient.	Ditto.	Sunny weather is favourable for reaping of crops, which is in progress.	...
Jullundur ...	...	1. Sufficient.	Ditto.	...	Ploughings going on.
Ferozepore ...	...	1. Sufficient.	Ditto.	Rats continue spoiling the crops in Muktsar and Zira Tahsils.	...
Amritsar ...	...	1. Sufficient.	Ditto.	Harvesting commenced. Condition of crops average. Crops improving owing to no rain.	Ploughing nearly completed. Gram, &c., sowings in progress.
Sialkot ...	...	1. Sufficient. 2. Good.	Ditto.	Harvesting commenced.	Ploughings going on.
Lahore ...	...	1. Sufficient. 2. Good.	Ditto.	Good. Field rats continue to damage crops in Kasûr Tahsil.	Ploughings in progress.
Multan ...	...	1. Sufficient. 2. Good.	Ditto.	Crops in good condition.	Ditto.
Rawalpindi ...	...	1. Sufficient. 2. Good.	Ditto.	Prospects average.	...
Shahpur ...	...	1. Sufficient.	Falling.	Crops badly in need of rain.	...
D. I. Khan ...	...	1. Sufficient. 2. Good.	Continue low.	Harvesting in progress.	Sowings going on.
Peshawar ...	...	1. Sufficient.	Ditto.	Condition of standing crops good.	...

GENERAL REMARKS.

Rainfall nil. Prices falling in Shahpur and continue low elsewhere. Harvesting of autumn crops in progress. Ploughings and sowings of spring crops going on. Condition of standing crops reported good to average; badly in need of rain in Shahpur. Field rats are damaging the crops in parts of Ferozepore and Lahore Districts. Cattle are generally in good condition. Fodder sufficient throughout the Province.

RAIN RETURNS, PUNJAB.

Weekly Rain Report for the week ending 29th September 1894.

MEMO.—Every return received is blank except the following stations :—

Pálampur (Kángra District) on 26th and 27th September 1894, 1·59 and 0·03 respectively ... ... Total ... 1·62

Dharmsala (Kángra District) on 23rd, 26th and 27th September 1894, 0·55, 0·20 and 0·22 respectively ... " ... 0·97

Mánsehra (Hazára District) on 25th September 1894 ... " ... 0·12

Slight rain has fallen in Kasauli (Simla District) on 25th and 28th, and in Pálampur (Kángra District) on 25th September 1894.

Return not received from Mámoki (Lahore District).

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

WEEKLY RETURN OF BIRTHS AND DEATHS REGISTERED AT THE UNDERMENTIONED MUNICIPAL TOWNS IN THE PUNJAB DURING THE WEEK ENDING SATURDAY, THE 8th SEPTEMBER 1894.

	Districts.	Towns.	Population according to the Census of 1891.	Births.			Deaths.			Cause of Death.						Infants under one year of age.			Ratio of births per 1,000 of population.	Ratio of deaths per 1,000 of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 5th October 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Offg. Sanitary Commissioner, Pu[illegible]

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 8TH SEPTEMBER 1894.

General Results.—The total deaths registered from all causes in the Province were 13,763 against [illegible]342 in the previous week and 10,619 in the corresponding week of the past year, giving respectively [illegible]nnual death-rate of 34·9, 33·8 and 26·9 per 1,000 of population. The death-rate was 1·1 per 1,000 [illegible]ater than that registered last week; but was 0·5 per 1,000 less than the average rate of the [illegible]esponding week of the five years 1889—1893.

Cholera.—There were 11 deaths registered under the head of cholera; they occurred in the Muni-[illegible]l town of Batála.

Small-pox.—From small-pox 52 deaths were registered against 55 in the previous week and 44 [illegible] corresponding week of the past year.

Fevers.—From fevers there were 9,072 deaths against 8,735 in the previous week and 7,152 in [illegible] corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 524 deaths against 472 in the previous [illegible]k and 422 in the corresponding week of the past year.

Chest Disease.—Five hundred and sixty-three against 516 and 738.

Snake-bite.—Fifty-three against 59 and 41.

Hydrophobia.—Four against 5 and 1.

All other causes.—Three thousand four hundred and eighty-four against 3,500 in the previous week [illegible]2,221 in the corresponding week of the past year.

Infantile Mortality.—Four thousand seven hundred and eighteen deaths were registered in the [illegible]vince amongst infants under one year of age, of which number 2,448 were males and 2,270 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,322 births were [illegible]istered (676 males and 646 females), giving a birth-rate of 49 per *mille* of population; 1,175 deaths [illegible] registered (581 males and 594 females), giving a death-rate of 43 per *mille* of population.

[illegible]NITARY COMMISSIONER'S OFFICE,
LAHORE:
The 5th October 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

No. 42 of 1894.

SUPPLEMENT TO THE

Government Gazette

PUNJAB AND ITS DEPENDENCIES.

Published by Authority.

LAHORE, THURSDAY, OCTOBER 18, 1894.

PART I. STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 16th OCTOBER 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ...	...	1. Sufficient. 2. Good.	Continue low.	Crops ripened. Prospects fair.	Sowings in progress.
Delhi ...	...	1. Sufficient. 2. Good.	Ditto.	Favourable. Crops almost ripe.	Sowings commenced.
Umballa ...	...	...	Ditto.	Sunny weather is favourable for reaping of crops, which is in progress.	...
Jullundur ...	...	1. Sufficient.	Ditto.	Reaping in progress. Outturn average.	Sowings commenced.
Ferozepore ...	...	1. Sufficient.	Ditto.	Rats continue damaging crops in two tahsils.	...
Amritsar ...	...	1. Sufficient. 2. Good.	Ditto.	Havesting in progress. Crops in average condition.	Sowings commenced.
Siálkot ...	...	1. Sufficient. 2. Good.	Below normal.	Harvesting commenced.	Sowings going on.
Lahore ...	...	1. Sufficient. 2. Good.	Continue low.	Reaping of crops in progress. Prospects Good. Field rats continue to damage crops in one tahsil.	Sowings of wheat, gram, rape and other seed have been commenced.
Mooltan ...	...	1. Sufficient.	Ditto.	Crops being cut.	Sowings commenced.
Ráwalpindi ...	...	1. Sufficient. 2. Fair.	Falling.	Crops being cut.	Crops being sown.
Shahpur ...	...	1. Sufficient.	Below normal.	...	Rain much needed.
D. I. Khan ...	...	1. Sufficient.	Continue low.	Condition of crops good. Harvesting in progress. Some damage is reported in two tahsils from grass-hoppers.	...
Peshawar ...	...	1. Sufficient. 2. Good.	Ditto.	Standing crops in good condition.	...

GENERAL REMARKS.

Rainfall nil. Prices below normal in Siálkot and Shahpur. Falling in Ráwalpindi and continue low elsewhere. Harvesting of autumn crops is ... Ploughings and sowings of spring crops going on. Condition of standing crops is reported good to average. The outturn of autumn crops is reported ... in Jullundur. Rain is much needed in Shahpur. Crops are being damaged by field rats in parts of Ferozepore and Lahore, and by grass-happers in parts ... Ismail Khan. Cattle are generally in good condition. Fodder sufficient throughout the Province.

PESTONJI, *Supdt.,*

Office of Director of Land Records and Agriculture, Punjab.

SUMMARY OF METEOROLOGICAL CONDITIONS PREVAILING OVER THE PUNJAB DURING AUGUST 1894.

General Summary.—The abnormal pressure conditions introduced at the close of July, with the monsoon trough of low pressure very much further north than usual, continued up to the 17th August. Monsoon winds were hence diverted from the Punjab, and an almost complete break in the rains prevailed during this period. On the 3rd the trough was shifted slightly more to the south, and in consequence showers of rain were reported next day from the stations in the South-East Punjab; but it reverted to its original position on the 4th, and rain was again confined almost entirely to the Hill Stations, where alone rain fell throughout the month. On the 17th the pressure distribution began changing and the trough of low pressure was gradually transferred southwards, and on the 22nd was in its normal position. Humidity and cloud increased in the South-East Punjab, and rain began to be more general and extended over the greater part of the Province. Rainfall, however, was very light in the central and western districts. On the 23rd another change in the pressure conditions took place, and the trough of low pressure was gradually shifted further north till on the 27th it was again shown lying along the foot of the hills, and rain in consequence fell off in amount. With the exception of the 30th, when a slight change of pressure gave moderately heavy showers to Delhi and Umballa, rainfall continued very light to the end of the month.

Temperature was generally in excess of the normal during the first part of the month corresponding with the period of least rainfall, but on rain becoming more general temperature decreased and was in moderate defect from the 19th to the 24th. and then with the cessation of rainfall rose to almost normal, and continued either normal or in slight defect to the end of the month.

Barometer and Winds.—The mean pressure of the month was in slight to moderate defect at every station, a natural consequence of the abnormal distribution of pressure referred to in the previous section. The deficiency was largest at Dera Ismail Khan, where it amounted to — ·051," and least at Peshávar, where it was only — ·025", while at the neighbouring station of Ráwalpindi the defect amounted to — ·040". The defect generally increased northwards and westwards, the comparatively high pressure at Pesháwar being probably due to an unusually strong northerly element in the winds prevailing during the month, which, combined with the peculiarities of the local surroundings, was the cause of a local excess of pressure.

Winds were more northerly than usual at Simla, Murree, Ráwalpindi, Pesháwar and Dera Ismail Khan. The variations from the normal direction were most marked at the hill stations of Simla and Murree, where the mean wind direction was almost opposite to that usually prevailing during the month of August. Winds varied more or less from the normal direction at all the other stations with the exception of Siálkot, where alone the prevailing wind direction was the normal one. Winds were slightly stronger than usual at Ludhiána and Sirsa, and slightly weaker at most of the remaining stations. Winds were strong at Cherát and at Montgomery and Khusháb in the centre of the Punjab, the mean average velocity per hour during the whole month amounting to 9 miles at Cherát and Montgomery and 7 miles at Khusháb. The normal wind velocities for these stations have not yet been ascertained.

Temperature.—The following table gives (1) the variation from the normal of the temperature of the Punjab for each day of the month, and (2) the highest maximum temperature registered in the Province on each day, with the name of the station at which it registered:—

Date.	Variation from normal of mean temperature of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.	Date.	Variation from normal of mean temperature of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.
	°	°			°	°

8th ...	+ 0·2	104·9	Do.	" 24th ...	− 2·2	99·4	Montgomery.
9th ...	+ 2·4	109·4	Do.	" 25th ...	− 0·9	101·1	Dera Ismail Khan.
10th ...	+ 3·9	106·4	Do.	" 26th ...	− 2·0	102·1	Do.
11th ...	+ 1·6	103·4	Do.	" 27th ...	− 0·9	102·1	Do.
12th ...	− 0·1	104·4	Do.	" 28th ...	− 1·0	101·4	Montgomery.
13th ...	+ 1·6	106·4	Do.	" 29th ...	− 0·8	103·4	Do.
14th ...	+ 3·3	108·4	Sirsa.	" 30th ...	− 1·1	103·4	Do.
15th ...	+ 3·3	106·9	Montgomery.	" 31st ...	+ 0·5	104·0	Khusháb.
16th ...	+ 2·3	107·9	Do.				

Temperature was generally in excess during the first half of the month and in defect during the second half. Temperature was most excessive on the 9th, 10th and 14th to 16th, and most in defect from the 19th to the 24th. Very high day temperatures were attained on the 9th and 14th, the highest temperature of the month being 109°·4 at Montgomery on the 9th. The mean maximum temperature for the month at this station was 103°·3, which was the highest recorded in the Punjab. The mean maximum temperatures of Delhi, Ludhiána and Ráwalpindi were more than 2° in defect of the normal, and that of Sirsa was 3°·4 in excess. The average mean temperature of most stations was practically normal.

Humidity and Cloud.—A marked feature in the humidity conditions of the month was the unusual dampness of the air at all stations, especially in the plains, where the mean vapour pressure was also considerably in excess of the normal. At the hill stations the mean vapour pressure was either normal or in slight defect. Skies were more heavily clouded than usual at the stations for which cloud normals are available, except at Lahore, where there was slightly less cloud than usual. Both cloud and humidity were most largely in excess at Ludhiána.

Rainfall.—As will be seen from the table at the close, very little rain fell during the month at stations in the West and Central Punjab, with the exception of Mooltan, which received [illegible] inches, or nearly double its average fall for August, almost the whole of which was registered on the 21st and 22nd. Rainfall was in general defect over the whole province, the only stations which received more than the usual amount being Umballa, Delhi, Mooltan and [illegible]. The deficiency was absolutely greatest at Murree and Siálkot, where it amounted to about 4 inches.

The heaviest fall reported during the month was 3·08 inches at Umballa on the 3[illegible]. Falls slightly exceeding 2·5 inches were registered at Simla on the 6th and again on the 11th, and at Ráwalpindi on the 18th.

The following tables give (A) a summary of the meteorological conditions prevailing during the month and (B) the rainfall data:—

SIMLA: } W. A. BION,

The 14th August 1894. } for *Meteorological Reporter to Government, Punjab.*

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF SEPTEMBER 1894.

Explanation:—(*c*) Canal Rain-gauge Station.

2	3	4	5	6	7	8	9	10
	RAINFALL.							
	Average Rainfall of past years.			*Rainfall of present year.*				
Rain-gauge Stations.	1st October to 31st March.	1st April to 30th September.	For month under report.	Month under report.	1st October 1893 to 31st March 1894.	1st April 1894 to 30th Septr. 1894.	Total.	Condition of crops and health of people.
Sirsa ...	2·20	11·85	2·13	4·25	2·81	15·17	17·98	The rainfall of the month has greatly improved the standing kharíf crops and it was also beneficial for the rabi sowings. The kharíf crops are enripening and prospects are fair. Fodder sufficient and green grass procurable. Prices low as compared with last month.
Fatahabad ...	2·32	13·87	1·83	5·54	3·62	15·54	19·16	
Hissar ...	2·37	14·18	2·01	2·16	4·05	12·19	16·24	
Hánsi ...	1·99	13·59	2·39	4·03	4·03	13·64	17·67	
Bhiwáni ...	1·68	14·79	2·73	4·55	2·16	20·64	22·80	
Budhláda ...	...	...	...	2·80	2·35	15·31	17·66	
Tohána ...	...	...	...	1·63	3·49	11·83	15·32	
Dhaneta (*c*) ...	...	...	...	6·27	3·10	22·55	25·65	
Safidan (*c*) ...	...	...	...	12·83	2·87	29·63	32·50	
Jind ...	...	...	...	5·42	3·32	23·44	26·76	
Chhani (*c*) ...	...	...	...	2·50	1·94	15·07	17·01	
Rohtak ...	2·26	17·93	3·50	10·76	3·89	26·39	30·28	Rabi sowings commenced. Bájra and cotton crops only average owing to paucity of rain in the beginning of August. Some of the Jowár has been blighted. Excessive rainfall during this month. Flood water from Karnál District submerged large area in Gohána Tahsíl destroying a large area of crops.
Gohána ...	2·41	17·66	3·41	9·13	3·61	26·12	29·73	
Sámpla ...	2·00	18·83	3·44	9·95	3·64	27·72	31·36	
Jhajjar ...	1·84	17·91	3·07	7·76	3·13	22·98	26·11	
Farukhnagar ...	...	...	...	9·55	3·48	21·65	25·13	The rainfall for the month is much above the average, and all the rain recorded fell before the 12th. The kharíf in low-lying parts of the district and within the areas submerged by the lands or affected by the Landoha has suffered, as also have the Khadar villages of Palwal. The general condition of the crops is however good. Rabi ploughings well in hand and sowing of gram commenced. Fodder is abundant. Health of the people is good. Food stocks ample.
Játúsana ...	...	...	...	5·44	3·33	20·00	23·33	
Rewári ...	1·64	20·19	3·34	6·77	3·55	23·29	26·84

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 12th October 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,

Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Eighty-four thousand three hundred and ninety births were registered in the Province during the month of August 1894, giving a birth-rate of 48 per *mille* of population. Of the total number of births 44,454 were boys and 39,936 were girls.

The total number of deaths registered from all causes in the Province during the month of August 1894 was 51,045 against 41,206 in the previous month and 42,975 in the corresponding month of the past year, giving an annual death-rate of 29, 24 and 25 per *mille* of population per annum respectively.

There were 2 deaths registered under the head of cholera, against 1 in the previous month.

From small-pox 316 deaths were registered against 480 in the previous month and 189 in the corresponding month of the past year; fevers 32,115 against 24,946 and 29,170; dysentery and diarrhœa 1,906 against 1,202 and 1,397.

During the month there were 32 deaths registered from suicide against 31 in the past month; wounding 51 against 50; accidents 600 against 776; snake-bite and killed by wild beasts 277 against 235; and from all other causes 15,746 against 13,485 and 11,304 in the corresponding month of the past year.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 12th October 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

NOTE.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 13th October 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 15TH SEPTEMBER 1894.

General Results.—The total deaths registered from all causes in the Province were 14,969 against 13,763 in the previous week and 11,521 in the corresponding week of the past year, giving respectively an annual death-rate of 38·0, 34·9 and 29·2 per 1,000 of population. The death-rate was 3·1 per 1,000 greater than that registered last week; but was 4·7 per 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There were 7 deaths registered under the head of cholera; they occurred in the Municipal town of Batála, District Gurdáspur.

Small-pox.—From small-pox 51 deaths were registered against 52 in the previous week and 43 in the corresponding week of the past year.

Fevers.—From fevers there were 10,084 deaths against 9,072 in the previous week and 7,757 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 553 deaths against 524 in the previous week and 431 in the corresponding week of the past year.

Chest Disease.—Five hundred and ninety-three against 563 and 783.

Snake-bite.—Thirty-three against 53 and 55.

Hydrophobia.—Two against 4 and 2.

All other causes.—Three thousand six hundred and forty-six against 3,484 in the previous week and 2,451 in the corresponding week of the past year.

Infantile Mortality.—Five thousand one hundred and one deaths were registered in the Province amongst infants under one year of age, of which number 2,570 were males and 2,531 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,405 births were registered (769 males and 636 females), giving a birth-rate of 52 per *mille* of population; 1,243 deaths were registered (621 males and 622 females), giving a death-rate of 46 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 13th October 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

Western Jumna Canal	[illegible] ...	2,000	22	5'52	6'85	Sugarcane ...	45	40,256	36,867	Early in September very heavy rain fell which stopped all demand and the increase in area is therefore trifling. The season's irrigation is fairly satisfactory in view of the fact that the rains began very early. The development of the Sirsa Branch kharif irrigation is somewhat disappointing.
	[illegible] ...	46,943		5'21	10'67	Rice ...	3,296	37,389	29,160

Sirhind Canal	[Lu]dhiana ...	7,704	11	...	...	Sugarcane ...	5	1,813	1,189	Rain on 5th checked the demand, which set in again on 13th and increased gradually till the end of the month, when it was fairly strong. The canal was closed from the 5th to the 13th. Rats have destroyed much maize in Ferozepore District. The great decrease in area is due to heavy and continuous rain throughout the season.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 23rd October 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 22ND SEPTEMBER 1894.

General Results.—The total deaths registered from all causes in the Province were 16,284 against 15,068 in the previous week and 10,798 in the corresponding week of the past year, giving respectively an annual death-rate of 41·3, 38·2 and 27·4 per 1,000 of population. The death-rate was 3·1 per 1,000 greater than that registered last week; but was 7·9 per 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There were 6 deaths registered under the head of cholera; they occurred in the Municipal town of Batála, District Gurdáspur.

Small-pox.—From small-pox 61 deaths were registered against 52 in the previous week and 45 in the corresponding week of the past year.

Fevers.—From fevers there were 11,482 deaths against 10,128 in the previous week and 7,121 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 447 deaths against 555 in the previous week and 386 in the corresponding week of the past year.

Chest Disease.—Five hundred and sixty-four against 597 and 703.

Snake-bite.—Thirty-seven against 33 and 50.

Hydrophobia.—One against 2 and 2.

All other causes.—Three thousand six hundred and eighty-six against 3,694 in the previous week and 2,491 in the corresponding week of the past year.

Infantile Mortality.—Five thousand three hundred and thirty-nine deaths were registered in the Province amongst infants under one year of age, of which number 2,671 were males and 2,668 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,501 births were registered (777 males and 724 females), giving a birth-rate of 55 per *mille* of population; 1,373 deaths were registered (681 males and 692 females), giving a death-rate of 51 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 23rd October 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

[illegible] Khan ...	...	1. Sufficient.	Continue low.	Harvesting in progress.	Sowings in hand.
[illegible] ...	...	1. Sufficient. 2. Good.	Ditto.	Crops in good condition.	...

GENERAL REMARKS.

[illegible] Prices falling in Ráwalpindi, below normal in Shahpur, and continue low elsewhere. Harvesting of autumn crops going on though almost [illegible] districts. Ploughings and sowings of spring crops in progress. Condition and prospect of standing crops are said to be good in some districts, [illegible] and in some below average. Outturn is reported an average one in Jullundar and Shahpur. Rain much needed in Shahpur. Crops [illegible] damaged by field rats in parts of Ferozepore and Lahore. Cattle are generally in good condition. Fodder sufficient throughout.

PESTONJI, *Supdt.,*
Office of Director of Land Records and Agriculture, Punjab.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 30th October 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL, *Sanitary Commissioner, Punjab.*

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 29TH SEPTEMBER 1894.

General Results.—The total deaths registered from all causes in the Province were 17,161 against 16,284 in the previous week and 11,831 in the corresponding week of the past year, giving respectively an annual death-rate of 43·5, 41·3 and 30·0 per 1,000 of population. The death-rate was 2·2 per 1,000 greater than that registered last week; but was 12·7 per 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 70 deaths were registered against 61 in the previous week and 33 in the corresponding week of the past year.

Fevers.—From fevers there were 12,374 deaths against 11,488 in the previous week and 7,850 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 458 deaths against 447 in the previous week and 391 in the corresponding week of the past year.

Chest Disease.—Five hundred and seventy-one against 564 and 872.

Snake-bite.—Forty-six against 37 and 34.

Hydrophobia.—Four against 1 and 1.

All other causes.—Three thousand six hundred and thirty-eight against 3,686 in the previous week and 2,650 in the corresp onding week of the past year.

Infantile Mortality.—Five thousand four hundred and forty-eight deaths were registered in the Province amongst infants under one year of age, of which number 2,666 were males and 2,782 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,430 births were registered (753 males and 677 females), giving a birth-rate of 53 per *mille* of population; 1,506 deaths were registered (742 males and 764 females), giving a death-rate of 56 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 30th October 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL., *Sanitary Commissioner, Punjab.*

STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 6th NOVEMBER 1894.

Reporting Station.	Rain	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ..	...	1. Sufficient 2. Good.	Continue low.	Being harvested.	Crops nearly completed. Rain needed.
Delhi ..	...	1. Sufficient. 2. Good.	Ditto.	Reapings over. Yield good.	Sowings in progress.
Umballa ...	...	1. Sufficient except in one Tahsil	Ditto.	...	Rain this week has been an incentive to sowings of wheat especially.
Jullundur ...	...	1. Sufficient. 2. Good.	Ditto.	Outturn average.	Sowings in progress.
Ferozepore ...	...	1. Sufficient.	Ditto.	...	Rats damaging crops in two Tahsils.
Amritsar ...	...	1. Sufficient.	Ditto.	Harvesting in progress. Condition of crops average.	Sowings going on.
Siálkot ...	...	1. Sufficient 2. Good.	Below normal	Sugarcane being pressed.	Sowings of wheat continue.
Lahore ...	...	1. Sufficient. 2. Good.	Continue low.	Reapings in progress. Yield of maize and rice good and that of sesamum, &c., below the average.	Sowings going on. Field rats continue damaging crops.
Mooltan ...	...	1. Sufficient. 2. Good.	Ditto.	Crops being cut.	Sowings in progress.
Rawalpindi	...	1. Sufficient. 2. Fair.	Ditto.	Crops cut.	Crops being sown.
Shahpur ..	...	1. Sufficient.	Below normal.	Crops being harvested. Outturn of irrigated area average and that of rain land below average.	Crops badly in need of rain.
D. I. Khan	...	1. Sufficient. 2. Good.	Continue low.	Harvesting in progress.	Sowings in hand.
Peshawar ...	...	1. Sufficient. 2. Good.	Ditto.	Standing crops in good condition.	—

GENERAL REMARKS.

Rainfall *nil*. Prices below normal in Siálkot and Shahpur, and continue low elsewhere. Harvesting of autumn crops going on. Sugarcane being pressed. ... of spring crops in progress. Rain badly needed in Hissar and Shahpur. Outturn of autumn crops is generally reported good to average. Standing ... said to be in good condition. Crops are being damaged by field rats in parts of Ferozepore and Lahore districts. Cattle are generally in good condition. ... sufficient in all districts except parts of Umballa.

PESTONJI, *Supdt.,*

Office of Director of Land Records and Agriculture, Punjab

[illegible]—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

[illegible]TARY COMMISSIONER'S OFFICE,
LAHORE:
The 5th November 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 6TH OCTOBER 1894.

General Results.—The total deaths registered from all causes in the Province were 19,706 again 17,161 in the previous week and 12,026 in the corresponding week of the past year, giving respective an annual death-rate of 50·0, 43·5 and 30·5 per 1,000 of population. The death-rate was 6·5 per 1,000 greater than that registered last week; but was 11·2 per 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 78 deaths were registered against 70 in the previous week and 3 in the corresponding week of the past year.

Fevers.—From fevers there were 11,629 deaths against 12,371 in the previous week and 8,053 in the corresponding week of the past year. The mortality from fevers was very high in the districts of Umballa, Hoshiárpur, Jullundur, Gurdáspur, Amritsar and Siálkot.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 533 deaths against 458 in the previous week and 406 in the corresponding week of the past year.

Chest Disease.—Six hundred and eighteen against 571 and 824.

Snake-bite.—Forty-three against 46 and 29.

Hydrophobia.—*Nil* against 4 and 1.

All other causes.—Three thousand eight hundred and five against 3,638 in the previous week and 2,672 in the corresponding week of the past year.

Infantile Mortality.—Six thousand and forty-seven deaths were registered in the Province amongst infants under one year of age, of which number 3 091 were males and 2 956 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,521 births were registered (791 males and 730 females), giving a birth-rate of 56 per *mille* of population; 1,657 deaths were registered (783 males and 874 females), giving a death-rate of 61 per *mille* of population. In the following towns the death-rate was excessively high:—Batála 303, Kartárpur 250, Hoshiárpur 125, Amritsar 120, Kasúr 116 and Tanda-*cum*-Urmar 108 per mille of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF OCTOBER 1894—(CONTINUED).

Explanation: (c).—Canal Rain-gauge Stations.

1	2	3	4	5	6	7	8	9	10
		Rainfall.							
		Average Rainfall of past years.			*Rainfall of present year.*				
District.	Rain-gauge Stations.	1st October to 31st October.	1st April to 30th September.	For month under report.	Month under report.	1st October 1894 to 31st October 1894.	1st April 1895 to 30th Septr. 1895.	Total.	Condition of crops and health of people.
Gurdaspur.	Aliwál (c) ...	0·60	...	0·60	...	...	...	...	Cutting of the kharíf is in progress. Owing to prevalence of fever throughout the district, rabi sowings are retarded. The kharíf crop will only be an average one. The Revenue Extra Assistant Commissioner was out for 15 days during the month.
	Batála ...	0·37	...	0·37	...	...	...	...	
	Tibri (c) ...	0·32	...	0·32	...	...	...	...	
	Gurdaspur ...	**0·26**	...	**0·26**	0·02	0·02	...	0·02	
	Pathánkot ...	0·25	...	0·25	0·04	0·04	...	0·04	
	Dalhousie ...	0·96	...	0·96	0·05	0·05	...	0·05	
	Mádhopur (c) ...	0·42	...	0·42	...	...	...	...	
	Shakargarh ...	0·46	...	0·46	...	...	...	...	
Sialkot.	Zafarwál ...	0·19	...	0·19	...	...	...	...	No rain during the month. The Revenue Extra Assistant Commissioner was [illegible] days on tour checking Girdáwari. Of the kharíf crops, that of maize was an average crop; of all others especially rice the crops have been above the average. Rabi crops; with the exception of wheat and barley, have been sown. The latter have also been sown in Cháhi lands. Fodder sufficient.
	Pasrúr ...	0·26	...	0·26	...	...	...	...	
	Raya ...	0·42	...	0·42	...	...	...	...	
	Daska ...	0·38	...	0·38	...	...	...	...	
	Sialkot ...	**0·48**	...	**0·48**	...	...	...	...	
Gujrat.	**Gujrat (Sadr)** ...	**0·56**	...	**0·56**	...	...	...	...	Cutting of kharíf crops finished. Picking of cotton and cutting of sugarcane in progress. Produce average. Sowings of rabi crops commenced. Revenue Officer was on tour for 20 days during the month.
	Khárián (Lála Músa) ...	0·51	...	0·51	0·15	0·15	...	0·15	
	Phália ...	0·48	...	0·48	0·15	0·15	...	0·15	
Gujranwala.	Rámnagar ...	0·12	...	0·12	...	...	...	...	There has been no rain during the month and the continued drought has been very unfavourable for the maturing of the kharíf and sowing of the rabi. The kharíf is now being reaped. Outturn on irrigated land is good. Rice, cotton and maize are well up to the average. Most of the baráni crops have withered and are being grazed as fodder, grass being scarce. Rabi crops are being sown on irrigated lands. Baráni sowings are much reduced this year from want of rain. Prices are steady. The Revenue Assistant was for 21 days in camp during the month.
	Wazirabad ...	0·33	...	0·33	...	...	...	...	
	Sadr Kacheri (Gujranwala).	**0·45**	...	**0·45**	...	...	...	...	
	Shekhupura ...	0·23	...	0·23	...	...	...	...	
	Háfizabad ...	0·36	...	0·36	...	...	...	...	
	Khángah Dográn ...	...	...	...	...	...	...	...	
	Kila Didár Singh (c) ...	...	...	...	...	...	...	...	
	Meluána (c) ...	...	...	...	...	...	...	...	
	Midh ...	0·10	...	0·10	...	...	...	...	Rain is badly wanted for the rabi ploughing and sowing. Kharíf crops, especially cotton, have been damaged by want of rain. Health of people good. Fodder sufficient.
	Sahiwál ...	0·22	...	0·22	...	...	...	...	
	Núrpur ...	0·08	...	0·08	...	...	...	...	
	Mitha Tiwána ...	0·07	...	0·07	...	...	...	...	
	Sakesar ...	0·14	...	0·14	...	...	...	...

	Abbott-abad ...	**1·21**	...	**1·21**	0·08	0·08	...	0·08	Kharíf crops harvested. In Konsh crops suffered from "Jhal" (excessive moisture), which reduced the outturn in that ilága below average. The outturn in the rest of the district was average. Rabi crops flourishing, except in the Pakhli plain and Agror, where the young sprouts, as they germinated were attacked by Toka (a small cricket), which will necessitate resowings when rain falls. Higher lands also need rainfall. The "toka" attacks young crops till rain falls, but not after. Revenue Assistant was in camp for 16 days. Water from irrigation cuts ample. Prices cheapening.
	Mansahra ...	0·82	...	0·82	...	...	...	...	
	Haripur ...	1·03	...	1·03	...	...	...	...	

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF OCTOBER 1894—(CONTINUED).

Explanation :—(*c*). Canal Rain-gauge Stations.

1	2	3	4	5	6	7	8	9	10
		RAINFALL.							
		Average rainfall of past years.			*Rainfall of present year.*				
District.	Rain-gauge Stations.	1st October to 31st October.	1st April to 30th September.	For month under report.	Month under report.	1st October 1894 to 31st October 1894.	1st April 1895 to 30th Septr. 1895.	Total.	Condition of crops and health of people.
Peshawar.	Swábi ...	0·60	...	0·60	...	...	...	...	The condition of standing crops is good. Maize crops are being reaped. Cotton picking in progress. Outturn average. Rabi sowings have commenced. Rain much wanted. There is scanty supply of water in the Bara stream which irrigates the Mohmand Tappa of the Peshawar Tahsíl. Sufficient water in canals. The Deputy Commissioner was on tour for 17 days and the Revenue Assistant 15 days during the month. Fodder abundant.
	Lahore (Utman Bolak)	0·41	...	0·41	...	...	...	...	
	Nowshera ...	0·36	...	0·36	...	...	...	...

Kohat.	**Kohat** ...	0·51	...	0·51	...	...	...	...	There was no rain during the month except in Barak Tappa. In this Tappa the standing kharíf crops have almost all been cut and harvested, and rabi sowings are being pushed on. In the Kohat and Hangu Tahsíls, however, the harvesting of crops has only now been commenced. The outturn of crops on the irrigated lands is expected to be fairly good, while on the unirrigated lands owing to failure of rain during the month the produce is expected to be about the average. Want of rain for rabi sowings in the district is much felt. Health of the people is fair. Revenue Assistant, M. Muhammad Azim Khan, remained 28 days on tour during October 1894, and inspected Rabi Girdáwari.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 10th November 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

Ninety thousand two hundred and seventy-seven births were registered in the Province during the month of September 1894, giving a birth-rate of 53 per *mille* of population. Of the total number of births 47,229 were boys and 43,048 were girls.

The total number of deaths registered from all causes in the Province during the month of September 1894 was 67,848 against 51,045 in the previous month and 47,677 in the corresponding month of the past year, giving an annual death-rate of 40, 29 and 28 per *mille* of population per annum respectively.

There were 18 deaths registered under the head of cholera, against 2 in the previous month.

From small-pox 266 deaths were registered against 314 in the previous month and 169 in the corresponding month of the past year; fevers 47,053 against 32,115 and 31,886; dysentery and diarrhœa 2,144 against 1,906 and 1,722.

During the month there were 26 deaths registered from suicide against 32 in the past month; wounding 63 against 51; accidents 451 against 600; snake-bite and killed by wild beasts 193 against 277; and from all other causes 17,634 against 15,748 and 13,180 in the corresponding month of the past year.

SANITARY COMMISSIONER'S OFFICE, *The 10th November* 1894. } W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL, *Sanitary Commissioner, Punjab.*

[illegible]—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

[illegible]TARY COMMISSIONER'S OFFICE,
LAHORE:
The 14th November 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 13TH OCTOBER 1894.

General Results.—The total deaths registered from all causes in the Province were 22,823 against 19,706 in the previous week and 11,943 in the corresponding week of the past year, giving respectively an annual death-rate of 57·9, 50·0 and 30·3 per 1,000 of population. The death-rate was 7·9 per 1,000 greater than that registered last week; but was 6·1 per 1,000 less than the average rate of the corresponding week of the five years 1889 to 1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 54 deaths were registered against 78 in the previous week and 40 in the corresponding week of the past year.

Fevers.—From fevers there were 17,179 deaths against 14,629 in the previous week and 7,986 in the corresponding week of the past year. There was a very considerable increase in the mortality from fevers in the districts of Amritsar, Gurdáspur, Jullundur and Siálkot.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 562 deaths against 533 in the previous week and 382 in the corresponding week of the past year.

Chest Disease.—Seven hundred and thirty-one against 618 and 873.

Snake-bite.—Thirty-two against 43 and 32.

Hydrophobia.—Three against *nil* and 8.

All other causes.—Four thousand two hundred and sixty-two against 3,805 in the previous week and 2,621 in the corresponding week of the past year.

Infantile Mortality.—Six thousand eight hundred and ninety-four deaths were registered in the Province amongst infants under one year of age, of which number 3 378 were males and 3,516 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,470 births were registered (773 males and 697 females), giving a birth-rate of 54 per *mille* of population; 1,904 deaths were registered (920 males and 984 females), giving a death-rate of 70 per *mille* of population. The towns of Kartárpur and Batála had the very excessively high rates of 405 and 379 per *mille*.

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 14th November 1894.*

shawar ...	...	1. Sufficient. 2. Good.	Ditto.	...	Standing crops in good condition.

GENERAL REMARKS.

Rainfall *nil*. Prices normal at Ráwalpindi, below normal at Siálkot and Shahpur, slightly rising at Umballa, and continue low elsewhere. Harvesting ...mn crops nearly finished. Sowings of spring crops in progress. Sugarcane being pressed, and rain urgently wanted in Hissar and Shahpur. Outturn ...ir reported good. Crops are being damaged by field rats in parts of Lahore and Ferozepore districts. Cattle are generally in good condition. Fodder ...nt in all districts.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

SUMMARY OF METEOROLOGICAL CONDITIONS PREVAILING OVER THE PUNJAB DURING SEPTEMBER 1894.

General Summary.—During the month of September there was only one period of general rainfall in the Punjab and fine dry weather prevailed with occasional showers in the South-East Punjab and in the hill districts during the remainder of the month. The month opened with showery weather in the South-East Punjab, which gradually extended until the 4th when a depression, passing through South-East Rájpútána and recurving northwards towards the Punjab and the western districts of the North-Western Provinces, gave general rain over the whole Province on the 4th, 5th and 6th. On the 7th pressure rose rapidly and rain decreased and, with the exception of a few showers in the South-East Punjab on the 10th, no rain fell in the Province during the remainder of the month. From the 19th humidity began to decrease and skies were free from cloud over the whole of the Punjab from that date. Temperature was higher than usual during the latter half of the month in consequence of the unusual fine clear weather that prevailed. Rainfall was in defect of the normal in all but the first week but the rainfall in that week was so heavy at some stations that the rainfall for the month was in excess of the normal. The only important changes of pressure during the month were a rapid fall on the 5th on the approach of the cyclonic storm from Rájpútána and another rapid fall on the 13th. The latter fall, however, was due to no disturbance, but was merely part of an oscillatory change such as occurs in the finest weather, and was accompanied by no change in the general weather conditions.

Barometer and Winds.—The mean pressure of the month was in general, though slight, defect at all stations. The deficiency was greatest at Dera Ismail Khan (—·033) and Ráwalpindi (—·030) and least at Siálkot (—·012) and Murree (—·013). At Mooltan and Dera Ismail Khan in the West Punjab winds were approximately normal in direction, but at Ludhiána and at the hill stations of Simla and Murree the mean direction of the winds during the month was almost directly opposite to the usual direction prevailing in September. In the East Punjab winds were more northerly than usual. The mean wind force differed but little from the normal at all stations.

Temperature.—The following table gives (1) the variation from the normal of the mean temperature of the Punjab for each day of the month, and (2) the highest maximum

temperature registered in the Province, with the name of the station at which it was registered:—

Date.		Variation from normal of mean temperature of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.	Date.		Variation from normal of mean temperature of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.

" 13th	...	— 1·0	105·9	Do.	" 28th	...	+ 1·0	104·9	Do.
" 14th	...	+ 0·4	107·4	Montgomery.	" 29th	...	+ 0·9	105·4	Do.
" 15th	...	+ 1·0	107·4	Do.	" 30th	...	+ 0·6	107·4	Do.

The disturbed and unsettled weather accompanying the passage of the cyclonic storm from Rájpútána into the western districts of the North-Western Provinces caused unusually low temperatures to be registered during the first part of the month. On the 6th the highest maximum temperature recorded in the whole Province was only 93·3 at Montgomery, and the mean temperature of the Punjab for that day, ending at 8 A. M. on the 7th was on an average of all stations 6·2° in defect of the normal. As these unsettled weather conditions passed away temperature commenced to rise, and on the 14th the mean temperature averaged 0·4 in excess of the normal, and from that date to the end of the month temperature was in excess. The highest maximum temperature reported during the month was 109·9 at Mooltan on the 8th, but this is possibly erroneous. On the 14th, 15th, 17th and 30th Montgomery registered temperatures exceeding 107°, the highest being 107·9° on the 17th. The mean maximum temperature of the month was in defect of the normal at most stations, Murree and Mooltan being the only stations at which it was in slight excess. The mean minimum temperature was in excess at the majority of stations, the largest excess being shown at Murree and Peshâwar.

Humidity and Cloud.—The unusual dampness of the air which was so noticeable in August continued to be a prominent feature in the humidity conditions of September, and both the humidity percentage and the vapour pressure were in excess of the normal at all stations for which normals are available for comparison, with the single exception of Simla, where the vapour pressure was in slight defect. At Peshâwar the vapour pressure averaged nearly a tenth of an inch in excess of the normal. There was less cloud than usual at most stations: only at Mooltan and Ludhiána was the cloud proportion slightly greater than usual.

Rainfall.—As already stated, the only period of general rainfall occurred at the commencement of the month, when some heavy falls of rain were reported, the heaviest being 3·9 inches at Sirsa on the 5th. Falls of over 2 inches were received during this period at Murree, Ráwalpindi, Cherát, Simla and Siálkot. The rainfall of the whole month was in general defect, but owing to these heavy falls it was in excess at Sirsa, Ráwalpindi, Simla and Siálkot. At Delhi also slightly more rain was received than usual. Rainfall was most largely in excess at Sirsa, where it amounted to 5·47 inches, while the normal average fall is only 1·79 inches. It was most largely in defect at Murree, where the deficiency was 2·13 inches. No rain fell at Peshâwar during the month.

The following tables give (A) a summary of the meteorological conditions prevailing during the month and (B) the rainfall data :—

NOTE.—R. [illegible] ...in.

PESTONJI, *Supdt.*,
Office of Director of Land Records and Agriculture, Punjab.

PUBLIC WORKS DEPARTMENT, PUNJAB, IRRIGATION BRANCH.

Irrigation Operations of Fasl Rabi 1894-95 up to 31st October 1894.

Canal Divisions.	Water distributed during October 1894. — Depth in Canal at regulating gauge. — Full supply.	Actual throughout October 1894.	Gross consumption cubic feet per second. — Estimated full supply.	Actual average throughout October 1894.	Land irrigated (approximate). — Zillah.	Acres.	Rainfall. — Number of years on which average is struck.	Average.	During month.	Chief Crops (approximate). — Name.	Area irrigated during October 1894.	Area irrigated to end of October 1894.	Area irrigated to end of October 1893.	Remarks.
PERENNIAL CANALS.

...TARY COMMISSIONER'S OFFICE,
LAHORE:
The 20th November 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PROVINCE DURING THE WEEK ENDING SATURDAY, THE 20TH OCTOBER 1894.

General Results.—The total deaths registered from all causes in the Province were 23,513 against 22,823 in the previous week and 12,928 in the corresponding week of the past year, giving respective… an annual death-rate of 59·6, 57·9 and 32·8 per 1,000 of population. The death-rate was 1·7 per 1,000 greater than that registered last week; but was 4·0 per 1,000 less than the average rate of the corresponding week of the five years 1889—1893.

Cholera.—There was not a single death registered under the head of cholera.

Small-pox.—From small-pox 51 deaths were registered against 54 in the previous week and … in the corresponding week of the past year.

Fevers.—From fevers there were 18,102 deaths against 17,179 in the previous week and 8,719 in the corresponding week of the past year.

Dysentery and Diarrhœa.—From dysentery and diarrhœa 568 deaths against 562 in the previous week and 431 in the corresponding week of the past year.

Chest Disease.—Seven hundred and thirty-five against 731 and 933.

Snake-bite.—Twenty-five against 32 and 14.

Hydrophobia.—One against 3 and *nil.*

All other causes.—Four thousand and thirty-one against 4,262 in the previous week and 2,8… in the corresponding week of the past year.

Infantile Mortality.—Seven thousand and twenty-one deaths were registered in the Province amongst infants under one year of age, of which number 3,452 were males and 3,569 females.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,464 births were registered (762 males and 702 females), giving a birth-rate of 54 per *mille* of population; 1,902 deaths were registered (926 males and 976 females), giving a death-rate of 70 per *mille* of population. In the towns of Kartárpur and Batála the death rates were excessively high, *viz.*, 444 and 349 per 1,000 respectively.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 20th November 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

LAHORE, THURSDAY, NOVEMBER 29, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 28th NOVEMBER 1894.

Reporting Station.	Rain.	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of	
				Kharif.	Rabi.
Hissar ...	...	1. Sufficient. 2. Good.	Continue low.	Threshing in progress.	Crops withering for want of rain.
Delhi ...	...	1. Sufficient. 2. Fair.	Ditto.	...	Good.
Umballa ...	...	1. Sufficient.	Slightly rising.	...	Sowings in progress.
Jullundur ...	...	1. Sufficient. 2. Good.	Continue low.	...	Sowings in progress. Condition of standing crops average.
Ferozepore ...	...	1. Sufficient.	Ditto.	...	Rats are damaging the crops in one tahsil.
Amritsar ...	...	1. Sufficient. 2. Good.	Ditto.	Harvesting in progress.	Sowings going on. Rain wanted. Condition of crops fair to good.
Siálkot ...	...	1. Sufficient. 2. Good.	Below normal.	Pressing of sugarcane and threshing of rice continued.	Wheat being sown.
Lahore ...	...	1. Sufficient.	Continue low.	Reapings over.	Good. Sowings in progress. Field rats continue to damage crops.
Mooltan ...	...	1. Sufficient.	Ditto.	Crops being harvested.	Sowings in progress.
Ráwalpindi ...	0·09 at Ráwalpindi. 0·06 in Kahúta. 0·05 in Murree.	1. Sufficient. 2. Good.	Normal.	...	Crops being sown.
Shahpur ...	...	1. Sufficient.	Below normal.	...	Rain wanted to improve rabi prospects.
D. I. Khan ...	...	1. Sufficient.	Continue low.	Harvesting in hand in some places.	Sowings in progress.
Peshawar ...	...	1. Sufficient. 2. Good.	Ditto.	...	Standing crops in good condition, except the villages watered by the Bára.

GENERAL REMARKS.

Partial rainfall in parts of Ráwalpindi District. Prices slightly rising in Umballa, normal in Ráwalpindi, below normal in Siálkot and [Shahpur], continue low elsewhere. Threshing of autumn crops and pressing of sugarcane going on. Sowings of spring crops in progress. Condition of [standing] crops is generally reported good to average. Crops are withering for want of rain in Hissar. Rain is urgently wanted in some districts to improve [prospects] of spring crops. Rats are damaging the crops in parts of Ferozepore and Lahore Districts. Cattle are generally in good condition. Fodder [sufficient] throughout the Province.

11 Shahpur ...	...	1. Sufficient. 2. Good.	Below normal.	...	Rain needed to improve rabi crops.
12 D. I. Khan ...	...	1. Sufficient. 2. Good.	Continue low.	Harvesting nearly over.	Sowings nearly completed.
13 Peshávar ...	...	1. Sufficient. 2. Good.	Ditto.	...	Good.

GENERAL REMARKS.

Slight rain has fallen in Jullundur, Lahore and Ráwalpindi Districts. Prices rising in Umballa; normal in Ráwalpindi; below normal in Siálkot; and continue low elsewhere. Threshing of autumn crops, pressing of sugarcane, and sowings of spring crops still continue. Condition of standing crops generally reported good to average. Rain is urgently needed in some districts to improve prospects. Field rats are injuring the tender crops in parts of Lahore and Ferozepore Districts. Cattle are generally reported in good condition. Fodder sufficient throughout the Province.

...The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

...ARY COMMISSIONER'S OFFICE,
LAHORE:
The 4th December 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE HEALTH OF THE PRINCIPAL TOWNS DURING THE WEEK ENDING SATURDAY, THE 3RD NOVEMBER 1894.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,427 births were registered (734 males and 693 females), giving a birth-rate of 53 per *mille* of population; 1,985 deaths were registered (967 males and 1,018 females), giving a death-rate of 73 per *mille* of population. The death-rates in the Municipal towns of Kartárpur, Batála and Jullundur were excessively high, namely 390, 299 and 160 per 1,000 of population respectively.

SANITARY COMMISSIONER'S OFFICE, LAHORE:
The 4th December 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.

NORTH-WESTERN RAILWAY.

Abstract of Principal Commodities carried over the North-Western Railway, excluding Rájpura-Bhatinda and Hyderabad-Umarkot Railways, during the month of September 1894, as compared with the same month of the previous year.

LAHORE, THURSDAY, DECEMBER 13, 1894.

PART I.
STATISTICAL.

WEATHER AND CROP REPORT FOR WEEK ENDING 11th DECEMBER 1894.

Reporting Station.	Rain	1. Supply of fodder. 2. Condition of cattle.	Prices.	Prospects of Kharif.	Prospects of Rabi.
Hissar ...	Sky cloudy.	1. Sufficient. 2. Good.	Continue low.	...	Rain urgently needed.
Delhi ...	0·12	1. Sufficient. 2. Fair.	Ditto.	...	Prospects favourable.
Umballa ...	Rain falling.	...	Rising.	...	Recent rain will be beneficial.
Jullundur ...	Slight rainfall.	1. Sufficient. 2. Good.	Continue low.	Pressing of sugarcane commenced.	Condition of standing crops average.
Ferozepore ...	0·10 at Sadr. 0·15 in City. 0·07 in Moga. 0·07 in Zíra.	...	Ditto.	...	Field rats continue damaging crops in Zíra Tahsíl.
Amritsar ...	0·18 average.	1. Sufficient.	Ditto.	Harvesting nearly completed.	Sowings in progress. Condition of crops fair to good.
Siálkot ...	...	1. Sufficient. 2. Good.	Below normal.	Sugarcane being pressed and cotton picked.	Sowings continue. Crops promising.
Lahore ...	0·21 at Sadr.	1. Sufficient. 2. Good.	Continue low.	...	Sowings in progress. Prospects good. Field rats continue to damage crops in the Kasúr Tahsíl.
Mooltan ...	...	1. Sufficient.	Ditto.	Crops, except cotton and til (sesamum) harvested.	Sowings in progress.
Ráwalpindi ...	0·02 in Pindi Gheb. 0·05 in Murree.	1. Sufficient. 2. Good.	Normal.	...	Sowings not yet completed. Rain wanted. Prospects average.
Shahpur ...	Slight rainfall.	1. Sufficient.	...	...	Rain much needed.
D. I. Khan ...	...	1. Sufficient.	Continue low.	...	Condition of standing crops good but they want rain.
Peshawar ...	...	1. Sufficient. 2. Good.	Ditto.	...	Standing crops in good condition.

GENERAL REMARKS.

Rain has fallen in parts of Delhi, Jullundur, Ferozepore, Amritsar, Lahore and Ráwalpindi, and is falling in Umballa. The sky is cloudy in Hissar. Prices are rising in Umballa, normal in Ráwalpindi, below normal in Siálkot, continue low elsewhere. Harvesting of autumn crops nearly completed. Pressing of sugarcane and picking of cotton going on. Sowings of spring crops in progress. Condition of standing crops is reported good to average. Prospects are generally favourable. Rain is urgently needed in some districts. Field rats continue to damage crops in parts of Ferozepore and Lahore Districts. Cattle are generally in good condition. Fodder sufficient throughout the Province.

TULSI DAS, *Clerk of Statistics,*
Office of Director of Land Records and Agriculture, Punjab.

AGRICULTURAL PROSPECT REPORT OF THE DISTRICTS OF THE PUNJAB FOR THE MONTH OF NOVEMBER 1894.

Explanation :—(*c*) Canal Rain-gauge Station.

1	2	3	4	5	6	7	8	9	10
		Rainfall.							
		Average Rainfall of past years.			Rainfall of present year.				
District.	Rain-gauge Stations.	1st October to 30th November.	1st April to 30th September.	For month under report.	Month under report.	1st October 1894 to 30th November 1894.	1st April 1895 to 30th Septr. 1895.	Total.	Condition of crops and health of people.
Hissar.	Sirsa ...	0·35	...	0·04	...	...	...	...	Kharíf crops harvested. Rabi crops withering for want of rain. Rain urgently wanted. Fodder sufficient. Prices low. General health of the district good.
	Fatahabad ...	0·30	...	0·05	...	...	...	...	
	Hissar ...	0·27	...	0·09	...	...	...	...	
	Hánsi ...	0·26	...	0·10	...	...	...	...	
	Bhiwáni ...	0·28	...	0·01	...	...	...	...	
	Budhláda ...	...	...	...	...	...	...	...	
	Tohána ...	...	...	...	0·45	0·45	...	0·45	
State.	Dhaneta (*c*) ...	...	...	...	1·80	1·80	...	1·80	
	Safidan (*c*) ...	...	...	...	1·03	1·03	...	1·03	
	Jind (*c*) ...	...	...	...	0·80	0·80	...	0·80	
State.	Chhani (*c*) ...	...	...	...	...	...	...	...	
	Rohtak ...	0·39	...	0·02	0·70	0·70	...	0·70	Health of people good. Rabi crops all sown and getting on well. Practically all kharíf harvested. Outturn of jowár and ... below the average.
	Gohána ...	0·33	...	0·03	1·95	1·95	...	1·95	
	Sámpla ...	0·31	...	0·01	0·84	0·84	...	0·84	
	Jhajjar ...	0·24	...	...	0·25	0·25	...	0·25	
	Farukhnagar ...	...	...	...	0·20	0·20	...	0·20	Kharíf harvest nearly completed, except cotton-picking in Núh and Firozpur. Rabi sowings well in hand and nearly closed, except on inundated land in Núh and Firozpur. The rainfall of November has been above the average and favourable to the rabi, which is in most places well above ground. Health of people good. Food stocks abundant. Fodder ample, except in parts of Palwal, where it is reported scarce. Irrigation from canal and bands has been in progress.

KOHAT.	**Kohat** ...	**1·37**	...	**0·86**	...	...	...	...	No rain during the month to speak of. Kharíf crops have been cut and harvested and the yield is estimated to be above the average. Rabi sowings on irrigated lands have nearly been completed, and the standing crops promise well. In the Bír[illegible] "Tappa" sowings on unirrigated lands have been completed but in the Kohát and Hangu Tahsíls. Sufficient area has not been sown for want of rain, which is urgently required. Health of the people is fair.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,

Sanitary Commissioner, Punjab.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 11th December 1894.

Remarks by the Sanitary Commissioner, Punjab.

Ninety-two thousand nine hundred and eighty-nine births were registered in the Province during the month of October 1894, giving a birth-rate of 53 per *mille* of population. Of the total number of births 49,009 were boys and 43,980 were girls.

The total number of deaths registered from all causes in the Province during the month of October 1894 was 100,724 against 67,848 in the previous month and 57,668 in the corresponding month of the past year, giving an annual death-rate of 58, 40 and 33 per *mille* of population per annum respectively. The death-rates were excessively high in the following districts during the month under review :—Jullundur 134, Gurdáspur 132, Amritsar 124, Hoshiárpur 103, Siálkot 96 per *mille*.

There was not a single death registered under the head of cholera.

From small-pox 256 deaths were registered against 266 in the previous month and 144 in the corresponding month of the past year; fevers 76,623 against 47,053 and 39,128; dysentery and diarrhœa 2,582 against 2,144 and 1,809.

During the month there were 37 deaths registered from suicide against 26 in the past month; wounding 47 against 63; accidents 277 against 451; snake-bite and killed by wild beasts 126 against 193; and from all other causes 20,676 against 17,634 and 16,090 in the corresponding month of the past year.

SANITARY COMMISSIONER'S OFFICE, } W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL,

NOTE.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 18[illegible]

SANITARY COMMISSIONER'S OFFICE, LAHORE: *The 10th December 1894.*

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COLONEL, *Sanitary Commissioner, Pun[jab].*

[REM]ARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PRINCIPAL TOWNS DURING THE WEEK ENDING SATURDAY, THE 17TH NOVEMBER 1894.

Births and Deaths in Municipal Towns.—In the 45 large Municipal towns 1,299 births were [regist]ered (661 males and 638 females), giving a birth-rate of 48 per *mille* of population; 1,691 deaths [were] registered (836 males and 855 females), giving a death-rate of 62 per *mille* of population. [The d]eath-rates in the following towns were very high:—Batála 205, Kartárpur 190, Jullundur 121, [Hi]ssar 117, Dera Ismail Khan 106 per *mille*.

[SANI]TARY COMMISSIONER'S OFFICE, LAHORE: *The 10th December 1894.*

Hissar ...	0·51 at Sadr. 0·85 in Hansi. 3·05 in Bhiwáni. 1·31 in Fatehabad. 0·42 in Sirsa.	1. Sufficient. 2. Good.	Continue low.	...	Crops improving.
Delhi ...	4·21 at Sadr. 3·53 in Sonepat. 3·05 in Ballabgarh.	1. Sufficient. 2. Fair.	Normal.	...	Promising except in low-lying lands.
Umballa ...	1·70 in Sadr.	1. Sufficient.	Rising.	...	Promising.
Jullundur ...	Good throughout.	1. Sufficient. 2. Good.	Ditto.	Sugarcane is being pressed.	Condition of standing crops average.
Ferozepore ...	1·14 in Moga. 0·10 in Zira.	...	Low.		Field rats are damaging crops in Tahsils Zira and Moga.
Amritsar ...	0·14 average.	1. Sufficient. 2. Good.	Continue very low.	Harvesting almost over.	Sowings in progress. Condition of crops fair to good. More rain is wanted.
Siálkot ...	...	1. Sufficient. 2. Good.	Below normal.	Pressing of sugarcane and picking of cotton continue.	Sowings in progress.
Lahore ...	0·06 at Chuniân.	1. Sufficient. 2. Good.	Continue low.	Sugarcane is being pressed.	Sowings in progress. Field rats are doing harm to crops in Kasúr Tahsil.
Mooltan ...	0·21 in Lodhrán. 0·38 in Shujabad. 0·43 in Sadr. 0·54 in Kabírwála.	1. Sufficient.	Low.	Crops, except cotton and til (sesamum), harvested.	Sowings in progress.
Ráwalpindi ...	0·07 at Sadr. 0·10 in Gujar Khan. 0·15 in Kahúta. 0·55 in Murree.	1. Sufficient. 2. Good.	Ditto.	...	Prospects average. Rain wanted.
Shahpur ...	Slight rain at Khushab.	1. Sufficient.	Rising.	...	Rain much needed.
D. I. Khan ...	0·05 in Leiah.	1. Sufficient. 2. Good.	Continue low.	...	Condition of crops good, but they want rain.
Peshâwar ...	...	1. Sufficient. 2. Good.	Ditto.	...	Crops in good condition.

GENERAL REMARKS.

Rain has fallen in all districts, except Siálkot and Peshâwar. Prices normal at Delhi, below normal at Siálkot, rising at Umballa and Jullundur, and low elsewhere. Harvesting of autumn crops almost over, pressing of sugarcane and picking of cotton still going on and sowing of spring crops yet in progress. Condition of standing crops generally good to average, prospects promising. Rain wanted in some districts. Field rats are damaging young crops of Ferozepore and Lahore Districts. Cattle are generally in good condition. Fodder sufficient in all districts.

PESTONJI, *Supdt.*,

Office of Director of Land Records and Agriculture, Punjab.

SUMMARY OF METEOROLOGICAL CONDITIONS PREVAILING OVER THE PUNJAB DURING OCTOBER 1894.

General Summary.—The meteorology of the month presents no features which call for special notice. Fine settled weather has prevailed throughout the month. Only a few light showers were received in the hill and submontane districts, the heaviest being a fall of 0·75 inch at Simla on the 6th, at the time that a storm from the Bay was breaking up at the foot of the Naini Tal Hills. But this disturbance did not affect the stations in the plains beyond giving Umballa a very light shower of about a twentieth of an inch in amount. The only other period of anything resembling unsettled weather was on the 15th, when the extreme north-west received very light rain. An important meteorological condition which, however, had no appreciable effect upon the weather in the Punjab, except perhaps in changing the prevailing direction of the wind at a few stations, was the unusually low pressures recorded during the month. Day after day the observations received showed pressure to be in moderate to considerable defect of the normal at all stations, and it was only after brisk or rapid rises of the barometer, due to the frequently occurring oscillatory changes in the atmosphere, that pressure rose occasionally to the normal. Temperature was generally higher than usual during the first half of the month, and normal or in slight defect during the latter half.

Barometer and Winds.—As already stated, pressure was in remarkable defect at all stations, the mean deficiency ranging from ·065″ at Dera Ismail Khan to ·028″ at Simla, and being more strongly marked in the plains than on the hills. The defect amounted to ·050″ or above at no less than six of the eleven stations for which normals are available, and the smallest deficiency in the plains was ·040″ at Siálkot. Probably in consequence of these unusually low pressure conditions, the mean wind direction was more easterly than usual at Ludhiána, Siálkot, Mooltan, Simla and Murree. The strength of the wind was approximately normal at all stations.

Temperature.—The following table gives (1) the variation from the normal of the mean temperature of the Punjab for the 24-hour period ending at 8 A. M. of each day of the

...th, and (2) the highest maximum temperature registered in the Province on each ...with the name of the station at which it was registered :—

Date.	Variation from normal of mean temperature of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.	Date.	Variation from normal of mean temperature of previous 24 hours.	Highest maximum temperature of the day.	Station at which registered.

14th ...	+ 3·1	101·4	Sirsa.	" 30th ...	− 0·6	91·8	Mooltan.
15th ...	+ 0·5	100·4	Do.	" 31st ...	− 0·5	92·8	Montgomery.
16th ...	+ 0·2	98·9	Do.				

The highest maximum temperatures were registered during the first half of the month, ...g which period the mean temperature of the Province was more or less in excess of the ...l, except on the 3rd, when it was in slight defect. From the 17th temperature decreased, ...was in slight or moderate defect to the end of the month. Temperature was lowest on ...21st, when it was 2·1° below the normal. The highest temperature registered during the ...th was 105·4° recorded at Montgomery on the 10th. The mean maximum temperature for ...whole month ranged from 98·9° at Sirsa to 88·3° at Ráwalpindi. The lowest mean minimum temperature was also registered at Ráwalpindi, *viz.*, 53·7°, or 2·2° below the normal ...n of the month. At the hill stations temperature was generally in excess, the excess being ...t marked at Murree, where both day and night temperatures were considerably higher than ...l. The mean temperature at this station for the month was 3·1° above the normal.

Humidity and Cloud.—With the exception of Murree, where the air was slightly ...r than usual, the mean humidity percentage of the month at all stations continued above the ...age. The mean vapour pressure was below the normal at Mooltan and Murree, and above ...practically normal at other stations. There was less cloud than usual.

Rainfall.—A few light showers were received at Peshávar, Srinagar, Cherát, Ráwal...i, Umballa and Simla, but at the majority of stations no rain fell during the month. ...fall was hence in general defect; most marked at Murree, where it amounted to 1·65 inches. ...áwar received its normal quantity, and at Simla the amount received did not fall far short ...t. The normal rainfall of the month is, however, small at all stations, and the deficiencies ...n are hence also small and not of much importance.

A.

Summary of meteorological conditions prevailing over the Punjab during October 1894.

Total ...	45,967	...	...	...	...	38,150	45,967	50,026	
Western Jumna Canal									
[illegible] ...	61	16	0'38	3'35	Wheat ...	37,916	41,136	30,780	There was a magnificent available supply in the river, but, while the demand was good in the Hissar Division it was poor elsewhere. The increase is entirely in the lower part of the Hánsi Branch and on the Sirsa Branch, elsewhere there is decrease. General rain early in November, and unsettled weather cause the prospects of this rabi to be but poor.
[illegible] ...	18,820		0'15	1'66	Barley ...	589	591	218

...—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1891.

...TARY COMMISSIONER'S OFFICE,
LAHORE:
The 24th December 1894.

W. A. CRAWFORD ROE, F.R.C.S., SURGEON-LIEUT.-COL.,
Sanitary Commissioner, Punjab.

REMARKS BY THE SANITARY COMMISSIONER, PUNJAB, ON THE GENERAL HEALTH OF THE PRINCIPAL TOWNS DURING THE WEEK ENDING SATURDAY, THE 8TH DECEMBER 1894.

Births and Deaths in Municipal Towns.—In the 41 large Municipal towns 988 births were registered (501 males and 487 females), giving a birth-rate of 44 per *mille* of population; 1,045 deaths were registered (541 males and 504 females), giving a death-rate of 47 per *mille* of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 24th December 1894.

W. A. CRAWFORD ROE, F.R.C.S., SUR.-LT.-COL.,
Sanitary Commissioner, Punjab.
